Re: *Phase I Environmental Site Assessment*  
Wheatland Regional Wastewater Treatment Project Phase I ESA  
Wheatland, Yuba County, California

Dear Mr. Pappani:

ECM Consultants (ECM) is pleased to submit this *Phase I Environmental Site Assessment (ESA)* to Raney, Planning and Management, Inc. (RPM) for the Wheatland Regional Wastewater Treatment Project in Wheatland, Yuba County, California. The Phase I ESA was performed in accordance with ASTM Standard E1527-21 and satisfies the notice requirements of Section 120(h) of Comprehensive Environmental Response, Compensation, and Recovery Act, 42 U.S. Code §§ 9601 et seq. and 40 CFR part 312 - Innocent Landowners, Standards for Conducting All Appropriate Inquiries (40 CFR part 312).

If you have any questions, please contact me at (916) 917-5022.

Best regards,  
**ECM Consultants**

Chris Drabandt, P.G.  
Project Manager/Environmental Protection Specialist

## EXECUTIVE SUMMARY

The overall purpose of the Phase I Environmental Site Assessment (ESA) is to provide Coastland Civil Engineering with knowledge of the full range of "environmental issues and liabilities" associated with the property for the Wheatland Wastewater Treatment Project (Sewer Alignment). This Phase I ESA is part of the hazardous waste operations historical assessment of the properties. The subject property (Site) is a linear area stretching 8.5 miles from the wastewater treatment plant on Malone, through the City of Wheatland, through Jasper Lane, onto South Beale Road, to a point near the intersection of Rancho Road and Highway 65.

The Site is a linear area approximately 8.5 miles long and 40 feet wide in Yuba County in the Sacramento Valley that extends through farmland and the city of Wheatland. In general, the Site runs parallel to or overlaps public roads.

One Historical Recognized Environmental Condition (HREC) was identified during the course of this Phase I ESA. According to the GeoTracker database, the closed Leaking Underground Storage Tank was associated with an active walnut farm and the facility received a No Further Action determination from the Central Valley Regional Water Quality Control Board on December 23, 1996. No Recognized Environmental Conditions (RECs) or Controlled RECs (CRECs) were identified during the course of research for the footprint of the proposed Sewer Alignment.

No further investigation into the HREC identified is warranted. Non-scope and other considerations should be assessed to determine if further investigation or intervention is required. Other identified non-scope, *de minimis*, or other considerations do not pose any known environmental or safety threat at this time.

# 1 INTRODUCTION

## 1.1 Purpose

The overall purpose of the Phase I Environmental Site Assessment (ESA) is to provide Coastland Civil Engineering with knowledge of the full range of "environmental issues and liabilities" associated with the property for the Wheatland Wastewater Treatment Project (Sewer Alignment) and satisfy requirements of American Society for Testing and Materials (ASTM) Standard E1527-21, the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), (42 U.S.C. § 9601 et seq.), and 40 CFR part 312 - Innocent Landowners, Standards for Conducting All Appropriate Inquiries (40 CFR part 312). Coastland Civil Engineering contracted Raney Planning and Management (RPM) to conduct an Environmental Impact Report (EIR). This Phase I ESA is part of the hazardous waste operations historical assessment of the properties. The subject property (Site) is a linear area stretching 8.5 miles long by 40 feet wide from the wastewater treatment plant on Malone, through the City of Wheatland, through Jasper Lane, onto South Beale Road, to a point near the intersection of Rancho Road and Highway 65 (**Figure 1**).

The primary objectives of the ESA were the following:

- Identify, describe, and document conditions indicative of releases and threatened releases of hazardous substances (*i.e.* CERCLA liabilities) on, at, in, or to the subject property. The ASTM Standard E1527-21 expands the ESA investigation to include both hazardous substances and petroleum products, and the release or threat of release of either defines a Recognized Environmental Condition (REC).
- "Non-Scope Consideration" issues under the ASTM Standard which include, but are not limited to, asbestos containing material, radon, lead-based paint, non-hazardous solid waste disposal areas, wastewater disposal systems, drinking water systems, drinking water and/or other wells, physical hazards, etc., are also to be considered in the ESA.
- Past and present practices and processes concerned with storage, use, and disposal of hazardous substances, as well as future land uses, will be accounted for as Non-Scope Considerations.
- Determine whether there are human or environmental receptors actually or potentially exposed to releases or potential releases of hazardous substances.
- Evaluate and identify RECs at the subject property.

## 1.2 Evaluation Scope

The scope for evaluation of the property is based on information derived from the following sources in general accordance with guidelines set forth in ASTM Practice E1527-21:

- Interviews with past and present owners, operators, and occupants, as available.
- Examination of aspects of the historical background and operating history of the site based upon interviews, review of aerial photographs, and other available historical documents.
- Examination of existing information regarding the site's hydrogeological, geological, and topographical characteristics.
- Performance of a physical site inspection to observe existing conditions, business activities, and operations on the subject site and adjoining properties.

- Review of federal, state, county, tribal, and local agency records, as deemed appropriate by ECM, pertaining to the site and other selected properties within the approximate minimum search distance of the subject site.

### 1.3 Disclaimer

The client should be aware that ASTM Practice E1527-21 does not necessarily address requirements of state or local laws or any federal laws other than aspects of the “all appropriate inquiry” provisions of the landowner liability protections. ASTM E1527-21 was used as a guideline for the preparation of this ESA with modifications to meet requirements of CERCLA 120(h) and 40 CFR part 312. The client and users of this report are cautioned that federal, state, and local laws may impose environmental assessment and other obligations that are beyond the scope of this practice. The client and users of this report should also be aware that there are likely to be other legal obligations with regard to hazardous substances, substances of concern of petroleum products that may be on the property that are not addressed in this practice or within the scope of work of this investigation that may pose risks of civil and/or criminal sanctions for non-compliance.

ECM assumes the client has provided all of the following information regarding the subject property:

- Knowledge regarding activity and land use limitations that are in place on the subject site or that have been filed or recorded in a registry.
- Any specialized knowledge or experience known by the subject site or surrounding properties.
- Any commonly known or reasonably ascertainable information about the subject property related to the presence or likely presence of contamination on the subject property.

This report was prepared over a specific period of time from January 2021 through February 2021. Site conditions may have changed, or the owner may have taken actions at the site after the Phase I ESA was completed.

## 2 REGIONAL SETTING

### 2.1 Location and Direction

The Site originates at the wastewater treatment plant at the southern terminus of Malone, south of the city of Wheatland (**Figure 2**) south of Pump Station #1. The survey area continues north along Malone to Pump Station #1. The sewer alignment travels northeast, the pipeline makes a jog west-northwest on D Street (Highway 65) and continues northeast along the southeast sides of residences for approximately 385 feet. The pipeline turns northeast, parallel to State Street for approximately 70 feet and resumes northeast onto 6<sup>th</sup> Street. It crosses a petroleum pipeline and the Union Pacific Railroad and travels parallel to 6<sup>th</sup> Street for approximately 0.30 miles. The alignment turns north-northeast along 6<sup>th</sup> Street for approximately 385 feet then turns northeast along Main Street for approximately 285 feet. The alignment follows Spenceville Road and subsequently Camp Beale Highway for approximately 1.0 mile and turns north-northwest onto Jasper Lane. At the east corner of Camp Beale highway and Jasper Lane is the large proposed property for Pump Station #2 and the equipment laydown yard for construction. The alignment turns north-northwest along Jasper Lane. The alignment follows Jasper Lane for approximately 3.4 miles and turns west-southwest onto an access road (sometimes referred to as South Beale Road). The Sewer Alignment follows the rice field access roads, canals, and almond orchard access roads for approximately 1.7 miles. The Sewer Alignment turns south into the orchard for approximately 410 feet, and then turns southwest for approximately one-quarter mile. The alignment bend west for 220 feet then north-northwest for 260 feet. The alignment turns west-southwest for approximately 0.30 miles and crosses Best Slough and then continues for another 0.22 miles. The alignment turns northwest for approximately 0.22 miles and turns again to the north beneath a northern railroad branch. The alignment continues for another quarter mile along Bradshaw Road and turns southwest onto South Beale Road. It continues along South Beale Road for approximately 970 feet. The alignment the turns northwest following the Union Pacific railroad tracks for approximately 0.28 miles and turns southwest across Rancho Road for approximately 420 feet. A proposed Pump Station #3 is located on the corner of Rancho Road and Highway 65. The pipeline leaves the pump station to the north and follows Rancho Road to the northwest for approximately 0.34 miles.

### 2.2 Regional Characteristics

The Site is a linear area approximately 8.5 miles long and 40 feet wide in Yuba County in the Sacramento Valley that extends through agricultural and rural lands, and through the City of Wheatland. In general, the Site runs parallel to paved public roads but crosses open private property and passes beneath several petroleum pipelines and railroad tracks. Portions of the Sewer Alignment are owned by private individuals, companies, and public utilities.

### 2.3 Physical Setting Sources

ECM performed research to generally evaluate the regional environmental context and onsite subsurface geologic and hydrogeologic conditions of the properties. ECM reviewed reference texts and maps to obtain information on the geologic and hydrogeologic characteristics of the site and vicinity (**Appendix A**).

#### 2.3.1 Site Topography

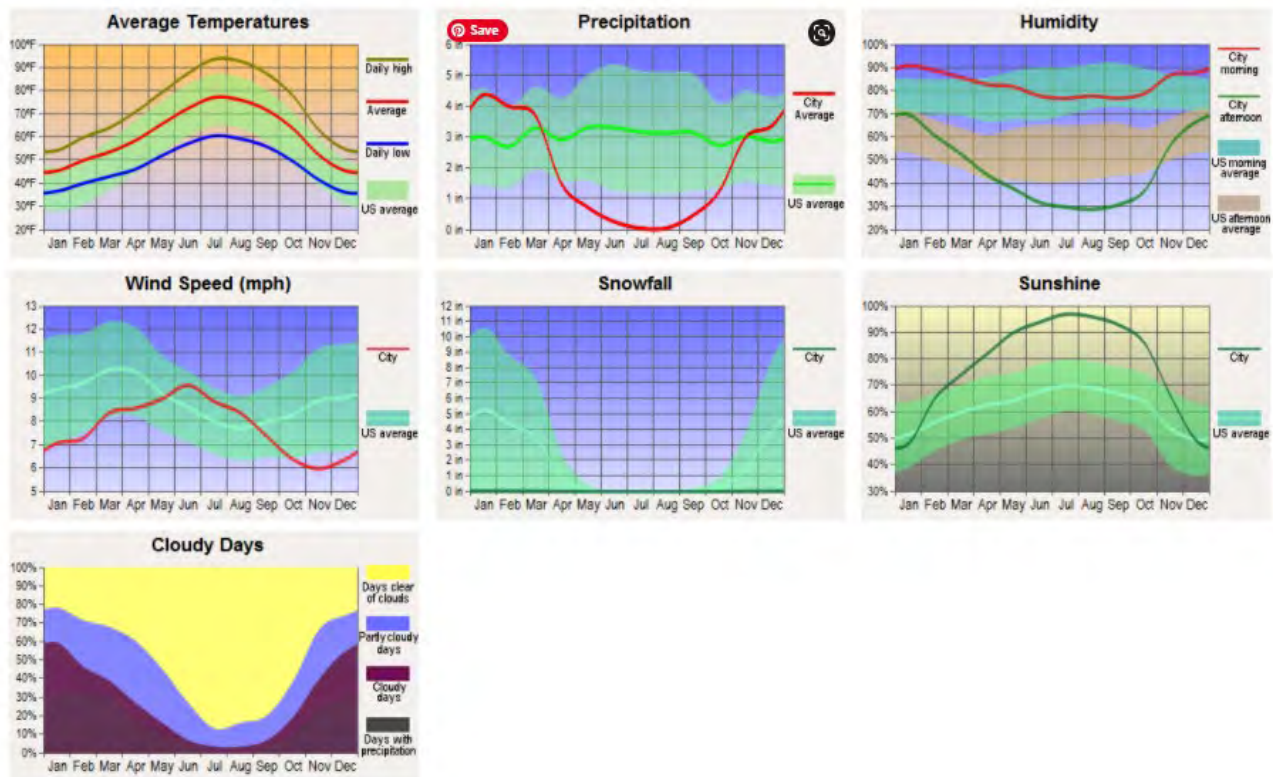

The following topographic information was derived from the Envirosearch records research provided in (**Appendix B**). The Site is located in the Sacramento Valley. Regional topography is relatively flat, with gently sloping hills to the northeast. The majority of the Sewer Alignment is on public roads which are flat. There are gentle slopes toward creeks and sloughs.

### 2.3.2 Climate

Wheatland has a temperate climate with seasonal variations consisting of hot dry summers and mild wet winters. The average temperature ranges from a daily low of approximately 35 degrees Fahrenheit (°F) in January/December to a daily high of 95°F in July/August. Precipitation falls primarily between October and April. The majority of precipitation falls in November, December, January, and February.

#### Average climate in Wheatland, California

Based on data reported by over 4,000 weather stations

Source: <http://www.city-data.com/city/Wheatland-California.html>

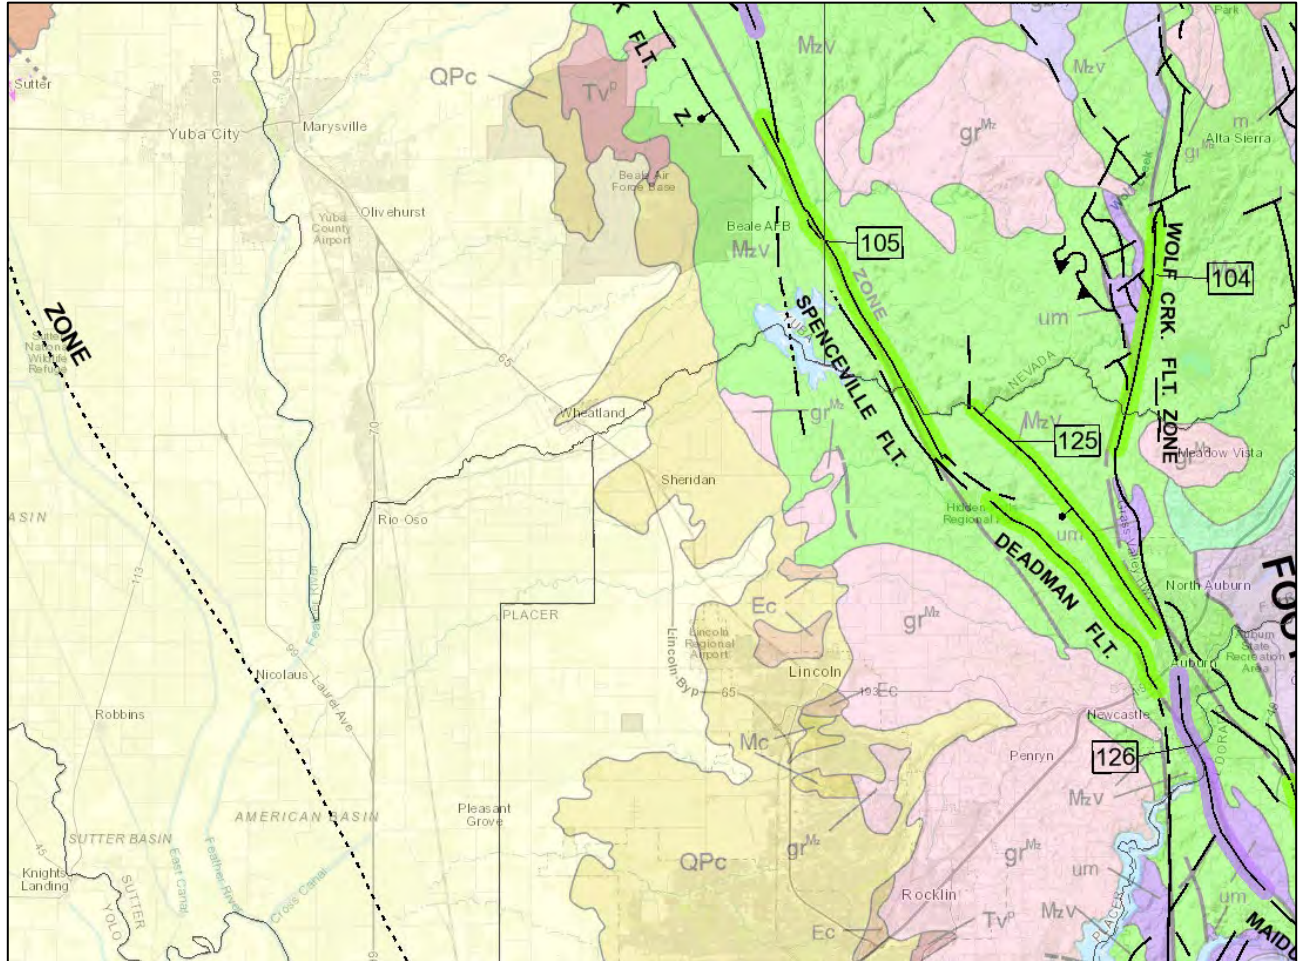

### 2.3.3 Regional Geologic Setting

The Site is located in the Sacramento Valley of the Great Valley geomorphic province. The Great Valley is a northwest to southeast trending depression approximately 430 miles long and 50 miles wide. The Great Valley is bounded on all sides by mountain ranges: the Cascade Range to the north, the Sierra Nevada to the east, the Tehachapi Mountains to the south, and the Coast Range to the west. The Great Valley Province is characterized by alluvial deposits from the surrounding mountain ranges. Faulted and folded sediments of the Coast Ranges extend eastward beneath the Great Valley. The igneous and metamorphic rocks of the western slope of the Sierra Nevada dip gently westward and extend beneath the sediments of the Great Valley Province. Sediments from the Sierra Nevada range continue to erode into the Great Valley from continual uplift.

The eastern Sacramento Valley is underlain by the Pliocene age Tuscan Formation, which ranges in thickness from 1 to 10,000 feet (USGS, 2011). The Tuscan Formation consists of black volcanic sands, gravel, and tuffaceous clay that yields large quantities of water to wells in the Sacramento Valley. The Tertiary age Lone, Valley Springs, and Mehrten Formations outcrop along the eastern flank of the Sacramento Valley and dip to the southwest beneath the surface of the valley. The Lone Formation is composed of clay, sand, sandstone, and conglomerate. The Valley Springs Formation

is a sequence of mostly fluvial sediments that unconformably overlies the lone Formation, and is composed of sandy clay, sand, rhyolitic ash, and siliceous gravel (USGS, 2011). The Mehrten Formation is comprised of two distinct units: an upper unit composed of unconsolidated black sands interbedded with blue-to-brown clay, and a lower unit composed of hard, dense breccia (USGS, 2005).

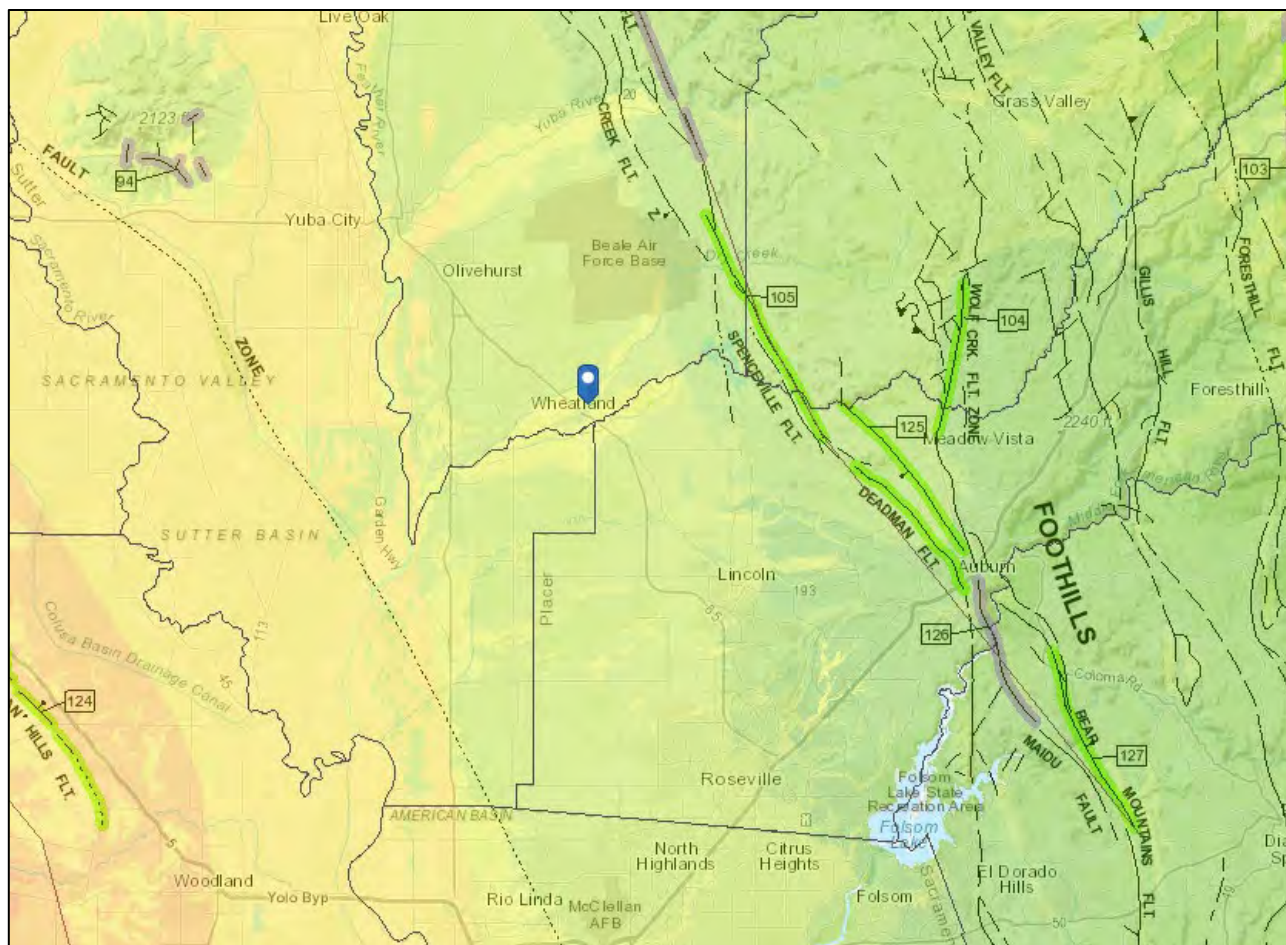

Source: CGS, 2021 <https://maps.conservation.ca.gov/cgs/DataViewer/>

The nearest fault zones to wheatland are the late Quaternary Spenceville (#105), Dewitt (#125), and Deadman Faults (part of the Foothills Fault System) to the east and southeast approximately 5 to 8 miles. The concealed Willows Fault Zone underlies the Central Valley approximately 15 miles to the west. According to the California Geological Survey (CGS) 2016 Earthquake Shaking Potential map (<https://maps.conservation.ca.gov/cgs/DataViewer/>), the sewer alignment falls within a shaking potential of 0.35 to 0.45 times gravity (Xg) with a shear wave velocity of 228.2 meters per second (m/sec) to 468.40 m/sec indicating moderately low risk for damage to structures.

ECM has reviewed the maps for the Wheatland Quadrangle with respect to the Alquist-Priolo Earthquake Fault Zoning Act. The online mapping program indicates that the area is not within an Alquist-Priolo Active Fault Zone or a fault zone with activity within 11,000 years (<https://maps.conservation.ca.gov/cgs/EQZApp/app/>). Additionally, the area has not been evaluated for liquefaction or landslides.

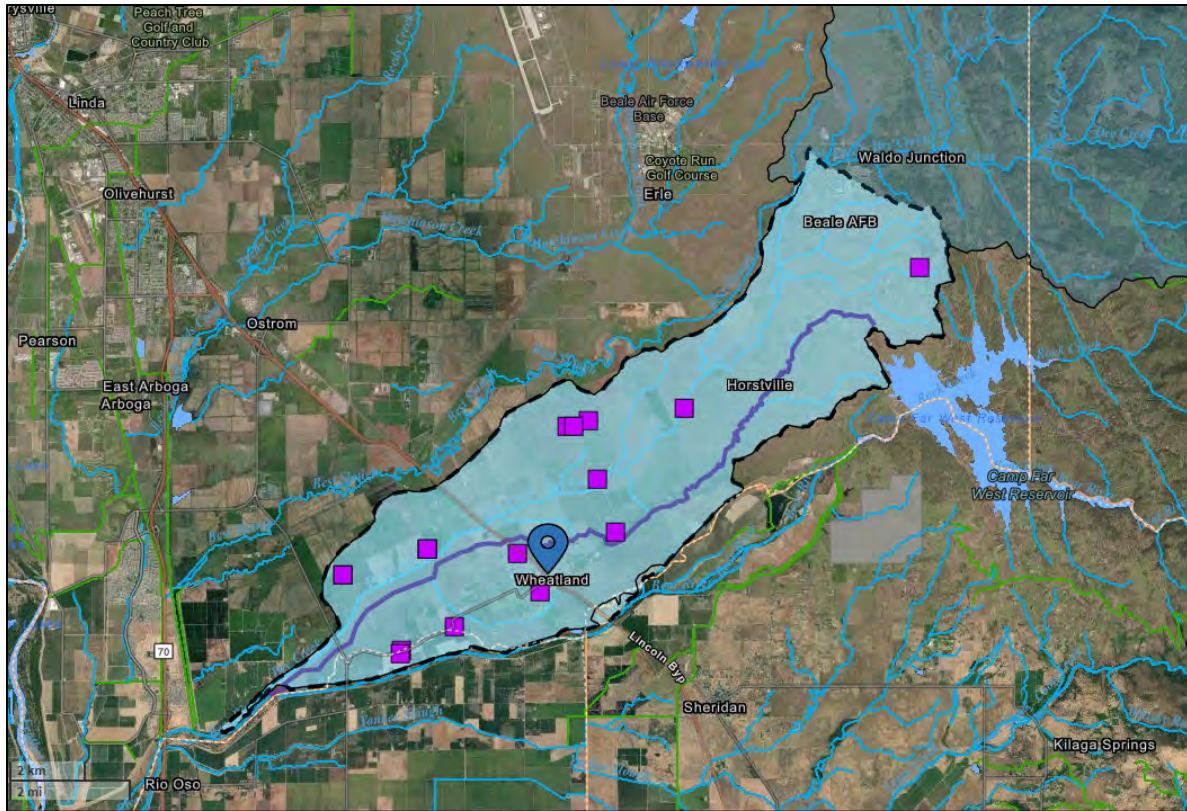

Source: CGS, 2021 <https://maps.conservation.ca.gov/cgs/DataViewer/>

Slope failures involve the downslope displacement and movement of material, triggered either by static (gravity) or dynamic (earthquake) forces. Exposed rock slopes undergo rockfalls, rockslides, or rock avalanches, while soil slopes experience soil slumps, rapid debris flows, and deep-seated rotational slides. Complex variables, including the geology, structure, topography, slope geometry, and amount of groundwater present can determine slope stability. External processes including climate and human activity are also variables. Considering no known active faults were found in the area, the sites are considered to have a low potential for landslide hazard.

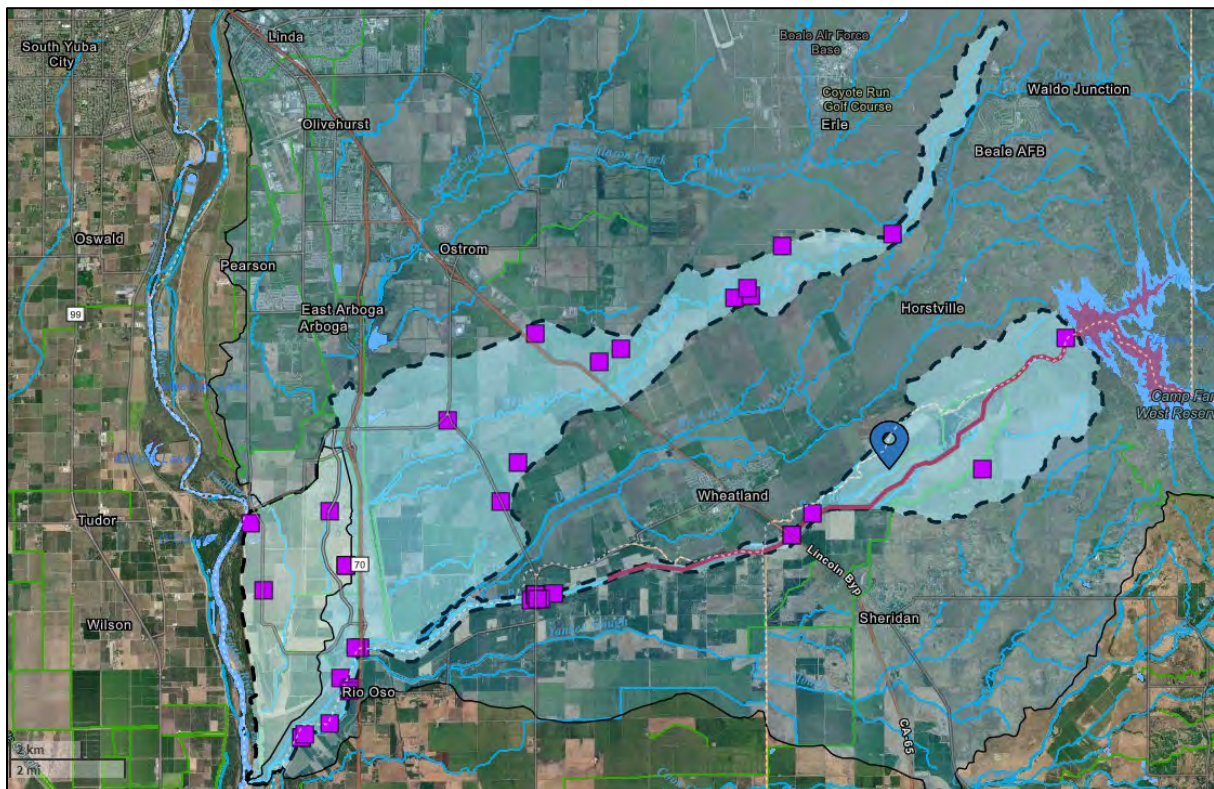

### 2.3.1 Hydrologic and Hydrogeologic Setting

The Site lies within the Grasshopper Slough-Dry Creek watershed (HUC 180201260403) and the Best Slough-Bear River Watershed (HUC 180201260502) in the Upper Bear subbasin of the Bear River Basin of the Lower Sacramento Basin (2021 US EPA). The Upper Bear subbasin, which incorporates the Site, originates about 20 miles west of the crest of the Sierra Nevada in northern Placer County within the boundaries of the Tahoe National Forest. The Bear River flow patterns are high in the winter and spring and very low in the summer and fall. Bear River flows are regulated almost entirely by several storage reservoirs and numerous diversions. Dry Creek drains into the Bear River southeast of the Site. Dry Creek drains approximately 115 square miles from its headwaters to its confluence with the Bear River.

Source: Best Slough-Bear River Watershed (180201260502) How's My Waterway (EPA 2021).  
<https://mywaterway.epa.gov/community/180201260502/overview>

According to California Department of Water Resources (DWR) Bulletin 118 for groundwater basins, the project area lies within the South Yuba groundwater subbasin in the eastern portion of the Sacramento Valley Groundwater Basin. It is bounded on the west by the Yuba-Sutter County line, on the north by the Yuba River. On the east the boundary is defined by the contact between alluvium within the subbasin, and volcanic bedrock outside the subbasin including Miocene-Pleistocene Volcanic Rocks (MPv) and Jurassic Volcanics (Jv). On the south the subbasin boundary is defined by the Yuba-Sutter and Yuba-Placer County lines and Dry Creek Mutual Water Company's southern boundary.

### 3 LOCAL SETTING

#### 3.1 Location and Legal Description

Before statehood in 1850, California was only crudely surveyed with the boundaries of Spanish and Mexican land grants (ranchos); since statehood, the PLSS was used to convey government lands. The majority of the sewer pipeline is located within the City of Wheatland and do not have section identifications but are considered located in T14N, R5E and T13N, R5E Township 13 North, Range 5 East; Sections 9, 27, 33, and 34, Mount Diablo Base and Meridian (MDBM). The Site is primarily located on paved public roads, with the exception of the parcels listed below, is approximately 40 feet wide, and stretches approximately 8.5 miles.

APN	Size in Acres	Property Type
015-490-024-000	6.06	Vacant Land - Common
015-060-001-000	--	Railways
015-490-025-000	0.86	Vacant Land – Common
015-490-026-000	27.78	Vacant Land - Single Family
015-360-032-000	29.40	Native Pasture
015-360-040-000	5.00	Vacant Land - Single Family
015-110-023-000	114.10	Rice
015-110-022-000	116.69	Rice
015-070-025-000	13.00	Vacant Rural Homestead 10-20 acres
015-100-052-000	216.91	Prunes
015-520-014-000	27.18	Single Family Residential - Rural
015-520-016-000	13.36	Other Commercial
015-520-004-000	--	Railways

#### 3.2 Site and Vicinity Characteristics

The Sewer Alignment begins south of the city of Wheatland with adjacent residences to the north (**Figure 2**). The Sewer Alignment is proposed to be placed beneath public roads including 6<sup>th</sup> Street, Spenceville Road, South Camp Beale Highway, Jasper Road, South Beale Road, and Rancho Road. Along 6<sup>th</sup> Street in Wheatland, the Sewer Alignment passes by residences, Big Al's Market, the Wheatland Laundromat, a park, and an electrical transformer substation. As the alignment turns northeast, it passes near the Wheatland School District and more residences. The alignment turns onto Spenceville Road/Camp Beale Highway and passes more residence and agricultural fields. The Pump Station #2 Location is proposed to be in a current agricultural field east of the corner of Jasper Lane and Camp Beale Highway. The alignment turns north-northwest past additional agricultural fields and rural residences. A laydown yard for construction equipment and supplies is proposed at a current storage area for agricultural equipment. The alignment turns southwest along South Beale Road (unpaved) which is situated between agricultural fields and the Best Slough on the western end. The alignment turns north toward the intersection with Bradshaw Road and turns west onto South Beale Road (cross-traffic). The alignment turns northwest along the eastern side of the Union Pacific railroad tracks and crosses westerly beneath them near Highway 65 and Rancho Road. The alignment then follows Rancho Road northwesterly and terminates.

### Current use of the Property

The Sewer Alignment follows public roads and is currently used for transportation (**Figure 3**). The corner of Jasper Lane and Camp Beale Highway have a proposed pump station and temporary construction equipment laydown yard that are on private property used for pasture. The Sewer Alignment crosses beneath active Union Pacific Railroad Tracks twice in the south and north portions of the project.

### Descriptions of Structures, Roads, Other Improvements

The majority of the vicinity around the Sewer Alignment is almond orchards, rice fields, open fields, and the City of Wheatland. On the Northeastern portion of the alignment the agricultural fields appear to be rice, row crops, and orchards. The Sewer Alignment crosses several bridges: one along Camp Beale Road, another across Dry Creek along Jasper Road, and again across Best Slough in the northern portion of the project. The Sewer Alignment primarily runs beneath roads and crosses beneath several active railways.

### Current Uses of the Adjoining Properties

The majority of land use is residential and commercial in the southern portion of the site within the City of Wheatland. The Sewer alignment crosses and runs parallel to several roads and highways. Beginning in the southwest portion of the Sewer Alignment, a discharge pond for the sewer system is located south of the pipeline. A storage area for private vehicles, boat, and recreational vehicle is located across state road. The Union Pacific Railroad is still active, and the pipeline will pass beneath it. A small market is located north of the pipeline along 6<sup>th</sup> street. Residences and small commercial properties line 6<sup>th</sup> street. An industrial electrical substation is located along the bend of 6<sup>th</sup> Street. An open park is located to the north and northeast near the bend of 6<sup>th</sup> street. The Wheatland School District is located near the intersection of 6<sup>th</sup> Street and Main Street. A few residences are located along the southern and northern portions of Main Street. Agricultural fields and a few residences are located along South Beale Road and Jasper Lanes. The pipeline turns west into rice fields and almond/walnut orchards along a slough that supplies water irrigation to the rice fields. The pipeline crosses another creek onto open fields and turns and runs past the U.S. Government Beale Air Force Base radar station. The pipeline crosses two sets of railroad track spurs with the southern one not in use and the northern one active. The pipeline runs along roads with open fields and agricultural fields surrounding the alignment. The pipeline runs parallel to the active Union Pacific Railroad before running beneath it and Rancho Road. The area surrounding the Sewer alignment in this area is agricultural.

## **3.3 Historical Use of Property**

ECM personnel researched historical land uses, which could potentially create current recognized environmental conditions on the subject property. As a standard part of the Phase I ESA scope of work, ECM obtained available topographic maps, aerial photographs, and any other readily accessible information to develop information on the historical use of the site and surrounding areas, back to the property's obvious first developed use as required by the All Appropriate Inquiries (AAI) rule.

Additionally, ECM attempted to interview the managers of the Wheatland Sewer project and the operators of the farm buildings that contained chemicals and petroleum products. Responses for interviews were not received. However, ECM reviewed historical city directories, fire insurance maps, and reviewed building department records (as available and applicable to the evaluation of the site). The content and span of the historical investigation was limited by the content of records, coverage, and the inability to access physical records. Sanborn fire insurance maps were available from 1884, 1890, 1899, 1909, 1928, and 1931 through the U.S. Library of Congress Map Collection for portions of the subject property in the City of Wheatland Maps and directories provided by the Historical Information Gatherers are included in **Appendix B**.

## 4 RECORDS RESEARCH

### 4.1 Standard Environmental Record Sources

ECM contracted Envirosearch Corporation (Envirosearch) to provide specific federal, state, county, and tribal (as available) regulatory records pertaining to the subject site and surrounding sites within an approximate minimum search distance of each of the subject properties, in accordance with the requirements outlined in ASTM Practice E1527-21 (and subject to record availability).

The Envirosearch report for the subject property is presented in **Appendix B**. Please see the attached report for details of the specific databases searched, descriptions of the information provided by each database, and the dates the records were last updated. Information from pertinent databases and databases with results are shown below.

Additionally, other databases were utilized to derive site specific information including, but not limited to, well completions report from the DWR database which provides a broad area assessment of wells constructed (<https://dwr.maps.arcgis.com/apps/webappviewer/>), Mine Resource Data System (<https://mrdata.usgs.gov/mrds/map-graded.html>), California State Water board GeoTracker Database, Department of Toxic Substances Control EnviroStor, U.S. Fish and Wildlife Service (USFWS) Critical Habitat for Threatened and Endangered Species (<https://fws.maps.arcgis.com/home/webmap/>), USFWS Information for Planning and Consultation (IPaC, <https://ecos.fws.gov/ipac/location/index>), and the National Wetland Inventory database (<https://www.fws.gov/wetlands/data/Mapper.html>).

### Regulatory Agency Database Information

\* AMSD – Approximate Minimum Search Distance, per ASTM Practice E1527-21

ECM's review of the above listed databases and additional databases revealed several sites located within the subject property and are summarized below.

- California Integrated Water Quality System (CIWQS) Project identified Wheatland Ranch, the Malone Avenue Culvert Replacement Project, the City of Wheatland Wastewater Treatment Plant, and the City of Wheatland Collection System on the subject property. The Malone Avenue Culvert Replacement Project was identified as a dredge and fill site. The 0.02-acre project consisted of removing a failed culvert and relocating a sewer force main that runs over the culvert. The failed culvert was approximately 30 feet long, constructed of a metal plate arch supported by concrete spread footings, and has a four-foot radius half-round arch with a natural-bottom channel invert and concrete headwalls.
- The HazNet database identified the following facilities on the subject property: a Pacific Gas & Electric (PG&E) substation containing polychlorinated biphenyls (PCBs) is located on Main Street and 6<sup>th</sup> Street; the second facility is listed as the City of Wheatland, no further information was available; Sprint, Robert Stineman, and Bear River Hop Farm was identified with no violations, chemicals stored on the subject property included hydrocarbon solvents; and Wheatland Smog and Repair, LLC with chemicals stored on the property.
- The California Environmental Protection Agency (CalEPA) identified Sprint Wheatland Regenerator, Wheatland Farms, Waltz Ranch, the City of Wheatland Wastewater Treatment Plant, and the City of Wheatland Collection System on the subject property. The facility stores oxygen, gasoline, diesel, and acetylene; no violations were identified. The Malone Avenue Culvert Replacement Project was identified as a dredge and fill site.
- The Federal Service Registry (FRS) identified Waltz Ranch as a chemical storage facility. The FRS identified the City of Wheatland Wastewater Treatment Plant, and the City of Wheatland Collection System.
- The California State Water Resources Control Board Regulated Facility Report (RFR) database identified the City of Wheatland Wastewater Treatment Plant, the Malone Avenue Culvert Replacement Project, and the City of Wheatland Collection System.
- The U.S. EPA Enforcement and Compliance History Online (ECHO) database identified Sprint, Robert Stineman, and Bear River Hop Farm. No violations were identified.
- The MRDS identified the Wheatland Pit that is located north of the southernmost end of the alignment. The commodity is clay using surface mining methods.
- The Resource Conservation and Recovery Act Non-Generator (RCRA NONGEN) database identified J and W Auto Service. No violations were identified.

Remaining database findings are located offsite within 1 mile. No offsite database findings appear to have significant impact at the Sewer Alignment.

#### **4.1.1 Historical Environmental Investigations**

ECM searched environmental databases including, but not limited to California State Water Board's GeoTracker, Department of Toxic Substance Control (DTSC) EnviroStor, and EPA's Brownfields. Historical environmental investigation, cleanup activities, and regulatory action at the Site is summarized below:

##### **SM Damon Estate – 2493 Spenceville Road**

According to the GeoTracker database (T0611500053), the closed Leaking Underground Storage Tank was associated with an active walnut farm. On December 17, 1991, a 3,000-gallon gasoline UST was removed from the Site. Approximately 650 to 700 cubic yards of surrounding soil was over-excavated and allowed to bioremediate onsite. Analytical results from soil samples collected were non-detect with the exception of one sample, which contained concentrations of total petroleum hydrocarbons (TPH) as gasoline, toluene, ethylbenzene, and xylenes less than San Francisco

Regional Water Control Board (SFRWQCB) Tier 1 Environmental Screening Levels (ESLs). Analytical results from the bioremediated soil were non-detect for TPH as gasoline, benzene, toluene, ethylbenzene, and xylenes.

An onsite well located 15 to 20 feet east of the tank was sampled; analytical results were non-detect for TPH as gasoline, benzene, toluene, ethylbenzene, and xylenes. The facility received a No Further Action determination from the Central Valley Regional Water Quality Control Board on December 23, 1996.

#### 4.1.2 Historical Aerial Photographs

Historical aerial photographs were provided by EnviroSite for the subject property (**Appendix B**). Historical aerial photographs from U.S. Department of Agriculture (USDA), National Aerial Photography Program (NAPP), National Agriculture Imagery Program (NAIP), and U.S. Geological Service (USGS) from 1947 to 2020 were examined to assist in determining past and current uses of the property. The approximate subject property is highlighted in red. A description of the historical aerial photography is summarized in the table below.

Year	Description
1947	Malone Road, Main Street, Spenceville Road/Camp Beale Highway, and Jasper Lane were apparent. Spenceville Road/Camp Beale Highway made two 90 degree turns approximately 0.4-mile from the terminus of Main Street.
1954	No apparent changes.
1968	An orchard was apparent on the property currently occupied by the wastewater treatment plant. Spenceville Road/Camp Beale Highway was realigned and appeared similar to the present.
1975	The wastewater treatment plant was apparent. Highway 65 has been constructed into a four-lane road.
1982	The photo was indecipherable.
1984	No apparent changes.
1985	No apparent changes.
1987	No apparent changes.
1993	No apparent changes.
1998	No apparent changes.
2005	A pond was apparent on the wastewater treatment plant property.
2009	The large electrical substation has been constructed on the corner of 6 <sup>th</sup> Street.
2010	No apparent changes.
2012	No apparent changes.
2014	No apparent changes.
2016	No apparent changes.
2018	No apparent changes.
2020	No apparent changes.

### 4.1.3 Historical Topographic Maps

Topographic maps were provided by EnviroSite (**Appendix B**) from USGS historical topographic maps from 1910 to 2018 were examined to assist in determining past and current uses of the property. Interpretation of each historical topographic map is provided below.

Year	Description
1910	Malone Road, Main Street, Spenceville Road/Camp Beale Highway, and Jasper Lane were apparent. Spenceville Road/Camp Beale Highway made two 90 degree turns approximately 0.4-mile from the terminus of Main Street.
1942	No apparent changes.
1947	The crossroad of South Beale Road and Highway 65 are apparent. Two spurs of the Union Pacific Railroad (at the time Southern Pacific) have been constructed following Camp Beale Highway.
1949	No apparent changes.
1953	No apparent changes.
1992	No apparent changes.
2012	No apparent changes.
2015	No apparent changes.
2018	More agricultural field roads are noted between Camp Beale Highway and South Beale Road.

## 4.2 Physical Settings

### 4.2.1 Soil Setting

The USDA Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining, and distributing soil survey information for privately owned lands in the United States. Summaries of soil units and characteristics that may be observed within the subject property is presented below. Site specific soil location, description, and details are provided in the EnviroSite report **Appendix B** and USDA Soil Survey Reports are provided in **Appendix A**.

#### Columbia fine sandy loam (117 and 137)

Columbia fine sandy loam (117) consists of fine sandy loam from 0 to 38 inches, and very fine sandy loam from 38 to 68 inches and is somewhat poorly drained. The unit is classified as prime farmland if irrigated. Slopes are 0 to 2 percent.

Columbia fine sandy loam (137) consists of fine sandy loam from 0 to 9 inches; fine sandy loam, sandy loam from 9 to 18 inches; and stratified sand to silt loam from 9 to 18 inches. The unit is classified as prime farmland if irrigated. Slopes are 0 to 1 percent.

#### Holillipah loamy sand

Holillipah loamy sand, channeled, (134) consists of loamy sand from 0 to 8 inches; sand from 8 to 32 inches; loamy sand from 32 to 35 inches; fine sandy loam from 35 to 47 inches; and loamy fine sand from 47 to 61 inches. The parent material for this unit is sandy alluvium derived from igneous, metamorphic and sedimentary rock. The unit is not prime farmland and is somewhat excessively drained. Slopes are 0 to 2 percent.

#### Holillipah sandy loam

Holillipah sandy loam (136) consists of sandy loam from 0 to 15 inches and stratified sand to loamy fine sand from 15 to 60 inches. The unit is classified as prime farmland if irrigated. Slopes are 0 to 2 percent.

#### Conejo loam

Conejo loam (141) consists of loam from 0 to 62 inches. The parent material for this unit is loamy alluvium derived from igneous and metamorphic rocks. The unit is classified as prime farmland if irrigated. Slopes are 0 to 1 percent.

#### Horst sandy loam

Horst sandy loam (169) consists of sandy loam from 0 to 10 inches; loamy sand from 10 to 15 inches; and silty loam from 15 to 62 inches. The unit is moderately well drained. The unit is classified as prime farmland if irrigated, and the parent material is mixed alluvium. Slopes are 0 to 1 percent.

#### Horst silt loam

Horst silt loam (170) consists of silt loam from 0 to 60 inches and loam from 60 to 70 inches. The parent material for this unit is mixed alluvium. The unit is classified as prime farmland if irrigated. Slopes are 0 to 2 percent.

#### Xerofluvents

Xerofluvents (192) consists of stratified sand to loamy sand originating from alluvium and are moderately well drained. The unit is located on floodplains. The unit is classified as farmland of statewide importance. Slopes are 0 to 2 percent.

Xerofluvents (194) consists of stratified loamy sand to fine sandy loam from 0 to 15 inches; stratified loamy sand to fine sandy loam to silt loam from 15 to 37 inches; and stratified loam to silty clay loam to clay from 37 to 55 inches. The unit is somewhat poorly drained. The parent material for this unit is alluvium. The unit is not prime farmland. Slopes are 0 to 2 percent.

#### Redding gravelly loam

Redding gravelly loam (208) consists of gravelly loam from 0 to 19 inches; clay from 19 to 22 inches; and cemented gravelly material from 22 to 35 inches. The parent material for this unit is loamy alluvium derived from igneous, metamorphic and sedimentary rock over clayey alluvium derived from igneous, metamorphic and sedimentary rock over cemented alluvium derived from igneous, metamorphic and sedimentary rock. The unit is moderately well drained. Slopes are 0 to 8 percent.

### **4.2.2 National Wetland Inventory**

ECM utilized the U.S. Fish and Wildlife National Wetlands Inventory Mapper (<https://www.fws.gov/wetlands/data/Mapper.html>) to survey surface waters and wetlands for the proposed Sewer Alignment (**Appendix A**). The proposed Sewer Alignment crosses a paulstrine wetland area that is forested with broad leaf deciduous trees and seasonally flooded on Camp Beale Highway (PFO1C). The alignment crosses Dry Creek on Jasper Road which is a lower perennial riverine system with an unconsolidated bottom that is permanently flooded (R2UBH). Northwest of Dry Creek is a smaller Riverine System that is considered intermittent with a streambed and is seasonally flooded (R4SBC) across Jasper Road. Southwest of South Beale Road the Sewer Alignment crosses Best Slough (PFO/EM1C) which is a forested palustrine system and also persistent and emergent with vegetation and seasonally flooded. The alignment also crosses near the same location a riverine system considered an unknown perennial with an unconsolidated bottom

that is semi-permanently flooded. A description and specification of terms for the wetland assessment is provided below.

**Exhibit 1. National Wetland Inventory Map**

Source: USFWS, 2022 <https://www.fws.gov/wetlands/data/Mapper.html>

## **SYSTEM**

**Palustrine (P):** The Palustrine System includes all nontidal wetlands dominated by trees, shrubs, persistent emergents, emergent mosses or lichens, and all such wetlands that occur in tidal areas where salinity due to ocean-derived salts is below 0.5 ppt. It also includes wetlands lacking such vegetation, but with all of the following four characteristics: (1) area less than 8 ha (20 acres); (2) active wave-formed or bedrock shoreline features lacking; (3) water depth in the deepest part of basin less than 2.5 m (8.2 ft) at low water; and (4) salinity due to ocean-derived salts less than 0.5 ppt.

**Riverine (R):** The Riverine System includes all wetlands and deep-water habitats contained within a channel, with two exceptions: (1) wetlands dominated by trees, shrubs, persistent emergents, emergent mosses, or lichens, and (2) habitats with water containing ocean-derived salts of 0.5 ppt or greater. A channel is an open conduit either naturally or artificially created which periodically or continuously contains moving water, or which forms a connecting link between two bodies of standing water.

**Subsystem Lower Perennial (2):** This Subsystem is characterized by a low gradient. There is no tidal influence, and some water flows all year, except during years of extreme drought. The substrate consists mainly of sand and mud. Oxygen deficits may sometimes occur. The fauna is composed mostly of species that reach their maximum abundance in still water, and true planktonic organisms are common. The gradient is lower than that of the Upper Perennial Subsystem and the floodplain is well developed.

**Subsystem Intermittent (4):** This Subsystem includes channels that contain flowing water only part of the year. When the water is not flowing, it may remain in isolated pools or surface water may be absent.

**Subsystem Unknown Perennial (5):** This Subsystem designation was created specifically for use when the distinction between lower perennial, upper perennial, and tidal cannot be made from aerial photography and no data is available.

### **CLASS**

**Forested (FO):** Characterized by woody vegetation that is 6 m tall or taller.

**Subclass Broad-Leaved Deciduous (1):** Woody angiosperms (trees or shrubs) with relatively wide, flat leaves that are shed during the cold or dry season, e.g., black ash (*Fraxinus nigra*).

**Split Class Emergent (EM):** Characterized by erect, rooted, herbaceous hydrophytes, excluding mosses and lichens. This vegetation is present for most of the growing season in most years. These wetlands are usually dominated by perennial plants.

**Split Subclass Persistent (1):** Dominated by species that normally remain standing at least until the beginning of the next growing season. This subclass is found only in the Estuarine and Palustrine systems.

**Streambed (SB):** Includes all wetlands contained within the Intermittent Subsystem of the Riverine System and all channels of the Estuarine System or of the Tidal Subsystem of the Riverine System that are completely dewatered at low tide.

**Unconsolidated Bottom (UB):** Includes all wetlands and deep-water habitats with at least 25% cover of particles smaller than stones (less than 6-7 cm), and a vegetative cover less than 30%.

### **WATER REGIME**

**Seasonally Flooded (C):** Surface water is present for extended periods especially early in the growing season but is absent by the end of the growing season in most years. The water table after flooding ceases is variable, extending from saturated to the surface to a water table well below the ground surface.

**Semi-Permanently Flooded (F):** Surface water persists throughout the growing season in most years. When surface water is absent, the water table is usually at or very near the land surface.

**Permanently Flooded (H):** Water covers the substrate throughout the year in all years.

#### **4.2.3 Vegetation**

The ecoregion of the site is considered to be Central California Valley (USGS, 2016) which is characterized by flat, intensively farmed plains with long, hot, dry summers and mild winters. This distinguishes the ecoregion from its neighboring ecoregions that are either hilly or mountainous, covered with forest or shrub, and generally non-agricultural. This ecoregion includes the flat valley basins of deep sediments adjacent to the Sacramento and San Joaquin Rivers, as well as the fans and terraces around the edge of the valley. The two major rivers flow from opposite ends of the Central California Valley, entering into the Sacramento–San Joaquin River Delta and San Pablo Bay. The region once contained extensive prairies, oak savannas, desert grasslands in the south, riparian woodlands, freshwater marshes, and vernal pools. More than one-half of the region is now in cropland, about three-fourths of which is irrigated. Environmental concerns in the region include salinity due to evaporation of irrigation water, groundwater contamination from heavy use of agricultural chemicals, loss of wildlife and flora habitats, and urban sprawl.

The Sewer Alignment is located on the ecoregion called the Northern Terraces and occurs on gently sloping terraces and alluvial fans at the northern end and eastern side of the Sacramento Valley. It

contains mostly rolling grassland and generally has less agriculture than the alluvium and floodplain soils to the north. It also generally lacks oaks that are found upslope. Soil temperature regimes are thermic and soil moisture regimes are xeric. The vegetation of annual grasses and forbs is used mostly for dryland range and pasture. A few areas of blue oak woodlands occur, primarily at higher elevations. Some area additionally contain vernal pools and freshwater marshes that provide habitat for rare plants such as Mason's lilaeopsis, San Joaquin woollythreads and California hibiscus. Streams in the area mostly drain toward the Sacramento River with a few draining south to the lower San Joaquin River.

#### 4.2.4 Endangered Species

According to the IPaC resource database<sup>a</sup> under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction Ecological Services Field Office identified seven endangered or threatened species at the project site and are listed below (**Appendix A**). No critical habitat of endangered wildlife was identified in the vicinity of the Site. There are no refuge lands or fish hatcheries at the project site. Rivers and streams within the Grasshopper-Slough-Dry Creek and Best Slough-Bear River Watersheds do not have any identified critical habitats.

##### USDA Fish and Wildlife Service Threatened, Endangered, Proposed Species and USDA Forest

Category	Species Name	USFWS Status
Reptiles	Giant Garter Snake, <i>Thamnophis gigas</i>	Threatened
Amphibians	California red-legged frog, <i>Rana draytonii</i>	Threatened
Fishes	Delta Smelt, <i>Hypomesus transpacificus</i>	Threatened
Insects	Valley Elderberry Longhorn Beetle, <i>Desmocerus californicus dimorphus</i>	Threatened
Crustaceans	Vernal Pool Fairy Shrimp, <i>Branchinecta lynchi</i>	Threatened
	Vernal Pool Tadpole Shrimp, <i>Lepidurus packardii</i>	Endangered
	Conservancy Fairy Shrimp, <i>Branchinecta conservatio</i>	Endangered

**Notes:**

USFWS Endangered = Listed as Endangered under the Federal Endangered Species Act

USFWS Threatened = Listed as Threatened under the Federal Endangered Species Act

#### 4.3 Site Reconnaissance

Site reconnaissance was performed by ECM on May 25, 2021 and January 11, 2022. The May 25, 2021 site photograph log for the entire proposed Sewer Alignment beginning at Pump Station #1 and ending past Pump Station #3 (**Appendix C**). The January 11, 2022 site photograph log documents the Wheatland Wastewater Treatment Plant, the Pump Station #2 and Equipment storage area, and the pipeline along the north side of the drainage in the rice fields and almond groves (**Appendix C**). Site reconnaissance sheets for the sections of proposed sewer pipeline are provided in **Appendix D**. ECM was provided maps by Coastland Civil Engineering Inc. regarding the most up to date alignment of the pipeline. The site is generally accessible by vehicle and foot mostly on public roads, except for areas crossing undeveloped land or along the periphery of agricultural lands. **Figure 3** shows relevant site reconnaissance findings.

<sup>a</sup> IPaC database, U.S. Fish and Wildlife, California Ecological Services Field Office.

### Storm Water Management on Site

Beginning at Pump Station #1, there is a drainage ditch along the northwest side of the alignment and a detention pond to the southeast (**Figure 3**). A culvert flows beneath highway 65/D Street. Along 6<sup>th</sup> Street and Main Street the stormwater is managed by the City of Wheatland Stormwater system. The Agricultural field for Pump Station #2 has a large swale that drains north toward a small creek. Camp Beale highway is built of Grasshopper Slough which flows beneath the highway. Jasper Road is bridged over Dry Creek. In the northern portions of the alignment, canals for rice fields run parallel to the proposed alignment. On the northeast portion of the alignment the proposed pipeline crosses Best Slough and runs parallel to a drainage along Highway 65. Before the alignment crosses Rancho Road, on the northeast side of the railroad, is a culvert draining the wetland.

Grasshopper Slough was dry but was vegetated with wetland plants. Dry Creek contained water but did not have apparent substantial flow. Best Slough had very little water and appeared stagnant.

### Petroleum Storage or Disposal Features

At the Wheatland Wastewater Treatment Plant, several pieces of maintenance equipment are located within a shed area. No significant visible staining is observed where equipment is stored. An approximate 250-gallon tank of Gasoline is located in the center of the property. The tank appears in good condition with no visible staining beneath.

An abandoned truck is located west of the storage shed and workshop (**Figure 3**). The engine is mostly intact, and no staining or stressed vegetation was noted. In the paved area adjacent to and inside the workshop and storage shed, are cans and buckets of empty petroleum lubricants (some partly full of other substances). In the southeast corner of the site near the boundary, is a tar tank on a trailer with leaky compressor. Staining was observed beneath the compressor but is considered minor.

Petroleum pipelines cross the Sewer Alignment at the railroad tracks at an undetermined depth. Additionally, there is a pump station to the southwest of the Sewer Alignment near Camp Beale Highway. These pipelines and stations are currently active, but no staining or stressed vegetation was observed that would indicate a leak.

### Floor Drains and Sumps

Structures located on applicable parcels did not have any evidence of former or current interior drainage features. No floor drains or sumps were noted during site reconnaissance.

### Utility Connections

The portion of the Sewer Alignment in the City of Wheatland crosses several water pipelines that supply the adjacent residential community. In the eastern and northern portions of the site, the rural community gets their water from private wells as is observed at many of the private residences and within the agricultural fields. The City of Wheatland has water supplied by the Wheatland Water Department. Private residences appear to have filtration and storage systems beside the water wells. Agricultural field wells pour water onto open rice and almond fields.

The Wheatland Wastewater Treatment plant has two groundwater wells located onsite that appear to be used to aid in processing sewage. They are located on the eastern and western portions of the site. No information regarding the depth of these wells was located during research.

ECM noted a water spigot in front of the workshops in the eastern portion of the site along Jasper Road. The interior of the building did not have plumbing and the flooring was slab-on-grade and the water spigot was likely used to fill tanks for the agricultural fields or mixing with herbicides, pesticides, or fertilizer.

Power lines run along 6<sup>th</sup> Street and Main Street toward a large electrical substation on the northeast corner of the bend in 6<sup>th</sup> Street. Electrical lines also run north along Jasper Avenue. Many transformers were noted along these electrical pole runs due to residences nearby, but no staining was observed beneath the transformers. The area is supplied by Alliant Energy for electrical and gas.

Septic tanks and sewage leachate fields were not observed at the site but are assumed to be present at private residences in the rural areas of the site. The southern portion of the site is serviced by the City of Wheatland Public Works Department. Municipal systems cross the subject properties or run parallel to portions of the proposed Sewer Alignment.

#### Solid Waste, Physical Hazards, and Non-Scope Issues

Several burn areas were noted in the northwest portion of the Sewer Alignment within the agricultural fields where possibly brush was burned. No waste remnants were noted within the burn area or surroundings, which indicates that these are likely brush burn areas. Latent buried waste may be present on any property, particularly if efforts were undertaken to conceal this act. Indication of such activity may or may not be revealed in the records and observations during the Phase I ESA. Site reconnaissance did not indicate the presence of underground wastes at the time the site inspection was conducted.

Solid waste was noted in several areas including the private storage yard with plastic wastes and metal tanks (presumably old water heater tanks), and on the western side of Best Slough with tires, metal debris and old bicycles. Since the pipeline runs through agricultural fields, it should be assumed that the use of herbicides and pesticides are being used and may present a physical hazard to workers onsite.

#### Polychlorinated-Biphenyls

Polychlorinated biphenyls (PCBs), often found in electrical equipment such as transformers, ballasts in fluorescent lighting, circuit breakers and switch gears, and hydraulic fluids, contain toxic compounds which attach themselves to human fat tissue and may act as possible carcinogens if ingested. Many pole-mounted transformers were noted along the Sewer Alignment and during the site visit none had indications of staining or the release of potential PCB-containing fluids. No other potential PCB-containing equipment within the Sewer Alignment were observed during site reconnaissance.

#### Wetlands

Section 4.2.2 above details the wetlands listed in the NWI for the Sewer Alignment. The proposed Sewer Alignment crosses a palustrine wetland area that is forested with broad leaf deciduous trees and seasonally flooded on Camp Beale Highway. However, during site reconnaissance this area appeared dry. The alignment crosses Dry Creek on Jasper Road which is a lower perennial riverine system with an unconsolidated bottom that is permanently flooded. Dry Creek contained water with no apparent flow. Southwest of South Beale Road the Sewer Alignment crosses Best Slough which is a forested palustrine system and also persistent and emergent with vegetation and seasonally flooded. During Site reconnaissance the creek contained water with no apparent flow. The alignment also crosses near the same location a riverine system considered an unknown perennial with an unconsolidated bottom that is semi-permanently flooded. The USFWS NWI map is included in **Appendix A**.

#### Vegetation on Site

No stressed vegetation due to surface impacts was observed during site reconnaissance. During the May 2021 site reconnaissance, three burn areas were located, although it is suspected that only brush was burned at these locations which are within the orchards.

## 5 INTERVIEWS

The objective of interviews is to obtain information indicating RECs related to the subject property. To accomplish that objective, this portion of the report discusses interviews, email correspondence, and other forms of communication related to the subject property. Interviews are typically conducted with prior property owners or operators/workers at the site. ECM attempted to contact the owner or operators of the property of the proposed equipment storage yard with the two farm equipment warehouses on Jasper Lane. No operators or owners were available to answer questions. During the time of this Phase I ESA, former property owners of the public right-of-way could not be located or are deceased.

### Mr. Dale Kleven (Public Works Department)

ECM sent a site questionnaire to Wheatlands Public Works Department Director, Dale Kleven, who has specific knowledge about the project and site. Several attempts were made; however, no response was received.

## 6 DATA GAPS AND DEVIATIONS

During the course of research and drafting the Phase I ESA, ECM noted the following data gaps or deviations. Data gaps and deviations may result in not fully portraying all applicable RECs at the sites. Further research into the above defined data gaps and deviations may provide a refined REC determination if documentation is located or confirmed.

- A full chain-of-title research effort was not part of the scope of this Phase I ESA.
- Confirmation of chemicals in warehouses on Jasper Lane could not be confirmed through interview. However, it is offsite and not in the proposed Sewer Alignment.
- Communication with public works, who has intimate knowledge of the project, did not return the interview questionnaire.
- Private property owner information for the pipeline was not available during records research, therefore, interviews could not be conducted.
- No previously drafted Phase I/II ESAs were provided or found during records research.
- Separate reports for biological, cultural, archeological, and engineering assessments are being conducted synchronously with this Phase I ESA. No information regarding submittal or title of these reports has been provided.

## 7 FINDINGS AND CONCLUSIONS

### 7.1 Historical Recognized Environmental Conditions

A Historical Recognized Environmental Condition (HREC) refers to a past release that has been remediated to below “residential” standards and given regulatory closure with no use restrictions. HREC is defined by ASTM in the E1527-21 standard as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”

#### SM Damon Estate – 2493 Spenceville Road

According to the GeoTracker database (T0611500053), the closed Leaking Underground Storage Tank was associated with an active walnut farm. On December 17, 1991, a 3,000-gallon gasoline UST was removed from the Site. Approximately 650 to 700 cubic yards of surrounding soil was over-excavated and allowed to bioremediate onsite. The facility received a No Further Action determination from the Central Valley Regional Water Quality Control Board on December 23, 1996.

### 7.2 Controlled Recognized Environmental Conditions

Controlled Recognized Environmental Condition (CREC) concept was introduced to address contaminated sites that have received risk-based regulatory closure, where no further remediation is required but residual contamination still exists at a site and the property is subject to some sort of control or use restriction.

No CRECs were noted along the Sewer Alignment during the Phase I ESA.

### 7.3 Recognized Environmental Conditions

An REC is one of the terms used to identify environmental liability within the context of a Phase I Environmental Site Assessment. ASTM E1527-21 standard defines the recognized environmental condition as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.”

No RECs were found during records research within the Sewer Alignment.

### 7.4 *De Minimis* Conditions

*De minimis* conditions are defined by ASTM E1527-21 as environmental conditions that “generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.” The following details provide a summary of *de minimis* conditions on the acquisition parcels.

Along the Sewer Alignment in the City of Wheatland between D Street/Highway 65 and State Street is a vacant lot with several vehicles, a boat, and a recreation vehicle. The vehicles are intact and no staining or stressed vegetation was noted. A small shed is located on the property and may have lead-based paint or asbestos associated with its construction.

In the agricultural field where Pump Station #2 and Equipment Storage area is proposed, a demolished concrete foundation was observed with piping. However, no venting or petroleum tank apparatus were observed and the foundation is not believed to be petroleum related.

At the proposed equipment storage area on Jasper Lane, there are farm vehicles and equipment parked. The vehicles are intact and no staining or stressed vegetation was noted. The nearby farm

warehouses have multiple drums and tanks filled with fuels and other chemicals. Staining was noted but not in significant amounts.

## **7.5 Non-Scope and Other Considerations**

Non-scope considerations are items that do not fall under the purview of the Phase I ESA ASTM E1527-21 guidelines. The following presents parcel characteristics that may be non-scope items or should be otherwise considered. Latent buried waste may be present on any property, particularly if efforts were undertaken to conceal this act. Indication of such activity may or may not be revealed in the records and observations in the Phase I ESA. Site reconnaissance did not indicate the presence of underground wastes at the time the site inspection was conducted.

At the Wheatland Wastewater Treatment Plant, has open drums contained in an exterior hazardous waste concrete compound. It is unclear what the waste drum may contain, no leaks into surrounding concrete or soils were observed, and the concrete appears in good condition with no cracks or staining.

In two locations are underground Kinder-Morgan petroleum pipelines adjacent and parallel to the Union Pacific Railroad tracks. The pipeline is located on the east side of State Street and along the southern branch of the railroad south of the USAF antennae tower. No leaks or stressed vegetation was noted during site reconnaissance; however, the pressurized petroleum line is a fire and environmental hazard for any intrusive work that may be conducted in the area.

No other significant non-scope or other considerations were noted during the Phase I ESA.

## 8 CONCLUSIONS AND RECOMMENDATIONS

ECM has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 on the Wheatland Regional Wastewater Treatment Project Sewer Alignment in Wheatland, California. The Sewer Alignment is primarily in public right-of way. One HREC was identified and as of December 23, 1996, no further action was granted. No RECs or CRECs were noted along the Sewer Alignment. Potential lead-based paint or asbestos may be in shed along the Sewer Alignment and is considered *de minimis*. Non-scope considerations include the Sewer Alignment crossing two locations at the Union Pacific Railroad tracks which have a Kinder-Morgan Petroleum Pipeline and fiber optic lines buried parallel to the tracks. Based upon database research, site reconnaissance, and available information collected during the Phase I ESA, no further assessment or mitigation of features is warranted at this time along the proposed Sewer Alignment.

## **9 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS**

*We declare that to the best of my professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.*

If you have any questions or require further assistance, please contact ECM at your convenience.

Respectfully Submitted,

**ECM CONSULTANTS**

Chris Drabandt, P.G.  
Environmental Professional

### FISH AND WILDLIFE SERVICE

Sacramento Fish And Wildlife Office

Federal Building

2800 Cottage Way, Room W-2605

Sacramento, CA 95825-1846

Phone: (916) 414-6600 Fax: (916) 414-6713

In Reply Refer To:

August 04, 2021

Consultation Code: 08ESMF00-2021-SLI-2478

Event Code: 08ESMF00-2021-E-07132

Project Name: Wheatland Sewer Project

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

#### To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, under the jurisdiction of the U.S. Fish and Wildlife Service (Service) that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the Service under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Please follow the link below to see if your proposed project has the potential to affect other species or their habitats under the jurisdiction of the National Marine Fisheries Service:

[http://www.nwr.noaa.gov/protected\\_species/species\\_list/species\\_lists.html](http://www.nwr.noaa.gov/protected_species/species_list/species_lists.html)

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to

utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

<http://www.fws.gov/endangered/esa-library/pdf/TOC-GLOS.PDF>

Please be aware that bald and golden eagles are protected under the Bald and Golden Eagle Protection Act (16 U.S.C. 668 *et seq.*), and projects affecting these species may require development of an eagle conservation plan ([http://www.fws.gov/windenergy/eagle\\_guidance.html](http://www.fws.gov/windenergy/eagle_guidance.html)). Additionally, wind energy projects should follow the wind energy guidelines (<http://www.fws.gov/windenergy/>) for minimizing impacts to migratory birds and bats.

Guidance for minimizing impacts to migratory birds for projects including communications towers (e.g., cellular, digital television, radio, and emergency broadcast) can be found at:

<http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/towers.htm>;

<http://www.towerkill.com>; and

[www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/comtow.html](http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/comtow.html).

[http://](http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/comtow.html)

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

## Project Summary

Consultation Code: 08ESMF00-2021-SLI-2478

Event Code: 08ESMF00-2021-E-07132

Project Name: Wheatland Sewer Project

Project Type: DREDGE / EXCAVATION

Project Description: Pipeline connection between the City of Wheatland to the existing connection north of Camp Beale Road. Pipeline line will be above and below ground.

Project Location:

Approximate location of the project can be viewed in Google Maps: <https://www.google.com/maps/@39.0301113,-121.40866430580029,14z>

Counties: Yuba County, California

---

## Endangered Species Act Species

There is a total of 7 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries<sup>1</sup>, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

1. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

# Custom Soil Resource Report for **Yuba County, California**

## Wheatland Sewer Project

# Preface

---

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (<http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/>) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (<https://offices.sc.egov.usda.gov/locator/app?agency=nrcs>) or your NRCS State Soil Scientist ([http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2\\_053951](http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951)).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

## MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service

Web Soil Survey URL:

Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Yuba County, California

Survey Area Data: Version 14, Jun 4, 2020

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Dec 6, 2018—Jul 2, 2019

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

## Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI

## Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not

mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

## Yuba County, California

### 131—Hollenbeck silty clay loam, 0 to 1 percent slopes

#### Map Unit Setting

*National map unit symbol:* hg3g  
*Elevation:* 30 to 120 feet  
*Mean annual precipitation:* 18 to 20 inches  
*Mean annual air temperature:* 61 to 63 degrees F  
*Frost-free period:* 270 to 290 days  
*Farmland classification:* Prime farmland if irrigated

#### Map Unit Composition

*Hollenbeck, silty clay loam, and similar soils:* 85 percent  
*Minor components:* 15 percent  
*Estimates are based on observations, descriptions, and transects of the mapunit.*

#### Description of Hollenbeck, Silty Clay Loam

##### Setting

*Landform:* Basin floors  
*Landform position (two-dimensional):* Toeslope  
*Landform position (three-dimensional):* Tread  
*Down-slope shape:* Linear  
*Across-slope shape:* Linear  
*Parent material:* Clayey alluvium

##### Typical profile

*H1 - 0 to 8 inches:* silty clay loam  
*H2 - 8 to 43 inches:* silty clay  
*H3 - 43 to 47 inches:* clay loam

##### Properties and qualities

*Slope:* 0 to 1 percent  
*Depth to restrictive feature:* 39 to 65 inches to duripan  
*Drainage class:* Moderately well drained  
*Runoff class:* Very low  
*Capacity of the most limiting layer to transmit water (Ksat):* Moderately low to moderately high (0.06 to 0.20 in/hr)  
*Depth to water table:* More than 80 inches  
*Frequency of flooding:* Rare  
*Frequency of ponding:* None  
*Calcium carbonate, maximum content:* 5 percent  
*Maximum salinity:* Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)  
*Available water capacity:* Moderate (about 6.5 inches)

##### Interpretive groups

*Land capability classification (irrigated):* 2s  
*Land capability classification (nonirrigated):* 3s  
*Hydrologic Soil Group:* C  
*Hydric soil rating:* No

#### Minor Components

##### Kimball

*Percent of map unit:* 5 percent

**San joaquin**

*Percent of map unit: 5 percent*

**Capay**

*Percent of map unit: 5 percent*

*Landform: Basin floors*

*Hydric soil rating: Yes*

**141—Conejo loam, 0 to 1 percent slopes, MLRA 17**

**Map Unit Setting**

*National map unit symbol: 2xc97*

*Elevation: 30 to 140 feet*

*Mean annual precipitation: 20 to 28 inches*

*Mean annual air temperature: 62 to 62 degrees F*

*Frost-free period: 319 to 328 days*

*Farmland classification: Prime farmland if irrigated*

**Map Unit Composition**

*Conejo, loam, and similar soils: 80 percent*

*Minor components: 20 percent*

*Estimates are based on observations, descriptions, and transects of the mapunit.*

*Estimates are based on observations, descriptions, and transects of the mapunit.*

**Description of Conejo, Loam**

**Setting**

*Landform: Stream terraces*  
*Landform position (three-dimensional): Tread*  
*Down-slope shape: Linear*  
*Across-slope shape: Linear*  
*Parent material: Alluvium derived from igneous and metamorphic rock*

**Typical profile**

*Ap - 0 to 6 inches: loam*  
*Bw1 - 6 to 12 inches: clay loam*  
*Bw2 - 12 to 24 inches: clay loam*  
*Bw3 - 24 to 48 inches: loam*

## Custom Soil Resource Report

*Bw4 - 48 to 57 inches: loam*

*BC - 57 to 65 inches: loam*

### Properties and qualities

*Slope: 0 to 2 percent*

*Depth to restrictive feature: More than 80 inches*

*Drainage class: Well drained*

*Runoff class: Low*

*Capacity of the most limiting layer to transmit water (Ksat): Moderately high (0.20 to 0.64 in/hr)*

*Depth to water table: More than 80 inches*

*Frequency of flooding: OccasionalNone*

*Frequency of ponding: None*

*Maximum salinity: Nonsaline (0.2 to 0.5 mmhos/cm)*

*Available water capacity: High (about 10.8 inches)*

### Interpretive groups

*Land capability classification (irrigated): 2w*

*Land capability classification (nonirrigated): 3w*

*Hydrologic Soil Group: C*

*Hydric soil rating: No*

### Minor Components

#### Horst

*Percent of map unit: 5 percent*

*Hydric soil rating: No*

## 170—Horst silt loam, 0 to 2 percent slopes

### Map Unit Setting

*National map unit symbol: hg53*

*Elevation: 40 to 100 feet*

*Mean annual precipitation: 18 to 22 inches*

*Mean annual air temperature: 61 to 63 degrees F*

*Frost-free period: 270 to 290 days*

*Farmland classification: Prime farmland if irrigated*

### Map Unit Composition

*Horst, sandy loam, and similar soils: 85 percent*

*Minor components: 15 percent*

*Estimates are based on observations, descriptions, and transects of the mapunit.*

### Description of Horst, Sandy Loam

#### Setting

*Landform: Stream terraces*

*Landform position (two-dimensional): Toeslope*

*Landform position (three-dimensional): Tread*

*Down-slope shape: Linear*

*Across-slope shape: Linear*

## Custom Soil Resource Report

*Parent material:* Mixed alluvium

### Typical profile

*H1 - 0 to 26 inches:* silt loam

*H2 - 26 to 60 inches:* silt loam

*H3 - 60 to 70 inches:* loam

### Properties and qualities

*Slope:* 0 to 2 percent

*Depth to restrictive feature:* More than 80 inches

*Drainage class:* Well drained

*Runoff class:* Low

*Capacity of the most limiting layer to transmit water (Ksat):* Moderately high to high  
(0.57 to 1.98 in/hr)

*Depth to water table:* More than 80 inches

*Frequency of flooding:* Rare

*Frequency of ponding:* None

*Maximum salinity:* Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)

*Available water capacity:* High (about 10.8 inches)

### Interpretive groups

*Land capability classification (irrigated):* 1

*Land capability classification (nonirrigated):* 3c

*Hydrologic Soil Group:* B

*Hydric soil rating:* No

### Minor Components

#### Feather

*Percent of map unit:* 5 percent

*Hydric soil rating:* No

#### Conejo

*Percent of map unit:* 5 percent

*Hydric soil rating:* No

#### Columbia

*Percent of map unit:* 5 percent

*Landform:* Flood plains

*Hydric soil rating:* Yes

## 208—Redding gravelly loam, 0 to 8 percent slopes, MLRA 17

### Map Unit Setting

*National map unit symbol:* 2w8bl

*Elevation:* 20 to 420 feet

*Mean annual precipitation:* 19 to 28 inches

*Mean annual air temperature:* 61 to 63 degrees F

*Frost-free period:* 230 to 320 days

*Farmland classification:* Not prime farmland

### Map Unit Composition

*Redding and similar soils: 85 percent*

*Minor components: 15 percent*

*Estimates are based on observations, descriptions, and transects of the mapunit.*

### Description of Redding

#### Setting

*Landform: Fan remnants*

*Landform position (two-dimensional): Summit*

*Landform position (three-dimensional): Tread, riser*

*Down-slope shape: Linear*

*Across-slope shape: Linear*

*Parent material: Loamy alluvium derived from igneous, metamorphic and sedimentary rock over clayey alluvium derived from igneous, metamorphic and sedimentary rock over cemented alluvium derived from igneous, metamorphic and sedimentary rock*

#### Typical profile

*A1 - 0 to 8 inches: gravelly loam*

*A2 - 8 to 15 inches: gravelly loam*

*A3 - 15 to 19 inches: gravelly loam*

*Bt - 19 to 22 inches: clay*

*2Bqm1 - 22 to 24 inches: cemented gravelly material*

*2Bqm2 - 24 to 35 inches: cemented gravelly material*

#### Properties and qualities

*Slope: 0 to 8 percent*

*Depth to restrictive feature: More than 80 inches; 20 to 39 inches to duripan*

*Drainage class: Moderately well drained*

*Runoff class: Very high*

*Capacity of the most limiting layer to transmit water (Ksat): Very low (0.00 in/hr)*

*Depth to water table: About 15 to 39 inches*

*Frequency of flooding: None*

*Frequency of ponding: None*

*Maximum salinity: Nonsaline (0.2 to 0.5 mmhos/cm)*

*Sodium adsorption ratio, maximum: 2.0*

*Available water capacity: Very low (about 2.7 inches)*

#### Interpretive groups

*Land capability classification (irrigated): 4e*

*Land capability classification (nonirrigated): 4e*

*Hydrologic Soil Group: D*

*Ecological site: R015XD090CA - GRAVELLY LOAM*

*Hydric soil rating: No*

### Minor Components

#### Keyes

*Percent of map unit: 10 percent*

*Landform: Depressions*

*Hydric soil rating: No*

#### Corning

*Percent of map unit: 3 percent*

*Hydric soil rating: No*

**Unnamed, ponded**

*Percent of map unit:* 2 percent

*Landform:* Fan remnants

*Microfeatures of landform position:* Vernal pools

*Hydric soil rating:* Yes

**214—San Joaquin loam, 0 to 1 percent slopes**

**Map Unit Setting**

*National map unit symbol:* hg6j

*Elevation:* 60 to 130 feet

*Mean annual precipitation:* 18 to 22 inches

*Mean annual air temperature:* 61 to 63 degrees F

*Frost-free period:* 270 to 290 days

*Farmland classification:* Not prime farmland

**Map Unit Composition**

*San joaquin, loam, and similar soils:* 80 percent

*Minor components:* 20 percent

*Estimates are based on observations, descriptions, and transects of the mapunit.*

**Description of San Joaquin, Loam**

**Setting**

*Landform:* Fan terraces

*Landform position (two-dimensional):* Toeslope

*Landform position (three-dimensional):* Tread

*Down-slope shape:* Linear

*Across-slope shape:* Linear

*Parent material:* Mixed alluvium

**Typical profile**

*H1 - 0 to 16 inches:* loam

*H2 - 16 to 25 inches:* clay

*H4 - 25 to 35 inches:* duripan

**Properties and qualities**

*Slope:* 0 to 1 percent

*Depth to restrictive feature:* More than 80 inches; 20 to 40 inches to duripan

*Drainage class:* Moderately well drained

*Runoff class:* Very low

*Capacity of the most limiting layer to transmit water (Ksat):* Very low to moderately low (0.00 to 0.06 in/hr)

*Depth to water table:* More than 80 inches

*Frequency of flooding:* Rare

*Frequency of ponding:* None

*Calcium carbonate, maximum content:* 1 percent

*Available water capacity:* Very low (about 2.4 inches)

## Custom Soil Resource Report

### Interpretive groups

*Land capability classification (irrigated): 4s*

*Land capability classification (nonirrigated): 4s*

*Hydrologic Soil Group: D*

*Ecological site: R017XD079CA - CLAYPAN TERRACE*

*Hydric soil rating: No*

### Minor Components

#### Unnamed

*Percent of map unit: 5 percent*

*Landform: Depressions*

*Hydric soil rating: Yes*

#### Perkins

*Percent of map unit: 5 percent*

*Hydric soil rating: No*

#### Unnamed

*Percent of map unit: 5 percent*

*Hydric soil rating: No*

#### Redding

*Percent of map unit: 5 percent*

*Hydric soil rating: No*

# 5-021.61 SACRAMENTO VALLEY - SOUTH YUBA

## Basin Boundaries Description

2018 6.1.0.1

### Summary

The South Yuba Subbasin lies in the eastern central portion of the Sacramento Valley Groundwater Basin. It is bounded on the west by the Yuba-Sutter county line, on the north by the Yuba River. On the east the boundary is defined by the contact between alluvium within the subbasin, and volcanic bedrock outside the subbasin including Miocene-Pleistocene Volcanic Rocks (MPv) and Jurassic Volcanics (Jv). On the south the subbasin boundary is defined by the Yuba-Sutter and Yuba-Placer county lines and Dry Creek Mutual Water Company's southern boundary. The subbasin is defined by ten (10) segments detailed in the descriptions below.

### Segment Descriptions

This table describes each line segment composing the basin boundary polygon for this basin. It includes fields describing the segment label, segment type, segment description, and cited reference. For more information, email [sgmps@water.ca.gov](mailto:sgmps@water.ca.gov).

<u>Segment Label</u>	<u>Segment Type</u>	<u>Description</u>	<u>Ref</u>
1-2	I Stream	Begins at point (01) and follows the Yuba River to point (02).	{a}
2-3	E Stream	Continues from point (02) and follows the Yuba River to point (03).	{a}
3-4	E Alluvial	Continues from point (03) and follows the contact of the valley alluvial sediments with the consolidated rocks of the Sierra Nevada foothills to point (04).	{a}
4-5	I County	Continues from point (04) and follows the Yuba-Placer county line to point (05).	{b}
5-6	I Stream	Continues from point (05) and follows the Bear River to point (06).	{c}
6-7	I County	Continues from point (06) and follows the Yuba-Sutter county line to point (07).	{b}
7-8	I Water Agency	Continues from point (07) and follows the Dry Creek Mutual Water Company boundary to point (08).	{d}
8-9	I County	Continues from point (08) and follows Yuba-Sutter county line to point (09).	{b}
9-10	I	Continues from point (09) and follows the Dry Creek Mutual Water	{d}

<u>Segment Label</u>	<u>Segment Type</u>	<u>Description</u>	<u>Ref</u>
	Water Agency	Company boundary to point (10).	
10-1	<sup>l</sup> County	Continues from point (10) and follows the Yuba-Sutter county line to end at point (01).	{b}

# Significant Coordinates

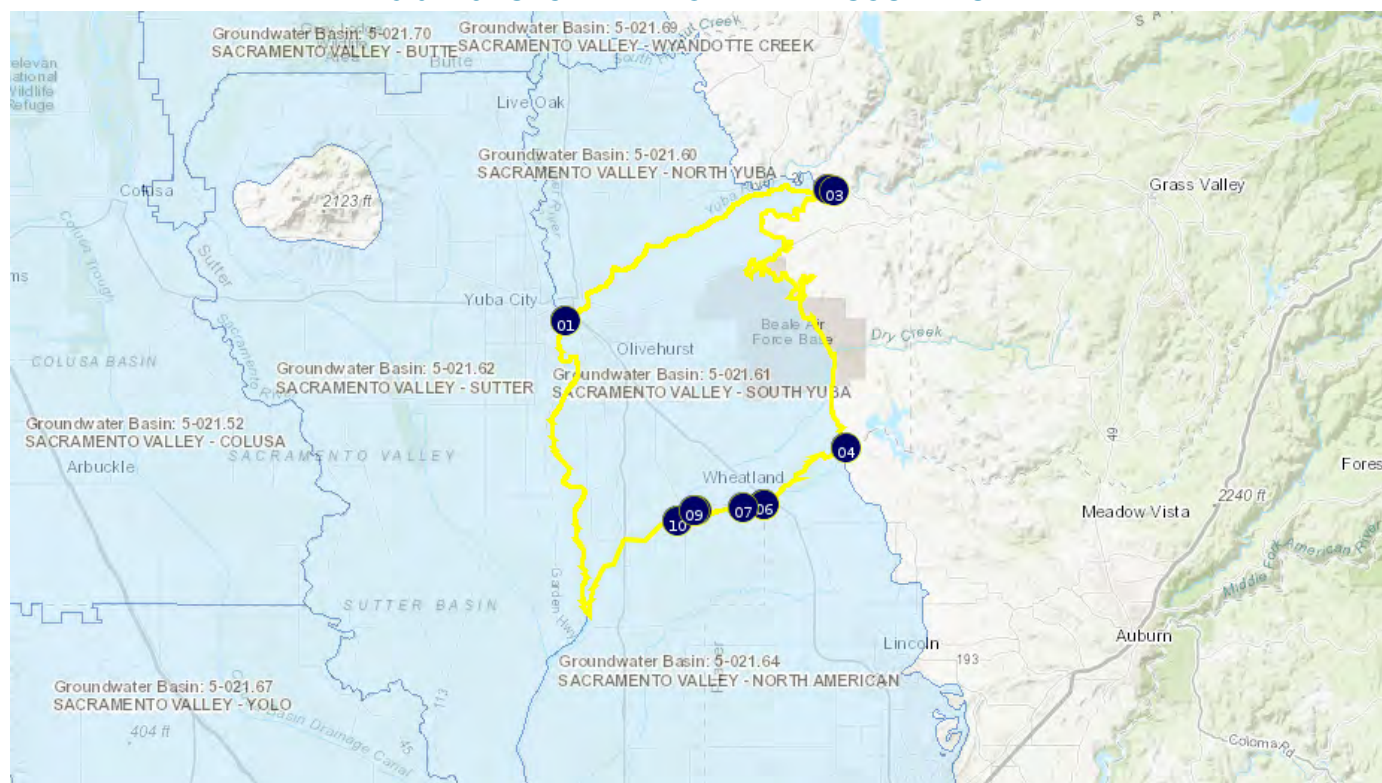

This table contains the latitudes and longitudes of all the beginning and ending points of each segment comprising the basin boundary polygon for this basin. For more information, email [sgmps@water.ca.gov](mailto:sgmps@water.ca.gov).

<b><u>Point</u></b>	<b><u>Latitude</u></b>	<b><u>Longitude</u></b>	
1	39.127605936	-121.597590859

##### Source Description

###### Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Reg Measure Type :	401 Certification
Reg Measure Title :	401 Cert for Wheatland City - Malone Avenue Culvert Replacement Project
Reg Measure Description :	The 0.02-acre Project consists of removing a failed culvert and relocating a sewer force main that runs over the culvert. The failed culvert is approximately 30 feet long, constructed of a metal plate arch supported by concrete spread footings, and has a four-foot radius half-round arch with a natural-bottom channel invert and concrete headwalls.

## Source Description

## Source Description :

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

#### Source Description

##### Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

## Source Description

## Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

## Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

**Violations**

Violation Date : 2014-08-28

Citation : 22 CCR 16 66266.130 - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.130

Description : Failure to properly handle, manage, label, and recycle used oil and fuel filters.

Notes : Returned to compliance on 09/08/2014. Container is not labeled.  
Division : Yuba County Environmental Health Department  
Program : HW  
Source : CERS

Violation Date : 2014-08-28

Citation : 22 CCR 16 66266.81(a)(1) - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.81(a)(1)

Description : Failure to meet hazardous waste requirements, as a generator, when handling, storing, and transporting more than 10 lead acid batteries at any one time.

Notes : Returned to compliance on 09/08/2014. Batteries are not labeled.  
Division : Yuba County Environmental Health Department  
Program : HW  
Source : CERS

Violation Date : 2014-08-28

Citation : 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Description : Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Notes : Returned to compliance on 09/08/2014. Used oil was not dated.  
Division : Yuba County Environmental Health Department  
Program : HW  
Source : CERS

#### Source Description

Source Description : The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

#### FRS (cont.)

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

#### Source Description

##### Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

##### Source Description

Source Description : The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.  
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

##### Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

##### Source Description

Source Description : The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.  
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

##### Source Description

###### Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

## Source Description

Source Description :

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

## FRS (cont.)

### Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

#### Source Description

##### Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

#### Source Description

##### Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

##### Source Description

##### Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

 Region : REGION 5S

##### Site History :

During UST removals in 1989, TPH-g as high as 3,457 mg/kg was detected in soil samples from the UST excavation. Throughout the 1990s, the lead agency at that time (Yuba County) requested a work plan to investigate the extent of the UST release. On 29 March 2013, the UST case was transferred to Regional Board staff for oversight. To date, the work plan has not been submitted.

RB Case Number : 580039  
 Potential Media Affected : Soil  
 Potential Contaminants of Concern : Gasoline  
 Local Agency : YUBA COUNTY  
 Local Case Number : N/R  
 Lead Agency : CENTRAL VALLEY RWQCB (REGION 5S)  
 File Location : N/R  
 CUF Case : NO  
 Caseworker : GKK  
 Case Type : LUST Cleanup Site  
 How Discovered : N/R  
 How Discovered Description : N/R  
 Stop Method : N/R

##### Source Description :

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

## Source Description

Source Description : The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

## Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

#### FRS (cont.)

##### Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

##### Site Details

Status Date : 2021-06-29  
 Status : Completed - Case Closed  
 Begin Date : 1986-12-30  
 Global ID : T0611500009  
 Region : REGION 5S

##### Site History :

The case was opened following an unauthorized release from an underground storage tank system at the subject site. From March to May 1999, Wilkey's Engineering removed two 6,000-gallon underground storage tanks (USTs), a previously unknown 550-gallon waste oil tank, and 200 cubic yards of impacted soil from beneath the USTs. Soil samples collected from below the USTs indicated that gasoline had leaked from the Site's refueling system and impacted the soil and groundwater. Apex installed and operated a dual phase extraction and pump and treat remediation system from September 2010 to July 2015 that removed and treated 42,900 pounds of petroleum vapors and 964,000 gallons of impacted groundwater. The treatment system and natural degradation have decreased the petroleum impacts significantly, based on current groundwater sample data. The remaining impacts are expected to degrade without migrating beyond the current limits and are a low-threat to human health and the environment. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

## Violations

**Violation Date :** 2016-08-10

**Citation :** HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

**Description :** Failure to maintain a complete copy of the SPCC Plan at the facility if the facility is normally attended at least four hours per day, or at the nearest field office if the facility is not so attended.

**Notes :** Current copy is not available.  
**Division :** Yuba County Environmental Health Department  
**Program :** APSA  
**Source :** CERS

**Violation Date :** 2013-07-15

**Citation :** 22 CCR 16 66266.130 - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.130

**Description :** Failure to properly handle, manage, label, and recycle used oil and fuel filters.

#### Source Description

##### Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

#### Source Description

##### Source Description :

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

##### Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

### Source Description

#### Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

##### Source Description

###### Source Description :

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

###### Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Most Recent Contact: 11/30/2021

PERCHLORATE 2 - CA: Listing of contaminated sites where the primary known chemical is perchlorate

Agency Version Date: 12/21/2021  
Agency Update Frequency: Quarterly  
Planned Next Contact: 03/18/2022

Agency: Department of Toxic Substances Control  
Agency Contact: 916-322-2861  
Most Recent Contact: 12/21/2021

PFAS - CA: List of PFAS sites and areas of interest

Agency Version Date: 10/12/2021  
Agency Update Frequency: Quarterly  
Planned Next Contact: 04/05/2022

Agency: California State Water Resources Control Board  
Agency Contact: N/R  
Most Recent Contact: 01/07/2022

PFAS DOD - CA: List of DoD facilities conducting PFAS investigations

Agency Version Date: 01/07/2022  
Agency Update Frequency: Quarterly  
Planned Next Contact: 04/05/2022

Agency: California State Water Resources Control Board  
Agency Contact: N/R  
Most Recent Contact: 01/07/2022

PFAS GAMA - CA: PFOS & PFAS GAMA Well Sampling program

Agency Version Date: 01/03/2022  
Agency Update Frequency: Quarterly  
Planned Next Contact: 04/01/2022

Agency: California State Water Resources Control Board  
Agency Contact: N/R  
Most Recent Contact: 01/03/2022

PROPOSITION 65 - CA: Listing of Proposition 65 enforcement reporting notice sites in accordance with "The Safe Drinking Water and Toxic Enforcement Act of 1986"

Agency Version Date: 06/11/2021  
Agency Update Frequency: No update  
Planned Next Contact: 03/01/2022

Agency: State of California Department of Justice Office of the Attorney General  
Agency Contact: 510-873-6321  
Most Recent Contact: 12/03/2021

RFR - CA: State Water Resources Control Board Regulated Facility Report database listing which includes program agency type and their permit status

Agency Version Date: 12/07/2021  
Agency Update Frequency: Varies  
Planned Next Contact: 03/03/2022

Agency: CA State Water Resources Control Board  
Agency Contact: 916-341-5810  
Most Recent Contact: 12/07/2021

SITES INVENTORY\_VENTURA COUNTY - CA: Listing of Ventura County inventory of closed illegal abandoned and inactive sites

Agency Version Date: 05/14/2021  
Agency Update Frequency: Annually  
Planned Next Contact: 02/01/2022

Agency: Environmental Health Division  
Agency Contact: 805-654-2815  
Most Recent Contact: 11/05/2021

**OTHER ASCERTAINABLE RECORDS (cont.)**

SMU\_SANTA BARBARA COUNTY - CA: Site Mitigation Unit site assessment and corrective actions at properties in Santa Barbara County

Agency Version Date: 12/31/2021  
Agency Update Frequency: Varies  
Planned Next Contact: 03/29/2022

Agency: Santa Barbara County APCD  
Agency Contact: (805) 681-4900  
Most Recent Contact: 12/31/2021

SWAT - CA: The SWAT Reports Summary Data and the Waste Management Unit Database were published by State Water Resources Control Board staff and the Regional Water Quality Control Boards for tracking and inventory of waste management units.

Agency Version Date: 08/08/2015  
Agency Update Frequency: No Longer Maintained  
Planned Next Contact: 02/17/2022

Agency: Department of Ecology  
Agency Contact: 916-322-2861  
Most Recent Contact: 11/23/2021

VCCP\_VENTURA COUNTY - CA: Listing of Ventura County cleanup program sites

Agency Version Date: 11/04/2021  
Agency Update Frequency: Annually  
Planned Next Contact: 01/31/2022

Agency: Environmental Health Division  
Agency Contact: 805-654-2815  
Most Recent Contact: 11/04/2021

WDS - CA: Listing of waste discharge system reporting facilities

Agency Version Date: 01/18/2022  
Agency Update Frequency: Quarterly  
Planned Next Contact: 04/15/2022

Agency: State Water Resources Control Board  
Agency Contact: 916-341-5810  
Most Recent Contact: 01/18/2022

WILDLANDS - CA: The Wildlands Conservancy listing of preserves in California

Agency Version Date: 11/18/2021  
Agency Update Frequency: Varies  
Planned Next Contact: 02/14/2022

Agency: The Wildlands Conservancy  
Agency Contact: 909-797-8507  
Most Recent Contact: 11/18/2021

WIP - CA: Listing of Well Investigation Program cases in the San Gabriel and San Fernando Valley area

Agency Version Date: 07/01/2009  
Agency Update Frequency: Varies  
Planned Next Contact: 02/08/2022

Agency: Los Angeles Water Quality Control Board  
Agency Contact: 916-341-5810  
Most Recent Contact: 11/12/2021

**OTHER**

SEISMIC - CA: Earthquake Zones of Required Investigation. Shows the location of both Seismic Hazard Zones and Earthquake Fault Zones

Agency Version Date: 04/30/2021  
Agency Update Frequency: Varies  
Planned Next Contact: 04/15/2022

#### Violation Details

RTC Enforcement ID : 0399999  
Violation ID : 95V0001  
Submission Year : 2021  
Violation First Reported Date : 1995-12-12  
Contaminant Name : Lead and Copper Rule  
Rule Family : Lead and Copper Rule  
Rule Group : Chemicals  
Rule Name : Lead and Copper Rule  
Violation Type : Initial Tap Sampling for Pb and Cu  
Is Health Based : N  
Is Major Violation : N/R  
Severity Indicator Count : N/R  
Public Notification Tier : 3  
Address Line 1 : 111 C Street, WHEATLAND, 95692  
Address Line 2 : N/R  
Compliance Status : Returned to Compliance  
RTC Date : 2003-12-31  
Enforcement Action Description : Federal Compliance achieved  
Admin Name : KLEVER, DALE  
Email Address : dklever@wheatland.ca.gov

RTC Enforcement ID : 9821015  
Violation ID : 9721003  
Submission Year : 2021  
Violation First Reported Date : 2007-05-17  
Contaminant Name : Coliform (TCR)  
Rule Family : Total Coliform Rules  
Rule Group : Microbials  
Rule Name : Total Coliform Rule  
Violation Type : Maximum Contaminant Level Violation, Monthly (TCR)  
Is Health Based : Y  
Is Major Violation : N/R

## RADON DATA:

STATE SOURCE: CA

Radon Test Results:

<u>Zip:</u>	<u>Total Sites:</u>	<u>Cnt &gt;=4 pCi/L:</u>	<u>Pct &gt;= 4 pCi/L:</u>	<u>Max Result (pCi/L):</u>
95692	3	1	33.333	8.3

FEDERAL AREA RADON INFORMATION FOR: 95692

NUMBER OF SAMPLE SITES: 2

<u>Area:</u>	<u>Average Activity:</u>	<u>% &lt;4 pCi/L:</u>	<u>% 4-20 pCi/L:</u>	<u>% &gt;20 pCi/L:</u>
first floor	4.7 pCi/L	50%	50%	0%

FEDERAL EPA RADON ZONE FOR YUBA COUNTY: Zone = 2

Note: Zone 1 indoor average level > 4 pCi/L

: Zone 2 indoor average level > = 2 pCi/L and <= 4 pCi/L

: Zone 3 indoor average < 2 pCi/L

## HIST PWS ENF

Historical Public Water Supply locations with Enforcement Violations

Environmental Protection Agency

(800) 426-4791

List of Safe Drinking Water Information Systems (SDWIS) with enforcement violations that are no longer in current agency list.

## NWIS

National Water Information Systems

United States Geological Society

(703) 648-5953

Information on all water resources for the United States. This database contains all current and historical data for the nation.

## PWS

Public Water Supply

Environmental Protection Agency

(800) 426-4791

Safe drinking water information Systems

## PWS ENF

Public Water Supply locations with Enforcement Violations

Environmental Protection Agency

(800) 426-4791

Safe drinking water information Systems with enforcement violations

## WELLS - GAMA - CA

California Groundwater Ambient Monitoring Assessment

State Water Resources Control Board

916-341-5791

Brings together datasets from California state agencies including: Public Health Water Resources and Pesticide Regulation as well as from the US Geological Survey Lawrence Livermore National Laboratory and the Water Boards. It shows results for untreated raw water in different types of wells for naturally-occurring and man-made chemicals.

## FLOOD Q3

Flood data

Environmental Protection Agency

(202) 566-1667

Q3 Flood Data

## HYDROLOGIC UNIT

Hydrologic Unit Maps

USGS

The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

## WETLANDS NWI

National Wetland Inventory  
U.S. Fish and Wildlife Service  
(703) 358-2171  
Wetland Inventory for the United States

## USGS GEOLOGIC AGE

USGS Digital Data Series DDS  
Natural Resources Conservation Service: U.S. Department of Agriculture  
(202) 690-4985  
USGS Digital Data Series DDS: Geologic Age and Rock Stratigraphic Unit

## DAMS - CA

California Dam Inundation Maps  
Department of Water Resources  
916-845-8275  
Dam inundation maps show the maximum extent of damage of a flood wave from a dam failure

## OIL & GAS WELLS - CA

Oil and Gas Well Data  
State of California Department of Conservation  
916-327-1042  
Oil and gas well locations and detail for all 6 districts

## RADON

National Radon Database  
U.S. Environmental Protection Agency  
215-814-2469  
A study of the EPA/State Residential Radon Survey and the National Residential Radon Survey.

## RADON - CA

Radon tested locations in California  
California Department of Health Services  
(916) 449-5674  
A table of long term and short term indoor radon measurements

## RADON EPA

RADON EPA  
U.S. Environmental Protection Agency  
215-814-2469  
EPA list of Radon zones

## AIRPORT FACILITIES

Airport landing facilities  
Federal Aviation Administration  
(866) 835-5322  
Airport landing facilities

## BASINS

Better Assessment Science Integrating point & Non-point Sources  
U.S. Environmental Protection Agency  
855-246-3642  
Integrated geographical information system national watershed data and environmental assessment known as Better Assessment Science Integrating point & Non-point Sources

## DIGITAL OBSTACLE

Obstacles of interest to aviation users

Federal Aviation Administration

855-379-6518

The Digital Obstacle File describes all known obstacles of interest to aviation users in the U.S. with limited coverage of the Pacific the Caribbean Canada and Mexico. The obstacles are assigned unique numerical identifiers; accuracy codes and listed in order of ascending latitude within each state or area by FAA Region.

## EPICENTERS

National Geographical Data Center

National Geographical Data Center

303-497-6826

List of recent and historic earthquakes and information.

## FLOOD DFIRM

National Flood Hazard Layer Database

Federal Emergency Management Agency

The National Flood Hazard Layer Database (NFHL) is a computer database that contains the flood hazard map information from FEMA's Flood Map Modernization program. These map data are from Digital Flood Insurance Rate Map (DFIRM) databases and Letters of Map Revision.

[www.envirositecorp.com](http://www.envirositecorp.com)

Envirosite's Historical Topographic Map Report is designed to assist in evaluating a subject property resulting from past activities. EnviroSite's Historical Topographic Map Report includes a search of USGS historical topographic maps, dating back to the early 1900s.

## TOPOGRAPHIC MAPS FOUND:

	<u>Map Name:</u>	<u>Year:</u>	<u>Revision Year:</u>	<u>Scale:</u>
1.	<u>Wheatland</u>	1910	N/R	1 : 31680
2.	<u>Wheatland</u>	1947	1973	1 : 24000
3.	<u>Wheatland</u>	1947	N/R	1 : 24000
4.	<u>Wheatland</u>	1949	N/R	1 : 24000
5.	<u>Wheatland</u>	1949	N/R	1 : 62500
6.	<u>Wheatland</u>	2012	N/R	1 : 24000
7.	<u>Wheatland</u>	2015	N/R	1 : 24000
8.	<u>Wheatland</u>	2018	N/R	1 : 24000

The USGS 7.5 minute series includes scales 1:24,000 / 1:25,000 / 1:31,680. The USGS 15 minute series includes scales 1:48,000 / 1:62,500 / 1:63,360. The USGS 30x60 minute series scale is 1:100,000.

# HIG Research Summary

## Site Location

Wheatland EIR  
6th Street  
Wheatland, CA

## Requested by

Envirosite Corporation  
2 Corporate Drive  
Shelton, CT

## HIG Project #

2050721

## Client Project #

54673

## Date Created

05/07/2021

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

## City Directory Pages/Abstracts

**Research Methodology:** A search was conducted for city directories that include coverage of the site area using HIG's City Directory Collection and other sources, if needed. Directories for the following years were identified for the site area. A comma between date ranges indicates a gap of 10 years or more in available city directories:

*Marysville-Yuba City; (1923-1993)*

*North Sacramento Valley; (1985-2019)*

The above listed directories were reviewed at approximate 5 year intervals to determine if the street(s) specified in the order were included in the directories and had listings for the site area. HIG attempted to identify former street names and aliases and if identified, these were also included in the review.

**Research Results:** City directory information, when provided, was used to create a multi-page file(s) named CD- followed by the street name. When City Directory Pages are provided, the publication name and date are shown at the top of each page. When a City Directory abstract is provided, the first page of the abstract includes the relevant publication information. The years of coverage identified for each street and any identified historical street names are as follows:

*6th Street: (1964-2019)*

*Camp Beale HWY / Spenceville Road: (1985-2019)*

## FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIMs), real estate atlases and similar maps for the site location and adjoining properties. These maps were used to create a multi-page file named FIM+Maps. The maps have title blocks that include the map publisher, year the map was created and, if applicable, the year the map was last updated. The years provided are:

*1890, 1899, 1909, 1928, 1931*

## Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the "Site Specific HIG Data") contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

## HIG Copyright Notice

This Research Summary and the selection, arrangement and compilation of Site Specific HIG Data are the property of Historical Information Gatherers. © Copyright 2021 by Historical Information Gatherers, Inc. All rights reserved. The person or entity that ordered and paid for the Site Specific HIG Data is granted a personal, non-assignable, limited license to reproduce the Site Specific HIG Data solely for purposes of providing supporting documentation for reports produced for the site location which is noted on page one of this Research Summary. Any other reproduction or other use of the Site Specific HIG Data in any media or format, in whole or in part, is expressly prohibited without prior written permission from Historical Information Gatherers, and the person or entity that ordered and paid for the Site Specific HIG Data assumes all liability for the making of any such reproductions.

## Licensing Agreement

The licensing agreement between Historical Information Gatherers and infoGroup provides that Historical Information Gatherers may create photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright. The licensing agreement also permits the person or entity that ordered and paid for the Site Specific HIG Data to include photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright as supporting documents for reports produced for the site which is the subject of the Site Specific HIG Data.

---

HIG has produced a city directory abstract for one or more streets associated with the site location indicated above. The publications used to create the CD Abstract are listed below.

---

The information below is taken directly from the city directory books. The following are definitions as they are found in the Haines books:

XXXX = is no phone, no people or non-published phone.

600 XXXX = Correct address only. No other information.

X Streetname = intersecting cross street

---

HIG has produced a city directory abstract for one or more streets associated with the site location indicated above. The publications used to create the CD Abstract are listed below.

---

The information below is taken directly from the city directory books. The following are definitions as they are found in the Haines books:

XXXX = is no phone, no people or non-published phone.

600 XXXX = Correct address only. No other information.

X Streetname = intersecting cross street

**Publication year, publisher and title**

# HIG Research Summary

## Site Location

Wheatland EIR  
6th Street  
Wheatland, CA

## Requested by

Envirosite Corporation  
2 Corporate Drive  
Shelton, CT

## HIG Project #

2050721

## Client Project #

54673

## Date Created

05/07/2021

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

## City Directory Pages/Abstracts

**Research Methodology:** A search was conducted for city directories that include coverage of the site area using HIG's City Directory Collection and other sources, if needed. Directories for the following years were identified for the site area. A comma between date ranges indicates a gap of 10 years or more in available city directories:

*Marysville-YubaCity; (1923-1993)*

*NorthSacramentoValley; (1985-2019)*

The above listed directories were reviewed at approximate 5 year intervals to determine if the street(s) specified in the order were included in the directories and had listings for the site area. HIG attempted to identify former street names and aliases and if identified, these were also included in the review.

**Research Results:** City directory information, when provided, was used to create a multi-page file(s) named CD- followed by the street name. When City Directory Pages are provided, the publication name and date are shown at the top of each page. When a City Directory abstract is provided, the first page of the abstract includes the relevant publication information. The years of coverage identified for each street and any identified historical street names are as follows:

*6th Street: (1964-2019)*

*Camp Beale HWY / Spenceville Road: (1985-2019)*

## FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIMs), real estate atlases and similar maps for the site location and adjoining properties. These maps were used to create a multi-page file named FIM+Maps. The maps have title blocks that include the map publisher, year the map was created and, if applicable, the year the map was last updated. The years provided are:

*1890, 1899, 1909, 1928, 1931*

## Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the "Site Specific HIG Data") contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

## HIG Copyright Notice

This Research Summary and the selection, arrangement and compilation of Site Specific HIG Data are the property of Historical Information Gatherers. © Copyright 2021 by Historical Information Gatherers, Inc. All rights reserved. The person or entity that ordered and paid for the Site Specific HIG Data is granted a personal, non-assignable, limited license to reproduce the Site Specific HIG Data solely for purposes of providing supporting documentation for reports produced for the site location which is noted on page one of this Research Summary. Any other reproduction or other use of the Site Specific HIG Data in any media or format, in whole or in part, is expressly prohibited without prior written permission from Historical Information Gatherers, and the person or entity that ordered and paid for the Site Specific HIG Data assumes all liability for the making of any such reproductions.

## Licensing Agreement

The licensing agreement between Historical Information Gatherers and infoGroup provides that Historical Information Gatherers may create photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright. The licensing agreement also permits the person or entity that ordered and paid for the Site Specific HIG Data to include photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright as supporting documents for reports produced for the site which is the subject of the Site Specific HIG Data.

HIG has produced a city directory abstract for one or more streets associated with the site location indicated above. The publications used to create the CD Abstract are listed below.

---

The information below is taken directly from the city directory books. The following are definitions as they are found in the Haines books:

XXXX = is no phone, no people or non-published phone.

600 XXXX = Correct address only. No other information.

X Streetname = intersecting cross street

**Publication year, publisher and title**

2019 Haines North Sacramento Valley

2011 Haines North Sacramento Valley

2006 Haines North Sacramento Valley

2001-02 Haines North Sacramento Valley

1995-96 Haines North Sacramento Valley

1990 Haines North Sacramento Valley

1985 Haines North Sacramento Valley

Shelton, CT

---

HIG has produced a city directory abstract for one or more streets associated with the site location indicated above. The publications used to create the CD Abstract are listed below.

---

The information below is taken directly from the city directory books. The following are definitions as they are found in the Haines books:

XXXX = is no phone, no people or non-published phone.

600 XXXX = Correct address only. No other information.

X Streetname = intersecting cross street

**Publication year, publisher and title**

## **APPENDIX C**

### **SITE RECONNAISSANCE PHOTOGRAPH LOG**

## WHEATLAND SEWER PHASE I ESA

Date: May 25, 2021

Photo 1 – View to the northwest of the sewer Pump Station #1 beside Malone Street. Equipment was running and operational.

Photo 2 – View to the southeast, Sewer lid and culvert in drainage. Equipment pad seen in background.

Photo 3 – Emergency diesel fuel tank (250 gallons). No staining or stressed vegetation.

Photo 4 – View to the east of gate into the former sawmill.

Photo 5 – View to the north of the detention basin near Pump Station #1.

Photo 6 – View to the north of the bend in the sewer alignment at the drainage culvert beneath State Highway 65.

WHEATLAND SEWER PHASE I ESA	Date: May 25, 2021
 <p data-bbox="212 617 799 667">Photo 7 – Manhole lid and footing with old access lid on top north of detention pond.</p>	 <p data-bbox="873 617 1404 667">Photo 8 – View to the northeast of section of State Highway 65 where sewer alignment passes.</p>
 <p data-bbox="212 1167 799 1218">Photo 9 – View to the northeast of the old, dilapidated storage shed in the way of the sewer alignment.</p>	 <p data-bbox="873 1167 1404 1192">Photo 10 –View to the west of the dilapidated shed.</p>
 <p data-bbox="212 1717 799 1768">Photo 11 – View to the south abandoned boat and recreational trailer.</p>	 <p data-bbox="873 1717 1404 1768">Photo 12 – View to the east of several intact abandoned cars. No staining or stressed vegetation was observed.</p>

## WHEATLAND SEWER PHASE I ESA

Date: May 25, 2021

Photo 13 – View to the northwest of the two 90-degree bends in the pipeline along State Street. Union Pacific Railroad in right hand portion of photo.

Photo 14 – View to the northeast of the petroleum pipeline parallel with the railroad tracks. Sewer alignment crosses the petroleum pipeline.

Photo 15 – View to the northeast over the Union Pacific Railroad tracks of 6<sup>th</sup> Street.

Photo 16 – View to the northwest of the back of Big Al's Market.

Photo 17 – View to the northeast along 6<sup>th</sup> street

Photo 18 – View to the northeast along 6<sup>th</sup> street. Multiple pole-mounted transformers are located along the street.

## WHEATLAND SEWER PHASE I ESA

Date: May 25, 2021

Photo 19 – View to the northeast showing high voltage power lines and the electrical substation at the sewer alignment bend to the northwest.

Photo 20 – View to the northeast of the electrical substation. The plaque in front denotes the Wheatland Hop Riot of August 3, 1913.

Photo 21 – View to the northwest of the sewer alignment along 6<sup>th</sup> street to the east of a park.

Photo 22 – View to the west of a possible well and fire hydrant at the park near the alignment.

Photo 23 – View to the north of turn in sewer alignment to the north-northeast onto Main Street.

Photo 24 – View to the west of the Wheatland School District Office Building on Main Street.

## WHEATLAND SEWER PHASE I ESA

Date: May 25, 2021

Photo 25 – View to the northeast of the bend in the sewer alignment onto Spenceville Road. One of many pole-mounted transformers is observed in the photo.

Photo 26 – View to the east of the corner of Spenceville Road and Main Street with another pole-mounted transformer. Plaque beneath the tree notes the Camp Far West U.S. Army Outpost.

Photo 27 – View to the east on the southern corner of Main Street and Spenceville Road. Several natural gas pipeline utility boxes were observed.

Photo 28 – View to the east on Spenceville Road along the sewer alignment.

Photo 29 – View to the north of residences on the north side of Spenceville Road (Here Camp Beale Highway).

Photo 30 – View to the southwest of the bend in Camp Beale Highway east of the residential area.

## WHEATLAND SEWER PHASE I ESA

Date: May 25, 2021

Photo 31 – View to the south of the identified wetland area in Grasshopper Slough south of Camp Beale Highway.

Photo 32 – View to the southwest of Camp Beale Highway along the sewer alignment. Ranches

Photo 33 – View to the southeast of adjacent property agricultural land.

Photo 34 – View to the north of the bend in the pipeline from Camp Beale Highway to Jasper Lane. A residence is in the background..

Photo 35 – View to the northwest of the Jasper Lane alignment. One of many pole-mounted transformers along Jasper Lane.

Photo 36 – View to the northeast of private well, northeast of Jasper Lane.

WHEATLAND SEWER PHASE I ESA	Date: May 25, 2021
 <p data-bbox="233 611 779 667">Photo 37 – View to the west of pole-mounted transformers on the southwest side of Jasper Lane.</p>	 <p data-bbox="883 611 1388 667">Photo 38 – View to the northeast of private well, northeast of Jasper Lane.</p>
 <p data-bbox="233 1129 779 1157">Photo 39 – View to the west of an almond orchard.</p>	 <p data-bbox="846 1129 1425 1157">Photo 40 – View to the east of plowed agricultural field.</p>
 <p data-bbox="233 1648 779 1705">Photo 41 – View to the northwest of the Jasper Lane sewer alignment.</p>	 <p data-bbox="883 1648 1388 1705">Photo 42 – View to the northeast of private well, northeast of Jasper Lane.</p>

## WHEATLAND SEWER PHASE I ESA

Date: May 25, 2021

Photo 43 – View to the southwest of Jasper Lane showing a pump station for the adjacent Dry Creek.

Photo 44 – View to the Southwest of an access road and pipeline connecting the pump to Dry Creek.

Photo 45 – View to the west of Dry Creek.

Photo 46 – View to the west of a storage yard near Dry Creek. Debris was noted in the fenced area but nothing appeared to be stained or have stressed vegetation.

Photo 47 – View to the west of a water tank on the fenced storage yard.

Photo 48 – View to the north of the bridge over Dry Creek.

## WHEATLAND SEWER PHASE I ESA

Date: May 25, 2021

Photo 49 – View to the northeast of private well and propane tank, northeast of Jasper Lane.

Photo 50 – View to the northwest of farm buildings housing chemicals, equipment, and petroleum products.

Photo 51 – View to the south between buildings is a water hose bib.

Photo 52 – View to the west behind northern building are petroleum tanks and drums.

Photo 53 – View to the north of elevated diesel and unleaded gasoline tanks. Minor staining beneath tanks.

Photo 54 – View to the west of the proposed equipment storage area. The current use of the site is agricultural equipment storage.

WHEATLAND SEWER PHASE I ESA		Date: May 25, 2021
		
Photo 55 – View to the east of multiple transformers beside Jasper Lane.	Photo 56 – View to the northwest of Jasper lane along sewer alignment.	
		
Photo 57 – View to the west of a water well used for flooding rice fields to the west of Jasper Lane.	Photo 58 – View to the east of Jasper Lane of young almond tree plantings.	
		
Photo 59 – View to the west of growing rice fields flooded by water.	Photo 60 – View to the northwest on Jasper Lane of the 90-degree turn onto the access road and canals beside the southwest rice fields..	

## WHEATLAND SEWER PHASE I ESA

Date: May 25, 2021

Photo 61 – View to the southwest of water wells and pumps and canals beside rice fields.

Photo 62 – View to the south of pump for moving water into rice fields.

Photo 63 – View to the northeast of the water canals north of the rice fields along the sewer alignment.

Photo 64 – View to the northeast of the water canals to the west and north of the rice fields along the sewer alignment.

Photo 65 – View to the west of almond orchards to the south and regraded open fields to the north along sewer alignment.

Photo 66 – View to the west along sewer alignment dirt road beside orchard.

WHEATLAND SEWER PHASE I ESA	Date: May 25, 2021
 <p>Photo 67 – View to the south of irrigation well connected to electrical lines.</p>	 <p>Photo 68 – View to the north of electrical lines and irrigation well.</p>
 <p>Photo 69 – View to the west along sewer alignment dirt road beside orchard further west.</p>	 <p>Photo 70 – View to the west at bend of sewer alignment directing pipeline into almond orchard.</p>
 <p>Photo 71 – View to the south along sewer alignment in almond orchard.</p>	 <p>Photo 72 – View to the east of burn area for trimmings of trees.</p>

WHEATLAND SEWER PHASE I ESA		Date: May 25, 2021
		
Photo 73 – View to the southwest of the bend in the sewer alignment to the south.	Photo 74 – View to the south of the bend in the sewer alignment to the southwest.	
		
Photo 75 – View to the northwest of a water hose bib and small drop off on the north side of the road along the sewer alignment.	Photo 76 – View to the east of another trimming burn pile at the bend of the sewer alignment to the northwest.	
		
Photo 77 – View to the northwest of the bend in the sewer alignment.	Photo 78 – View to the southwest of the sewer alignment along the dirt road on the north side of the almond orchard. To the left of the photo is open natural riverine plain.	

WHEATLAND SEWER PHASE I ESA	Date: May 25, 2021
 <p data-bbox="248 606 763 663">Photo 79 – View to the southwest of Best Slough vegetation.</p>	 <p data-bbox="862 606 1414 663">Photo 80 – View to the north of water flowing in Best Slough.</p>
 <p data-bbox="248 1125 763 1182">Photo 81 – View to the southwest of Best Slough adjacent to the sewer alignment.</p>	 <p data-bbox="846 1125 1430 1182">Photo 82 – View to the southwest of Best Slough where the sewer alignment will cross to the other side.</p>
 <p data-bbox="212 1644 799 1726">Photo 83 – View to the southeast of Best slough on the other side. In the foreground is tire and other trash debris.</p>	 <p data-bbox="846 1644 1430 1701">Photo 84 – View to the north of an old bike and fence line. Foxtails grow through this area.</p>

WHEATLAND SEWER PHASE I ESA	Date: May 25, 2021

## WHEATLAND SEWER PHASE I ESA

Date: January 11, 2022

Photo 111 – View to the northeast, City of Wheatland Wastewater Treatment Plant entrance.

Photo 112 – View to the north, mixing auger and trash collector.

Photo 113 – Aeration Pond with at the Treatment Plant.

Photo 114 – One of two mixing tanks in operation at the Treatment Plant.

Photo 115 – Aeration Pond with at the Treatment Plant.

Photo 116 – Empty portion of the aeration pond at the center of the treatment plant.

## WHEATLAND SEWER PHASE I ESA

Date: January 11, 2022

Photo 117 – Drying ponds to the east of the treatment plant within the fenced area.

Photo 118 – Drying ponds to the east of the treatment plant within the fenced area.

Photo 119 – Drying ponds to the east of the treatment plant within the fenced area.

Photo 120 – Hazardous Waste Storage Area with small shed, unused secondary containment and five drums.

Photo 121 – Drums in the Hazardous waste area, unable to identify contents and 3 drums are open with many bees.

Photo 122 – Storage shed in the center of the property with gas products and maintenance equipment.

## WHEATLAND SEWER PHASE I ESA

Date: January 11, 2022

Photo 123 – Supply well located at the northwest end of the property.

Photo 124 – Supply well located at the eastern end of the property.

Photo 125 – Unknown concrete footing or holding tank

Photo 126 – Small 100-gallon tank containing flammable liquid, suspected to be gasoline for the maintenance equipment.

Photo 127 – Transformers outside of the fenced area.  
No staining or stressed vegetation was observed.

Photo 128 – View to the north of the Wheatland Waste Water Treatment Plant.

## WHEATLAND SEWER PHASE I ESA

Date: January 11, 2022

Photo 129 – Dilapidated shed close up beside Highway 65.

Photo 130 – Interior of shed filled with garbage, former feed trough.

Photo 131 – Entrance to pump station #2 field and equipment laydown yard..

Photo 132 – Open field at pumphouse #2, drainage toward creek on south side of property.

Photo 133 – Open field to be the new location of Pump Station #2.

Photo 134 – Pipeline now runs along the northern side of the drainage.

## PROPERTY USES

1. ☒ Y ☐ N Are there currently structures and improvements present on the property?  
 # Description: HWY 65, STATE ST, 6<sup>TH</sup> ST, S. A ST., MAIN ST., + SPANVILLE RD. SOUTHERN PACIFIC RR, PG&E GAS, PETROLEUM PIPELINE
2. ☒ Y ☐ N Is there evidence that there were structures and improvements present on the property in the past?  
 # Description: OLD SHACK IN ROW OF PIPELINE
3. ☒ Y ☐ N Is there evidence of agricultural use (livestock, crop raising, agricultural drainage; including surface, and/or subsurface drains)? Is there evidence that there were structures and improvements present on the property in the past?  
 # Description: SEVERAL CULVERTS CROSSING, BEE HIVE
4. ☒ Y ☐ N Is there evidence of oil and gas exploration/development?  
 # 1 Description: PETROLEUM PIPELINE FOLLOWING ROAD
- ☒ Y ☐ N If yes, are oil and/or gas drilling pads, holding ponds, or conveyance pipelines and structures present on the property?  
 # Description: CONVEYANCE PIPELINE ON SOUTHSIDE OF RR
- ☒ Y ☐ N Is there evidence of current and/or past spills or releases of hazardous substances or pollutants, contaminants, or petroleum and petroleum products related to the oil and gas exploration/development?  
 # Description:
5. ☒ Y ☐ N Is there any evidence of strip mining, hard rock mining, piles, or other extractive mineral activities?  
 # Description:
- ☐ Y ☐ N If minerals extraction operations are present, is there evidence of the use/storage or release of hazardous substances (example, fuel storage tanks, cyanide or chemical use at mill sites)?  
 # Description:
- ☐ Y ☐ N If minerals extraction operations are present, are there other potential environmental concerns (draining adits or acid mine drainage, waste rock, or mill tailings in or adjacent to streams and surface waters, etc.)?  
 # Description:
- ☐ Y ☐ N If minerals extraction operations are present, are there physical safety hazards present (open adits, vertical shafts, heavy equipment, etc.)?  
 # Description:
- ☐ Y ☐ N If the areas of mineral extraction activities (mine sites, mill sites, etc) are not accessible for visual and/or physical inspection, describe the reason for the inaccessibility.

6. ☒ N Describe and note the topographic conditions of the property as well as the general topography of the area surrounding the property that is visually and/or physically observed from the periphery of the property. Identify and locate on a property/site map any key topographic features that may relate to offsite or onsite migration of contaminants.
- GENERALLY FLAT, SMALL UNDULATING HILLS. DRAINAGES, DRAINAGE BASIN

☒ N Is there evidence of modified topography or unnatural topographic features (i.e., fill dirt brought onto the property, cover for dumps, mounds, fill areas, depressions, etc.)?

# Description:

7. ☒ N Is there any evidence of waste materials currently or previously being dumped above grade, buried, and/or burned on the property (i.e., dumps, industrial waste, petroleum products, labeled/unlabeled drums or other containers, pesticide containers, household and farm debris, automotive or industrial batteries, building demolition debris, etc.)?

# Description: TIRES, CARS, RV, BOAT, OLD 18" PIPE

8. ☒ N Are there roads and/or paths present on the property?

# Description: STREETS OF WHEATLAND

☒ N If roads and/or paths are present, is there evidence of illegal or unauthorized dumping activities occurring?

# Description:

## HAZARDOUS MATERIALS AND SUBSTANCES

1. ☒ N Is there evidence that current operations on the property involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, official and/or unofficial shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?

# Description:

☒ N If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with current operations?

# Description:

2. ☒ N Is there evidence that previous operations on the property involved the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, official and/or unofficial shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?

# Description:

☒ N If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with past operations or tenants?

# Description:

3. Y ☒ N Is there evidence that the property is currently or was previously used for any form of illegal activities which may involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, illegal drug labs, waste disposal sites)?  
# Description:
4. Y ☒ N Is there any evidence of contamination (i.e., hazardous substances or petroleum products) or other materials (soil, rock, etc.) migrating from adjacent and/or nearby properties onto the site?  
# Description:
5. Y ☒ N Is there evidence of use, storage, mixing, and/or disposal of industrial drums (typically 55 gallons) or sacks of chemicals, automotive or industrial batteries, pesticides (including herbicides), paints, solvents, or other chemicals in individual containers larger than 5 gallons in volume or 50 gallons in the aggregate at the property?  
# Description:
6. Y ☒ N Are there any unidentified substance containers on the property?  
# Description:
7. Y ☒ N Is there evidence of use of chemicals, automotive or industrial batteries, pesticides, herbicides, fungicides, paints, solvents, or other, on-fence lines, right of ways, airstrips, heliports, crop duster operations, etc.?  
# Description: OLD CARS IN LOT BTWN Hwy 65 + STATE.
8. Y ☒ N Is there evidence of oiled roads, oil seeps and slicks, staining on the soil and cracked concrete, asphalt, adjacent to storm-water drains, or other surfaces?  
# Description:
9. Y ☒ N Are there currently any aboveground or underground storage tanks on the property or indications of the presence of abandoned aboveground or underground storage tanks, such as any vent pipes, fill pipes, access ways indicating a fill pipe, concrete or asphalt pads or patches, islands, or dispensers on the property or adjacent to any structure on the property?  
# Description: PUMP STATION #1 HAS 250 GAL SUS. DESCL  
AST FOR EMERGENCY BACKUP.  
Y ☒ N If ASTs or USTs are present, is there any evidence of spill or releases?  
# Description:
10. Y ☒ N Is there evidence or any indications that an aboveground or underground storage tank had been installed on the property in the past? For example, the presence of tank pads, vent pipes, fill pipes, access ways indicating a fill pipe, or dispensers on the property or adjacent to any structure on the property?  
# Description:  
Y N If ASTs or USTs are present, is there any evidence of spill or releases?  
# Description:
11. Y ☒ N Are there electric transmission lines, transformers, capacitors, or any hydraulic equipment (i.e., elevators, presses, lifts, doors, etc.) currently present on the property?  
# Description: LG SUBSTATION @ 6TH + SOUTH A. 8 PCLG  
TRANSFORMERS

Y ☒ N ☐ If electrical transmission lines, transformers, capacitors, or hydraulic equipment are present, is there any evidence of leakage or the presence of PCBs?

# Description:

12. Y ☒ N ☐ Is there any evidence electric transmission lines, transformers, capacitors, or any hydraulic equipment (i.e., elevators, presses, lifts, doors, etc.) being present on the property in the past?

# Description:

13. Y ☒ N ☐ Are there identified mercury containing materials (i.e., fluorescent lamps, button batteries, thermostats, thermometers, manometers, and other medical devices, pressure gauges, switches, relays, sink traps, and medical waste) on the site?

# Description: POSSIBLY IN OLD CARS

14. Y ☒ N ☐ Is there evidence of any pipelines, utility lines, railways, entry/exit ports, and associated structures, either buried or overhead, crossing the property, and is there evidence of any spills or releases associated with them?

# Description: GAS LINES, SANITARY SEWER, PETROLEUM, PULP, ELEC LINES, HIGH+LOW VOLTAGE LINES

Y ☒ N ☐ If yes, is there any evidence of any spills or releases associated with them?

# Description:

15. Y ☒ N ☐ Are there structures (i.e., buildings, water towers, lead smelters, etc.) and/or soils surrounding structures on the site which might indicate the presence of lead in dust, old paint (peeling, chipping, chalking, or cracking lead-based paint) and/or which were built prior to 1978 (or of unknown construction dates)?

# Description: OLD SHACK ON LOT

Y ☒ N ☐ If a structure is suspected to contain lead, is there any indication of what the intended use for the structure is or is it to be demolished?

# Description: UNKNOWN STORAGE SHED

16. Y ☒ N ☐ Are there structures on the site containing identified asbestos-containing materials (ACMs) or with suspect ACMs (i.e., fire proofing, acoustical plaster, siding, floor tiles, roofing shingles, mastic, insulation, vermiculate, etc.)?

# Description:

17. Y ☒ N ☐ Are there floor drains present in any of the onsite structures and/or areas where hazardous materials are used and/or stored or have been used and/or stored in the past?

# Description:

Y ☐ N ☐ In the areas with floor drains, is there evidence of any chemical stains present on the walls and/or floors of the onsite areas and structures where hazardous materials are/have been used and/or stored?

# Description:

18. Y ☒ N ☐ Are there any floors, drains, ceiling, or walls stained by substances other than water or that are emitting foul and/or unnatural odors (i.e. mold, mildew, other)?

# Description:

19. Y ☒ N Is there any evidence of any drains, pools, or sumps that contain liquids likely to be hazardous substances or petroleum products?

# Description:

20. ☒ N If structures are present on the property, is there indication of how the structures are heated/cooled? If yes, describe the refrigeration/cooling systems and indicate whether they contain Freon and other regulated substances?

# Description: BIG AC MARKET REFRIDGE SYSTEMS, RESIDENCES W/AC

## WATER/WASTER WATER

1. Y ☒ N Is surface water present on the property (i.e. pits, ponds, lagoons, rivers, creeks, oceans, etc.)?

# Description: DRY

- Y N If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with current operations?

# Description:

Y N

If surface water is present (example pits, ponds, lagoons), is there evidence of any unnatural characteristics (i.e., color, sheens, odors, sterile, etc)? If known, indicate whether it is associated with an activity related to the property and whether it is the situation is new or has been present for an extended period of time.

# Description:

- Y N If surface water is present, is there evidence of hazardous materials dumping in water bodies (e.g. used for agricultural, commercial and/or industrial purposes, marinas, docks, etc.)?

# Description:

2. Y ☒ N Is there evidence that the property currently or was previously served by an onsite drinking water supply well? If the well is no longer used, indicate whether it has been properly abandoned. If no, indicate whether the property is supplied by an offsite water source.

# Description:

- Y N If a well is present on the property, is there evidence of any contamination of the water supply or of the nearby soils?

# Description:

3. Y ☒ N Is there evidence that the property currently or was previously served by a non-potable water system (example, agricultural well)? If the well is no longer used, indicate whether it has been properly abandoned.

# Description:

- Y N If a non-potable well is present on the property, is there evidence of any contamination of the water supply or of the nearby soils?

# Description:

4. Y ☒ N Is there evidence, other than storm water, of sanitary wastewater discharge from restrooms, kitchens, or other household-type uses? Is there evidence of industrial and/or other wastewater discharge on or adjacent to the property?

# Description: UNBROFLOW DETENTION BASIN DRY

5. Y ☒ N Is there evidence that the property currently has or had in the past an onsite waste water treatment and disposal system (septic systems, sewage lagoons, etc.)?

# Description: PUMP STATION OF SEWAGE + SANITARY SEWER LINES

- Y ☒ N If the onsite waste water treatment and disposal system is no longer in use, is there evidence that it has been closed?

# Description: IN USE

6. Y ☒ N Is there evidence that the property discharged waste water to an offsite facility?

# Description:

- Y ☒ N Is there evidence of other wastewater treatment/disposal facilities (example oil water separators, ponds, pits, lagoons) located on the property that have or may have been used for waste disposal?

# Description: DETENTION BASIN

7. Y ☒ N Is there evidence of any other existent discharges, drains, grates, etc that have not been addressed previously?

# Description:

## WATER/WASTEWATER

1. Y ☒ N Is there any evidence that any monitoring wells have been installed on the property?

# Description:

- Y ☒ N If the monitoring wells have been installed and are no longer in use, is there evidence that they been properly abandoned in accordance with applicable regulatory requirements?

# Description:

2. Y ☒ N Is there evidence of stressed vegetation on the property (i.e., bare ground, distressed/dead vegetation, unusually healthy vegetation, etc.) that is not associated with insufficient or too much water?

# Description:

3. Y ☒ N Is there a large number or amount of invasive plants present on the property? If yes, please indicate common name if known (e.g., kudzu, phragmites, cheatgrass, etc.), and approximate amount if possible (e.g., approximately half an acre, etc.).

# Description:

4. Y ☒ N Is there a large number or amount of invasive plants present on the property? If yes, please indicate common name if known (e.g., kudzu, phragmites, cheatgrass, etc.), and approximate amount if possible (e.g., approximately half an acre, etc.).

# Description:

## SURROUNDING PROPERTY USE

1. ☒ N As can be visually and/or physically observed from the periphery of the property, are there currently structures and improvements present on the surrounding property?  
# Description: RESIDENCES + BUSINESSES, STORAGE  
SCHOOL, PARK
2. ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence that there were structures and improvements present on the surrounding property in the past?  
# Description: \_\_\_\_\_
3. ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence that current operations on the surrounding property involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?  
# Description: RESIDENCE + BUSINESS USE OF HAZ  
PRODUCTS
4. ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence that past operations on the surrounding property involved the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?  
# Description: \_\_\_\_\_
5. ☒ N Is there evidence of any other nearby land uses or activities, especially upstream or upgradient that might have had a waste or dump site? For example, are there upstream or upgradient active or abandoned mine sites which may impact or threaten the subject real property?  
# Description: LOT NORTH OF DENTION POND HAD PILES  
OF DEBRIS
6. ☒ N Is there evidence of any hazardous substance, pollutant/contaminant spill or release, or other potential environmental problems on any adjacent or nearby properties?  
# Description: \_\_\_\_\_
7. ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence of any current or past agricultural drainage (surface, and/or subsurface drains, field runoff, etc.) discharging from the adjacent properties onto the property/site?  
# Description: \_\_\_\_\_
8. ☒ N As can be visually and/or physically observed from the periphery of the property, is there any evidence of contamination (i.e., hazardous substances or petroleum products) or other materials (soil, rock, etc.) migrating from adjacent and/or nearby properties onto the property/site? If  
# Description: \_\_\_\_\_
9. ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence of oil and gas exploration/development on the adjacent and surrounding property?  
# Description: \_\_\_\_\_

Y N If yes, is there any evidence of oil and/or gas drilling pads, holding ponds, or conveyance pipelines and structures present on the adjacent and surrounding property?

# Description:

10. Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of current and/or past spills or releases of hazardous substances or pollutants, contaminants, or petroleum and petroleum products related to the oil and gas exploration/development?

# Description:

11. Y N As can be visually and/or physically observed from the periphery of the property, is there any evidence of strip mining, hardrock mining, piles, or other extractive mineral activities on the adjacent and surrounding property?

# Description:

12. Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of the use/storage or release of hazardous substances (for example, fuel storage tanks, cyanide or chemical use at mill sites) associated with the minerals extraction operations on adjacent and surrounding property?

# Description:

13. Y N As can be visually and/or physically observed from the periphery of the property, describe and note the topographic conditions of the surrounding property as well as the general topography of the area.

# Description: ~~LOW~~ ROLLING HILLS

Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of modified topography or unnatural topographic features on the surrounding property that may indicate (i.e., fill dirt brought onto property, cover for dumps, mounds, fill areas, depressions, etc.)?

# Description: DRAINAGES

14. Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of stressed vegetation on the surrounding property (i.e., bare ground, distressed/dead vegetation, unusually healthy vegetation, etc.) that is not associated with insufficient or too much water?

# Description:

15. Y N As can be visually and/or physically observed from the periphery of the property, is there a large number or amount of invasive plants present on the surrounding property?

# Description:

16. Y N Is there anything else observed that could indicate the presence of hazardous substances, petroleum products, or other potential environmental problems on the surrounding properties?

# Description:

## SOLID WASTE, PHYSICAL HAZARDS, AND NON-SCOPE ISSUES

Solid Waste, Physical Hazards, and Non-Scope Issues identified during the inquiry will be described below, identified on the site map, and photographs taken and provided as an attachment. If none, so state.

**Solid Waste:** such as household garbage, tires, appliances, dead animals, abandoned automobiles, and similar items.

1 TIRE, 4 OLD CARS, 1 BOAT, 1 RV

**Physical Hazards:** human-caused environmental impacts such as mine shafts, high walls, unsafe bridges, primitive roads, or similar features where the potential exists for injury to visitors on the lands after acquisition is completed.

NA

**Non-Scope Issues:** such as asbestos-containing materials, radon, lead-based paint, drinking water systems, health and safety issues and similar items.

## PROPERTY USES

1. Y ☒ N Are there currently structures and improvements present on the property?  
# Description:
2. Y ☒ N Is there evidence that there were structures and improvements present on the property in the past?  
# Description:
3. Y ☒ N Is there evidence of agricultural use (livestock, crop raising, agricultural drainage; including surface, and/or subsurface drains)? Is there evidence that there were structures and improvements present on the property in the past?  
# Description:
4. Y ☒ N Is there evidence of oil and gas exploration/development?  
# Description:
  - Y N If yes, are oil and/or gas drilling pads, holding ponds, or conveyance pipelines and structures present on the property?  
# Description:
  - Y N Is there evidence of current and/or past spills or releases of hazardous substances or pollutants, contaminants, or petroleum and petroleum products related to the oil and gas exploration/development?  
# Description:
5. Y ☒ N Is there any evidence of strip mining, hard rock mining, piles, or other extractive mineral activities?  
# Description:
  - Y N If minerals extraction operations are present, is there evidence of the use/storage or release of hazardous substances (example, fuel storage tanks, cyanide or chemical use at mill sites)?  
# Description:
  - Y N If minerals extraction operations are present, are there other potential environmental concerns (draining adits or acid mine drainage, waste rock, or mill tailings in or adjacent to streams and surface waters, etc.)?  
# Description:
  - Y N If minerals extraction operations are present, are there physical safety hazards present (open adits, vertical shafts, heavy equipment, etc.)?  
# Description:
  - Y N If the areas of mineral extraction activities (mine sites, mill sites, etc) are not accessible for visual and/or physical inspection, describe the reason for the inaccessibility.

6. ☒ Y ☐ N Describe and note the topographic conditions of the property as well as the general topography of the area surrounding the property that is visually and/or physically observed from the periphery of the property. Identify and locate on a property/site map any key topographic features that may relate to offsite or onsite migration of contaminants.

FLAT TO GENTLY ROLLING. SLOUGH AFTER CURVE (WIDE DRAINAGE)

- ☐ Y ☐ N Is there evidence of modified topography or unnatural topographic features (i.e., fill dirt brought onto the property, cover for dumps, mounds, fill areas, depressions, etc.)?

# Description:

7. ☐ Y ☒ N Is there any evidence of waste materials currently or previously being dumped above grade, buried, and/or burned on the property (i.e., dumps, industrial waste, petroleum products, labeled/unlabeled drums or other containers, pesticide containers, household and farm debris, automotive or industrial batteries, building demolition debris, etc.)?

# Description:

8. ☒ Y ☐ N Are there roads and/or paths present on the property?

# Description: SPENCEVILLE + SASPER

- ☐ Y ☒ N If roads and/or paths are present, is there evidence of illegal or unauthorized dumping activities occurring?

# Description:

## HAZARDOUS MATERIALS AND SUBSTANCES

1. ☐ Y ☒ N Is there evidence that current operations on the property involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, official and/or unofficial shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?

# Description:

- ☐ Y ☐ N If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with current operations?

# Description:

2. ☐ Y ☒ N Is there evidence that previous operations on the property involved the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, official and/or unofficial shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?

# Description:

- ☐ Y ☐ N If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with past operations or tenants?

# Description:

3. Y ☒ N Is there evidence that the property is currently or was previously used for any form of illegal activities which may involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, illegal drug labs, waste disposal sites)?  
# \_\_\_\_\_ Description: \_\_\_\_\_
4. Y ☒ N Is there any evidence of contamination (i.e., hazardous substances or petroleum products) or other materials (soil, rock, etc.) migrating from adjacent and/or nearby properties onto the site?  
# \_\_\_\_\_ Description: \_\_\_\_\_
5. Y ☒ N Is there evidence of use, storage, mixing, and/or disposal of industrial drums (typically 55 gallons) or sacks of chemicals, automotive or industrial batteries, pesticides (including herbicides), paints, solvents, or other chemicals in individual containers larger than 5 gallons in volume or 50 gallons in the aggregate at the property?  
# \_\_\_\_\_ Description: \_\_\_\_\_
6. Y ☒ N Are there any unidentified substance containers on the property?  
# \_\_\_\_\_ Description: \_\_\_\_\_
7. Y ☒ N Is there evidence of use of chemicals, automotive or industrial batteries, pesticides, herbicides, fungicides, paints, solvents, or other, on-fence lines, right of ways, airstrips, heliports, crop duster operations, etc.?  
# \_\_\_\_\_ Description: \_\_\_\_\_
8. Y ☒ N Is there evidence of oiled roads, oil seeps and slicks, staining on the soil and cracked concrete, asphalt, adjacent to storm-water drains, or other surfaces?  
# \_\_\_\_\_ Description: \_\_\_\_\_
9. Y ☒ N Are there currently any aboveground or underground storage tanks on the property or indications of the presence of abandoned aboveground or underground storage tanks, such as any vent pipes, fill pipes, access ways indicating a fill pipe, concrete or asphalt pads or patches, islands, or dispensers on the property or adjacent to any structure on the property?  
# \_\_\_\_\_ Description: \_\_\_\_\_  
Y N If ASTs or USTs are present, is there any evidence of spill or releases?  
# \_\_\_\_\_ Description: \_\_\_\_\_
10. Y ☒ N Is there evidence or any indications that an aboveground or underground storage tank had been installed on the property in the past? For example, the presence of tank pads, vent pipes, fill pipes, access ways indicating a fill pipe, or dispensers on the property or adjacent to any structure on the property?  
# \_\_\_\_\_ Description: 8  
Y N If ASTs or USTs are present, is there any evidence of spill or releases?  
# \_\_\_\_\_ Description: \_\_\_\_\_
11. Y ☒ N Are there electric transmission lines, transformers, capacitors, or any hydraulic equipment (i.e., elevators, presses, lifts, doors, etc.) currently present on the property?  
# \_\_\_\_\_ Description: 5 TRANSFORMERS + LOW VOLTAGE OVERHEAD

Y ☒ N ☐ If electrical transmission lines, transformers, capacitors, or hydraulic equipment are present, is there any evidence of leakage or the presence of PCBs?

# Description:

12. Y ☒ N ☐ Is there any evidence electric transmission lines, transformers, capacitors, or any hydraulic equipment (i.e., elevators, presses, lifts, doors, etc.) being present on the property in the past?

# Description:

13. Y ☒ N ☐ Are there identified mercury containing materials (i.e., fluorescent lamps, button batteries, thermostats, thermometers, manometers, and other medical devices, pressure gauges, switches, relays, sink traps, and medical waste) on the site?

# Description:

14. Y ☒ N ☐ Is there evidence of any pipelines, utility lines, railways, entry/exit ports, and associated structures, either buried or overhead, crossing the property, and is there evidence of any spills or releases associated with them?

# Description:

Y N If yes, is there any evidence of any spills or releases associated with them?

# Description:

15. Y ☒ N ☐ Are there structures (i.e., buildings, water towers, lead smelters, etc.) and/or soils surrounding structures on the site which might indicate the presence of lead in dust, old paint (peeling, chipping, chalking, or cracking lead-based paint) and/or which were built prior to 1978 (or of unknown construction dates)?

# Description:

Y N If a structure is suspected to contain lead, is there any indication of what the intended use for the structure is or is it to be demolished?

# Description:

16. Y ☒ N ☐ Are there structures on the site containing identified asbestos-containing materials (ACMs) or with suspect ACMs (i.e., fire proofing, acoustical plaster, siding, floor tiles, roofing shingles, mastic, insulation, vermiculate, etc.)?

# Description:

17. Y ☒ N ☐ Are there floor drains present in any of the onsite structures and/or areas where hazardous materials are used and/or stored or have been used and/or stored in the past?

# Description:

Y N In the areas with floor drains, is there evidence of any chemical stains present on the walls and/or floors of the onsite areas and structures where hazardous materials are/have been used and/or stored?

# Description:

18. Y ☒ N ☐ Are there any floors, drains, ceiling, or walls stained by substances other than water or that are emitting foul and/or unnatural odors (i.e. mold, mildew, other)?

# Description:

19. Y ☒ N Is there any evidence of any drains, pools, or sumps that contain liquids likely to be hazardous substances or petroleum products?

# Description:

20. Y ☒ N If structures are present on the property, is there indication of how the structures are heated/cooled? If yes, describe the refrigeration/cooling systems and indicate whether they contain Freon and other regulated substances?

# Description:

## WATER/WASTEWATER

1. Y ☒ N Is surface water present on the property (i.e. pits, ponds, lagoons, rivers, creeks, oceans, etc.)?

# Description: DRY GRASSHOPPER SLOUGH

- Y ☒ N If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with current operations?

# Description:

Y N

If surface water is present (example pits, ponds, lagoons), is there evidence of any unnatural characteristics (i.e., color, sheens, odors, sterile, etc)? If known, indicate whether it is associated with an activity related to the property and whether it is the situation is new or has been present for an extended period of time.

# Description:

- Y N If surface water is present, is there evidence of hazardous materials dumping in water bodies (e.g. used for agricultural, commercial and/or industrial purposes, marinas, docks, etc.)?

# Description:

2. Y ☒ N Is there evidence that the property currently or was previously served by an onsite drinking water supply well? If the well is no longer used, indicate whether it has been properly abandoned. If no, indicate whether the property is supplied by an offsite water source.

# Description: RESIDENCES SERVED BY WELLS

- Y ☒ N If a well is present on the property, is there evidence of any contamination of the water supply or of the nearby soils?

# Description:

3. Y ☒ N Is there evidence that the property currently or was previously served by a non-potable water system (example, agricultural well)? If the well is no longer used, indicate whether it has been properly abandoned.

# Description: AGRI SURROUNDING ROW

- Y ☒ N If a non-potable well is present on the property, is there evidence of any contamination of the water supply or of the nearby soils?

# Description:

4. Y ☒ N Is there evidence, other than storm water, of sanitary wastewater discharge from restrooms, kitchens, or other household-type uses? Is there evidence of industrial and/or other wastewater discharge on or adjacent to the property?

# Description:

5. Y ☒ N Is there evidence that the property currently has or had in the past an onsite waste water treatment and disposal system (septic systems, sewage lagoons, etc.)?

# Description:

Y N If the onsite waste water treatment and disposal system is no longer in use, is there evidence that it has been closed?

# Description:

6. Y ☒ N Is there evidence that the property discharged waste water to an offsite facility?

# Description:

Y N Is there evidence of other wastewater treatment/disposal facilities (example oil water separators, ponds, pits, lagoons) located on the property that have or may have been used for waste disposal?

# Description:

7. Y ☒ N Is there evidence of any other existent discharges, drains, grates, etc that have not been addressed previously?

# Description:

## WATER/WASTER WATER

1. Y ☒ N Is there any evidence that any monitoring wells have been installed on the property?

# Description:

Y N If the monitoring wells have been installed and are no longer in use, is there evidence that they been properly abandoned in accordance with applicable regulatory requirements?

# Description:

2. Y ☒ N Is there evidence of stressed vegetation on the property (i.e., bare ground, distressed/dead vegetation, unusually healthy vegetation, etc.) that is not associated with insufficient or too much water?

# Description:

3. Y ☒ N Is there a large number or amount of invasive plants present on the property? If yes, please indicate common name if known (e.g., kudzu, phragmites, cheatgrass, etc.), and approximate amount if possible (e.g., approximately half an acre, etc.).

# Description:

4. Y ☒ N Is there a large number or amount of invasive plants present on the property? If yes, please indicate common name if known (e.g., kudzu, phragmites, cheatgrass, etc.), and approximate amount if possible (e.g., approximately half an acre, etc.).

# Description:

## SURROUNDING PROPERTY USE

1. ☒ N As can be visually and/or physically observed from the periphery of the property, are there currently structures and improvements present on the surrounding property?  
# Description: RESIDENCES, AG LAND
2. ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence that there were structures and improvements present on the surrounding property in the past?  
# Description: RESIDENCES, DRAINAGES, FENCES
3. ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence that current operations on the surrounding property involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?  
# Description: RESIDENCES FOR PERSONAL USE
4. ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence that past operations on the surrounding property involved the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?  
# Description: \_\_\_\_\_
5. ☒ N Is there evidence of any other nearby land uses or activities, especially upstream or upgradient that might have had a waste or dump site? For example, are there upstream or upgradient active or abandoned mine sites which may impact or threaten the subject real property?  
# Description: \_\_\_\_\_
6. ☒ N Is there evidence of any hazardous substance, pollutant/contaminant spill or release, or other potential environmental problems on any adjacent or nearby properties?  
# Description: \_\_\_\_\_
7. ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence of any current or past agricultural drainage (surface, and/or subsurface drains, field runoff, etc.) discharging from the adjacent properties onto the property/site?  
# Description: ALMOND + OPEN FIELD RUNOFF INTO ROAD DITCHES
8. ☒ N As can be visually and/or physically observed from the periphery of the property, is there any evidence of contamination (i.e., hazardous substances or petroleum products) or other materials (soil, rock, etc.) migrating from adjacent and/or nearby properties onto the property/site? If  
# Description: \_\_\_\_\_
9. ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence of oil and gas exploration/development on the adjacent and surrounding property?  
# Description: \_\_\_\_\_

Y N If yes, is there any evidence of oil and/or gas drilling pads, holding ponds, or conveyance pipelines and structures present on the adjacent and surrounding property?

# Description:

10. Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of current and/or past spills or releases of hazardous substances or pollutants, contaminants, or petroleum and petroleum products related to the oil and gas exploration/development?

# Description:

11. Y N As can be visually and/or physically observed from the periphery of the property, is there any evidence of strip mining, hardrock mining, piles, or other extractive mineral activities on the adjacent and surrounding property?

# Description:

12. Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of the use/storage or release of hazardous substances (for example, fuel storage tanks, cyanide or chemical use at mill sites) associated with the minerals extraction operations on adjacent and surrounding property?

# Description:

13. Y N As can be visually and/or physically observed from the periphery of the property, describe and note the topographic conditions of the surrounding property as well as the general topography of the area.

# Description: GENTLY ROLLING HILLS / FLAT

Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of modified topography or unnatural topographic features on the surrounding property that may indicate (i.e., fill dirt brought onto property, cover for dumps, mounds, fill areas, depressions, etc.)?

# Description:

14. Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of stressed vegetation on the surrounding property (i.e., bare ground, distressed/dead vegetation, unusually healthy vegetation, etc.) that is not associated with insufficient or too much water?

# Description:

15. Y N As can be visually and/or physically observed from the periphery of the property, is there a large number or amount of invasive plants present on the surrounding property?

# Description:

16. Y N Is there anything else observed that could indicate the presence of hazardous substances, petroleum products, or other potential environmental problems on the surrounding properties?

# Description:

## SOLID WASTE, PHYSICAL HAZARDS, AND NON-SCOPE ISSUES

Solid Waste, Physical Hazards, and Non-Scope Issues identified during the inquiry will be described below, identified on the site map, and photographs taken and provided as an attachment. If none, so state.

**Solid Waste:** such as household garbage, tires, appliances, dead animals, abandoned automobiles, and similar items.

---

---

---

---

---

---

---

---

**Physical Hazards:** human-caused environmental impacts such as mine shafts, high walls, unsafe bridges, primitive roads, or similar features where the potential exists for injury to visitors on the lands after acquisition is completed.

---

---

---

---

---

---

---

---

**Non-Scope Issues:** such as asbestos-containing materials, radon, lead-based paint, drinking water systems, health and safety issues and similar items.

---

---

---

---

---

---

---

---

Y N	Are all identified issues logged on a GPS or marked on a map?

## PROPERTY USES

1. ☒ N Are there currently structures and improvements present on the property?  
# Description: BRIDGE OVER DRY CREEK
2. ☒ Y ☒ N Is there evidence that there were structures and improvements present on the property in the past?  
# Description:
3. ☒ Y ☒ N Is there evidence of agricultural use (livestock, crop raising, agricultural drainage; including surface, and/or subsurface drains)? Is there evidence that there were structures and improvements present on the property in the past?  
# Description: PUMP STA. #2 IN AG FIELDS (HAY/ALFALFA)  
EQUIP STORAGE HAS EXISTING FARM EQUIP.
4. ☒ Y ☒ N Is there evidence of oil and gas exploration/development?  
# Description:  
☒ Y ☒ N If yes, are oil and/or gas drilling pads, holding ponds, or conveyance pipelines and structures present on the property?  
# Description:  
☒ Y ☒ N Is there evidence of current and/or past spills or releases of hazardous substances or pollutants, contaminants, or petroleum and petroleum products related to the oil and gas exploration/development?  
# Description:
5. ☒ Y ☒ N Is there any evidence of strip mining, hard rock mining, piles, or other extractive mineral activities?  
# Description:  
☒ Y ☒ N If minerals extraction operations are present, is there evidence of the use/storage or release of hazardous substances (example, fuel storage tanks, cyanide or chemical use at mill sites)?  
# Description:  
☒ Y ☒ N If minerals extraction operations are present, are there other potential environmental concerns (draining adits or acid mine drainage, waste rock, or mill tailings in or adjacent to streams and surface waters, etc.)?  
# Description:  
☒ Y ☒ N If minerals extraction operations are present, are there physical safety hazards present (open adits, vertical shafts, heavy equipment, etc.)?  
# Description:  
☒ Y ☒ N If the areas of mineral extraction activities (mine sites, mill sites, etc) are not accessible for visual and/or physical inspection, describe the reason for the inaccessibility.

6. ☒ N Describe and note the topographic conditions of the property as well as the general topography of the area surrounding the property that is visually and/or physically observed from the periphery of the property. Identify and locate on a property/site map any key topographic features that may relate to offsite or onsite migration of contaminants.

FLAT w/ DRAINAGES, RICE + ALMOND FIELDS

- ☒ N Is there evidence of modified topography or unnatural topographic features (i.e., fill dirt brought onto the property, cover for dumps, mounds, fill areas, depressions, etc.)?

# Description: FARM AREAS LEVELED FOR CROPS + DRAINAGE WATERING

7. ☒ N Is there any evidence of waste materials currently or previously being dumped above grade, buried, and/or burned on the property (i.e., dumps, industrial waste, petroleum products, labeled/unlabeled drums or other containers, pesticide containers, household and farm debris, automotive or industrial batteries, building demolition debris, etc.)?

# Description:

8. ☒ N Are there roads and/or paths present on the property?

# Description: JASPER LANE (PAVED)

- ☒ N If roads and/or paths are present, is there evidence of illegal or unauthorized dumping activities occurring?

# Description:

## HAZARDOUS MATERIALS AND SUBSTANCES

1. ☒ N Is there evidence that current operations on the property involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, official and/or unofficial shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?

# Description: NEARBY LAYDOWN SHED HAS OIL, DIESEL, PESTICIDES, HERBICIDES, OXIDES, VEHICLE REPAIR

- ☒ N If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with current operations?

# Description: STAINING BY OIL DRUMS BACK OF BUILDING

2. ☒ N Is there evidence that previous operations on the property involved the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, official and/or unofficial shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?

# Description:

- ☒ N If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with past operations or tenants?

# Description:

3. ☒ Y ☐ N Is there evidence that the property is currently or was previously used for any form of illegal activities which may involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, illegal drug labs, waste disposal sites)?  
# Description:
4. ☒ Y ☐ N Is there any evidence of contamination (i.e., hazardous substances or petroleum products) or other materials (soil, rock, etc.) migrating from adjacent and/or nearby properties onto the site?  
# Description:
5. ☒ Y ☐ N Is there evidence of use, storage, mixing, and/or disposal of industrial drums (typically 55 gallons) or sacks of chemicals, automotive or industrial batteries, pesticides (including herbicides), paints, solvents, or other chemicals in individual containers larger than 5 gallons in volume or 50 gallons in the aggregate at the property?  
# Description: NEAR BY REPAIR SHED AT LAYDOWN
6. ☒ Y ☐ N Are there any unidentified substance containers on the property?  
# Description: IN THE SHEDS ON PRIVATE PROPERTY
7. ☒ Y ☐ N Is there evidence of use of chemicals, automotive or industrial batteries, pesticides, herbicides, fungicides, paints, solvents, or other, on-fence lines, right of ways, airstrips, heliports, crop duster operations, etc.?  
# Description:
8. ☒ Y ☐ N Is there evidence of oiled roads, oil seeps and slicks, staining on the soil and cracked concrete, asphalt, adjacent to storm-water drains, or other surfaces?  
# Description:
9. ☒ Y ☐ N Are there currently any aboveground or underground storage tanks on the property or indications of the presence of abandoned aboveground or underground storage tanks, such as any vent pipes, fill pipes, access ways indicating a fill pipe, concrete or asphalt pads or patches, islands, or dispensers on the property or adjacent to any structure on the property?  
# Description: WATER PIPES NEAR LAYDOWN  
Y N If ASTs or USTs are present, is there any evidence of spill or releases?  
# Description:
10. ☒ Y ☐ N Is there evidence or any indications that an aboveground or underground storage tank had been installed on the property in the past? For example, the presence of tank pads, vent pipes, fill pipes, access ways indicating a fill pipe, or dispensers on the property or adjacent to any structure on the property?  
# Description:  
Y N If ASTs or USTs are present, is there any evidence of spill or releases?  
# Description:
11. ☒ Y ☐ N Are there electric transmission lines, transformers, capacitors, or any hydraulic equipment (i.e., elevators, presses, lifts, doors, etc.) currently present on the property?  
# Description: ON WESTSIDE OF ROAD, SEVERAL TRANSFORMERS

Y ☒ N ☐ If electrical transmission lines, transformers, capacitors, or hydraulic equipment are present, is there any evidence of leakage or the presence of PCBs?

# Description:

12. Y ☒ N ☐ Is there any evidence electric transmission lines, transformers, capacitors, or any hydraulic equipment (i.e., elevators, presses, lifts, doors, etc.) being present on the property in the past?

# Description:

13. Y ☒ N ☐ Are there identified mercury containing materials (i.e., fluorescent lamps, button batteries, thermostats, thermometers, manometers, and other medical devices, pressure gauges, switches, relays, sink traps, and medical waste) on the site?

# Description: IN REPAIR SHED

14. Y ☒ N ☐ Is there evidence of any pipelines, utility lines, railways, entry/exit ports, and associated structures, either buried or overhead, crossing the property, and is there evidence of any spills or releases associated with them?

# Description:

Y N If yes, is there any evidence of any spills or releases associated with them?

# Description:

15. Y ☒ N ☐ Are there structures (i.e., buildings, water towers, lead smelters, etc.) and/or soils surrounding structures on the site which might indicate the presence of lead in dust, old paint (peeling, chipping, chalking, or cracking lead-based paint) and/or which were built prior to 1978 (or of unknown construction dates)?

# Description:

Y N If a structure is suspected to contain lead, is there any indication of what the intended use for the structure is or is it to be demolished?

# Description:

16. Y ☒ N ☐ Are there structures on the site containing identified asbestos-containing materials (ACMs) or with suspect ACMs (i.e., fire proofing, acoustical plaster, siding, floor tiles, roofing shingles, mastic, insulation, vermiculate, etc.)?

# Description:

17. Y ☒ N ☐ Are there floor drains present in any of the onsite structures and/or areas where hazardous materials are used and/or stored or have been used and/or stored in the past?

# Description:

Y N In the areas with floor drains, is there evidence of any chemical stains present on the walls and/or floors of the onsite areas and structures where hazardous materials are/have been used and/or stored?

# Description:

18. Y ☒ N ☐ Are there any floors, drains, ceiling, or walls stained by substances other than water or that are emitting foul and/or unnatural odors (i.e. mold, mildew, other)?

# Description:

19. Y ☒ N ☐ Is there any evidence of any drains, pools, or sumps that contain liquids likely to be hazardous substances or petroleum products?

# Description:

20. Y ☒ N ☐ If structures are present on the property, is there indication of how the structures are heated/cooled? If yes, describe the refrigeration/cooling systems and indicate whether they contain Freon and other regulated substances?

# Description:

## WATER/WASTER WATER

1. Y ☒ N ☐ Is surface water present on the property (i.e. pits, ponds, lagoons, rivers, creeks, oceans, etc.)?

# Description: ADJACENT RICE FIELDS

- Y ☒ N ☐ If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with current operations?

# Description:

- Y ☒ N ☐ If surface water is present (example pits, ponds, lagoons), is there evidence of any unnatural characteristics (i.e., color, sheens, odors, sterile, etc.)? If known, indicate whether it is associated with an activity related to the property and whether it is the situation is new or has been present for an extended period of time.

# Description:

- Y ☒ N ☐ If surface water is present, is there evidence of hazardous materials dumping in water bodies (e.g. used for agricultural, commercial and/or industrial purposes, marinas, docks, etc.)?

# Description:

2. Y ☒ N ☐ Is there evidence that the property currently or was previously served by an onsite drinking water supply well? If the well is no longer used, indicate whether it has been properly abandoned. If no, indicate whether the property is supplied by an offsite water source.

# Description: ADJACENT RESIDENCES HAVE SUPPLY WELLS

- Y ☒ N ☐ If a well is present on the property, is there evidence of any contamination of the water supply or of the nearby soils?

# Description:

3. Y ☒ N ☐ Is there evidence that the property currently or was previously served by a non-potable water system (example, agricultural well)? If the well is no longer used, indicate whether it has been properly abandoned.

# Description: RICE + ALMOND FIELDS USE WELLS + WATER IN SLOUGHS

- Y ☒ N ☐ If a non-potable well is present on the property, is there evidence of any contamination of the water supply or of the nearby soils?

# Description:

4. Y ☒ N Is there evidence, other than storm water, of sanitary wastewater discharge from restrooms, kitchens, or other household-type uses? Is there evidence of industrial and/or other wastewater discharge on or adjacent to the property?

# Description:

5. Y ☒ N Is there evidence that the property currently has or had in the past an onsite waste water treatment and disposal system (septic systems, sewage lagoons, etc.)?

# Description:

Y N If the onsite waste water treatment and disposal system is no longer in use, is there evidence that it has been closed?

# Description:

6. Y ☒ N Is there evidence that the property discharged waste water to an offsite facility?

# Description:

Y N Is there evidence of other wastewater treatment/disposal facilities (example oil water separators, ponds, pits, lagoons) located on the property that have or may have been used for waste disposal?

# Description:

7. Y ☒ N Is there evidence of any other existent discharges, drains, grates, etc that have not been addressed previously?

# Description:

## WATER/WASTER WATER

1. Y ☒ N Is there any evidence that any monitoring wells have been installed on the property?

# Description:

Y N If the monitoring wells have been installed and are no longer in use, is there evidence that they been properly abandoned in accordance with applicable regulatory requirements?

# Description:

2. Y ☒ N Is there evidence of stressed vegetation on the property (i.e., bare ground, distressed/dead vegetation, unusually healthy vegetation, etc.) that is not associated with insufficient or too much water?

# Description:

3. Y ☒ N Is there a large number or amount of invasive plants present on the property? If yes, please indicate common name if known (e.g., kudzu, phragmites, cheatgrass, etc.), and approximate amount if possible (e.g., approximately half an acre, etc.).

# Description:

4. Y ☒ N Is there a large number or amount of invasive plants present on the property? If yes, please indicate common name if known (e.g., kudzu, phragmites, cheatgrass, etc.), and approximate amount if possible (e.g., approximately half an acre, etc.).

# Description:

## SURROUNDING PROPERTY USE

1. ☒ Y ☐ N As can be visually and/or physically observed from the periphery of the property, are there currently structures and improvements present on the surrounding property?  
# Description: RESIDENCES, FARM EQ SHEDS, WAREHOUSES
2. ☒ Y ☐ N As can be visually and/or physically observed from the periphery of the property, is there evidence that there were structures and improvements present on the surrounding property in the past?  
# Description: \_\_\_\_\_
3. ☒ Y ☐ N As can be visually and/or physically observed from the periphery of the property, is there evidence that current operations on the surrounding property involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?  
# Description: SHEDS CONTAINS HAZ MAT.
4. ☒ Y ☐ N As can be visually and/or physically observed from the periphery of the property, is there evidence that past operations on the surrounding property involved the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?  
# Description: \_\_\_\_\_
5. ☒ Y ☐ N Is there evidence of any other nearby land uses or activities, especially upstream or upgradient that might have had a waste or dump site? For example, are there upstream or upgradient active or abandoned mine sites which may impact or threaten the subject real property?  
# Description: \_\_\_\_\_
6. ☒ Y ☐ N Is there evidence of any hazardous substance, pollutant/contaminant spill or release, or other potential environmental problems on any adjacent or nearby properties?  
# Description: OIL STAINING BELOW DRUMS
7. ☒ Y ☐ N As can be visually and/or physically observed from the periphery of the property, is there evidence of any current or past agricultural drainage (surface, and/or subsurface drains, field runoff, etc.) discharging from the adjacent properties onto the property/site?  
# Description: AG FIELDS ADJACENT TO ROW. USE DRAINAGE AS CONVEYANCE
8. ☒ Y ☐ N As can be visually and/or physically observed from the periphery of the property, is there any evidence of contamination (i.e., hazardous substances or petroleum products) or other materials (soil, rock, etc.) migrating from adjacent and/or nearby properties onto the property/site? If  
# Description: \_\_\_\_\_
9. ☒ Y ☐ N As can be visually and/or physically observed from the periphery of the property, is there evidence of oil and gas exploration/development on the adjacent and surrounding property?  
# Description: \_\_\_\_\_

Y N If yes, is there any evidence of oil and/or gas drilling pads, holding ponds, or conveyance pipelines and structures present on the adjacent and surrounding property?

# Description:

10. Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of current and/or past spills or releases of hazardous substances or pollutants, contaminants, or petroleum and petroleum products related to the oil and gas exploration/development?

# Description:

11. Y N As can be visually and/or physically observed from the periphery of the property, is there any evidence of strip mining, hardrock mining, piles, or other extractive mineral activities on the adjacent and surrounding property?

# Description:

12. Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of the use/storage or release of hazardous substances (for example, fuel storage tanks, cyanide or chemical use at mill sites) associated with the minerals extraction operations on adjacent and surrounding property?

# Description:

13. Y N As can be visually and/or physically observed from the periphery of the property, describe and note the topographic conditions of the surrounding property as well as the general topography of the area.

# Description: FEAT W/ DRAINAGE

Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of modified topography or unnatural topographic features on the surrounding property that may indicate (i.e., fill dirt brought onto property, cover for dumps, mounds, fill areas, depressions, etc.)?

# Description:

14. Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of stressed vegetation on the surrounding property (i.e., bare ground, distressed/dead vegetation, unusually healthy vegetation, etc.) that is not associated with insufficient or too much water?

# Description:

15. Y N As can be visually and/or physically observed from the periphery of the property, is there a large number or amount of invasive plants present on the surrounding property?

# Description:

16. Y N Is there anything else observed that could indicate the presence of hazardous substances, petroleum products, or other potential environmental problems on the surrounding properties?

# Description:

## SOLID WASTE, PHYSICAL HAZARDS, AND NON-SCOPE ISSUES

Solid Waste, Physical Hazards, and Non-Scope Issues identified during the inquiry will be described below, identified on the site map, and photographs taken and provided as an attachment. If none, so state.

**Solid Waste:** such as household garbage, tires, appliances, dead animals, abandoned automobiles, and similar items.

---

---

---

---

---

---

---

---

**Physical Hazards:** human-caused environmental impacts such as mine shafts, high walls, unsafe bridges, primitive roads, or similar features where the potential exists for injury to visitors on the lands after acquisition is completed.

---

---

---

---

---

---

---

---

**Non-Scope Issues:** such as asbestos-containing materials, radon, lead-based paint, drinking water systems, health and safety issues and similar items.

---

## PROPERTY USES

1. ☒ Y ☐ N Are there currently structures and improvements present on the property?  
 # Description: SLOUGHS + PUMPS, WATER DIVERSION CHANNELS
2. ☒ Y ☐ N Is there evidence that there were structures and improvements present on the property in the past?  
 # Description:
3. ☒ Y ☐ N Is there evidence of agricultural use (livestock, crop raising, agricultural drainage; including surface, and/or subsurface drains)? Is there evidence that there were structures and improvements present on the property in the past?  
 # Description: RICE FIELDS + WALNUT GROVES
4. ☒ Y ☐ N Is there evidence of oil and gas exploration/development?  
 # Description:
  - ☐ Y ☐ N If yes, are oil and/or gas drilling pads, holding ponds, or conveyance pipelines and structures present on the property?  
 # Description:
  - ☐ Y ☐ N Is there evidence of current and/or past spills or releases of hazardous substances or pollutants, contaminants, or petroleum and petroleum products related to the oil and gas exploration/development?  
 # Description:
5. ☒ Y ☐ N Is there any evidence of strip mining, hard rock mining, piles, or other extractive mineral activities?  
 # Description:
  - ☐ Y ☐ N If minerals extraction operations are present, is there evidence of the use/storage or release of hazardous substances (example, fuel storage tanks, cyanide or chemical use at mill sites)?  
 # Description:
  - ☐ Y ☐ N If minerals extraction operations are present, are there other potential environmental concerns (draining adits or acid mine drainage, waste rock, or mill tailings in or adjacent to streams and surface waters, etc.)?  
 # Description:
  - ☐ Y ☐ N If minerals extraction operations are present, are there physical safety hazards present (open adits, vertical shafts, heavy equipment, etc.)?  
 # Description:
  - ☐ Y ☐ N If the areas of mineral extraction activities (mine sites, mill sites, etc) are not accessible for visual and/or physical inspection, describe the reason for the inaccessibility.

6. ☒ N Describe and note the topographic conditions of the property as well as the general topography of the area surrounding the property that is visually and/or physically observed from the periphery of the property. Identify and locate on a property/site map any key topographic features that may relate to offsite or onsite migration of contaminants.

FLAT W / SLOUGHS

- ☒ N Is there evidence of modified topography or unnatural topographic features (i.e., fill dirt brought onto the property, cover for dumps, mounds, fill areas, depressions, etc.)?

# Description: AREA FARMED

7. ☒ N Is there any evidence of waste materials currently or previously being dumped above grade, buried, and/or burned on the property (i.e., dumps, industrial waste, petroleum products, labeled/unlabeled drums or other containers, pesticide containers, household and farm debris, automotive or industrial batteries, building demolition debris, etc.)?

# Description:

8. ☒ N Are there roads and/or paths present on the property?

# Description: SASPER LANE PAVED, ACCESS RD BESIDE SLOUGH GRAVEL

- ☒ N If roads and/or paths are present, is there evidence of illegal or unauthorized dumping activities occurring?

# Description:

## HAZARDOUS MATERIALS AND SUBSTANCES

1. ☒ N Is there evidence that current operations on the property involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, official and/or unofficial shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?

# Description:

- ☒ N If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with current operations?

# Description:

2. ☒ N Is there evidence that previous operations on the property involved the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, official and/or unofficial shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?

# Description:

- ☒ N If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with past operations or tenants?

# Description:

3. Y ☒ N ☐ Is there evidence that the property is currently or was previously used for any form of illegal activities which may involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, illegal drug labs, waste disposal sites)?  
# \_\_\_\_\_ Description: \_\_\_\_\_
4. Y ☒ N ☐ Is there any evidence of contamination (i.e., hazardous substances or petroleum products) or other materials (soil, rock, etc.) migrating from adjacent and/or nearby properties onto the site?  
# \_\_\_\_\_ Description: \_\_\_\_\_
5. Y ☒ N ☐ Is there evidence of use, storage, mixing, and/or disposal of industrial drums (typically 55 gallons) or sacks of chemicals, automotive or industrial batteries, pesticides (including herbicides), paints, solvents, or other chemicals in individual containers larger than 5 gallons in volume or 50 gallons in the aggregate at the property?  
# \_\_\_\_\_ Description: \_\_\_\_\_
6. Y ☒ N ☐ Are there any unidentified substance containers on the property?  
# \_\_\_\_\_ Description: \_\_\_\_\_
7. Y ☒ N ☐ Is there evidence of use of chemicals, automotive or industrial batteries, pesticides, herbicides, fungicides, paints, solvents, or other, on-fence lines, right of ways, airstrips, heliports, crop duster operations, etc.?  
# \_\_\_\_\_ Description: \_\_\_\_\_
8. Y ☒ N ☐ Is there evidence of oiled roads, oil seeps and slicks, staining on the soil and cracked concrete, asphalt, adjacent to storm-water drains, or other surfaces?  
# \_\_\_\_\_ Description: \_\_\_\_\_
9. Y ☒ N ☐ Are there currently any aboveground or underground storage tanks on the property or indications of the presence of abandoned aboveground or underground storage tanks, such as any vent pipes, fill pipes, access ways indicating a fill pipe, concrete or asphalt pads or patches, islands, or dispensers on the property or adjacent to any structure on the property?  
# \_\_\_\_\_ Description: \_\_\_\_\_  
Y N If ASTs or USTs are present, is there any evidence of spill or releases?  
# \_\_\_\_\_ Description: \_\_\_\_\_
10. Y ☒ N ☐ Is there evidence or any indications that an aboveground or underground storage tank had been installed on the property in the past? For example, the presence of tank pads, vent pipes, fill pipes, access ways indicating a fill pipe, or dispensers on the property or adjacent to any structure on the property?  
# \_\_\_\_\_ Description: \_\_\_\_\_  
Y N If ASTs or USTs are present, is there any evidence of spill or releases?  
# \_\_\_\_\_ Description: \_\_\_\_\_
11. Y ☒ N ☐ Are there electric transmission lines, transformers, capacitors, or any hydraulic equipment (i.e., elevators, presses, lifts, doors, etc.) currently present on the property?  
# \_\_\_\_\_ Description: TRANSMISSION LINES & TRANSFORMERS  
HIGH VOLTAGE

Y ☒ N ☐ If electrical transmission lines, transformers, capacitors, or hydraulic equipment are present, is there any evidence of leakage or the presence of PCBs?

# Description:

12. Y ☒ N ☐ Is there any evidence electric transmission lines, transformers, capacitors, or any hydraulic equipment (i.e., elevators, presses, lifts, doors, etc.) being present on the property in the past?

# Description:

13. Y ☒ N ☐ Are there identified mercury containing materials (i.e., fluorescent lamps, button batteries, thermostats, thermometers, manometers, and other medical devices, pressure gauges, switches, relays, sink traps, and medical waste) on the site?

# Description:

14. Y ☒ N ☐ Is there evidence of any pipelines, utility lines, railways, entry/exit ports, and associated structures, either buried or overhead, crossing the property, and is there evidence of any spills or releases associated with them?

# Description: IRRIGATION PIPING CROSSES AT ACCESS ROAD INTERSECTION

Y ☒ N ☐ If yes, is there any evidence of any spills or releases associated with them?

# Description:

15. Y ☒ N ☐ Are there structures (i.e., buildings, water towers, lead smelters, etc.) and/or soils surrounding structures on the site which might indicate the presence of lead in dust, old paint (peeling, chipping, chalking, or cracking lead-based paint) and/or which were built prior to 1978 (or of unknown construction dates)?

# Description:

Y ☐ N ☒ If a structure is suspected to contain lead, is there any indication of what the intended use for the structure is or is it to be demolished?

# Description:

16. Y ☒ N ☐ Are there structures on the site containing identified asbestos-containing materials (ACMs) or with suspect ACMs (i.e., fire proofing, acoustical plaster, siding, floor tiles, roofing shingles, mastic, insulation, vermiculate, etc.)?

# Description:

17. Y ☒ N ☐ Are there floor drains present in any of the onsite structures and/or areas where hazardous materials are used and/or stored or have been used and/or stored in the past?

# Description:

Y ☐ N ☒ In the areas with floor drains, is there evidence of any chemical stains present on the walls and/or floors of the onsite areas and structures where hazardous materials are/have been used and/or stored?

# Description:

18. Y ☒ N ☐ Are there any floors, drains, ceiling, or walls stained by substances other than water or that are emitting foul and/or unnatural odors (i.e. mold, mildew, other)?

# Description:

19. Y ☒ N ☐ Is there any evidence of any drains, pools, or sumps that contain liquids likely to be hazardous substances or petroleum products?

# Description:

20. Y ☒ N ☐ If structures are present on the property, is there indication of how the structures are heated/cooled? If yes, describe the refrigeration/cooling systems and indicate whether they contain Freon and other regulated substances?

# Description:

## WATER/WASTER WATER

1. Y ☒ N ☐ Is surface water present on the property (i.e. pits, ponds, lagoons, rivers, creeks, oceans, etc.)?

# Description: RICE PONDS + IRRIGATION CANALS

- Y ☒ N ☐ If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with current operations?

# Description:

- Y ☒ N ☐ If surface water is present (example pits, ponds, lagoons), is there evidence of any unnatural characteristics (i.e., color, sheens, odors, sterile, etc.)? If known, indicate whether it is associated with an activity related to the property and whether it is the situation is new or has been present for an extended period of time.

# Description:

- Y ☒ N ☐ If surface water is present, is there evidence of hazardous materials dumping in water bodies (e.g. used for agricultural, commercial and/or industrial purposes, marinas, docks, etc.)?

# Description:

2. Y ☒ N ☐ Is there evidence that the property currently or was previously served by an onsite drinking water supply well? If the well is no longer used, indicate whether it has been properly abandoned. If no, indicate whether the property is supplied by an offsite water source.

# Description:

- Y ☒ N ☐ If a well is present on the property, is there evidence of any contamination of the water supply or of the nearby soils?

# Description:

3. Y ☒ N ☐ Is there evidence that the property currently or was previously served by a non-potable water system (example, agricultural well)? If the well is no longer used, indicate whether it has been properly abandoned.

# Description: SEVERAL WELL PUMPS TRANSFER WATER TO CANALS

- Y ☒ N ☐ If a non-potable well is present on the property, is there evidence of any contamination of the water supply or of the nearby soils?

# Description:

4. Y ☒ N Is there evidence, other than storm water, of sanitary wastewater discharge from restrooms, kitchens, or other household-type uses? Is there evidence of industrial and/or other wastewater discharge on or adjacent to the property?

# Description:

5. Y ☒ N Is there evidence that the property currently has or had in the past an onsite waste water treatment and disposal system (septic systems, sewage lagoons, etc.)?

# Description:

Y ☒ N If the onsite waste water treatment and disposal system is no longer in use, is there evidence that it has been closed?

# Description:

6. Y ☒ N Is there evidence that the property discharged waste water to an offsite facility?

# Description:

Y ☒ N Is there evidence of other wastewater treatment/disposal facilities (example oil water separators, ponds, pits, lagoons) located on the property that have or may have been used for waste disposal?

# Description:

7. Y ☒ N Is there evidence of any other existent discharges, drains, grates, etc that have not been addressed previously?

# Description:

## WATER/WASTEWATER

1. Y ☒ N Is there any evidence that any monitoring wells have been installed on the property?

# Description:

Y ☒ N If the monitoring wells have been installed and are no longer in use, is there evidence that they been properly abandoned in accordance with applicable regulatory requirements?

# Description:

2. Y ☒ N Is there evidence of stressed vegetation on the property (i.e., bare ground, distressed/dead vegetation, unusually healthy vegetation, etc.) that is not associated with insufficient or too much water?

# Description:

3. Y ☒ N Is there a large number or amount of invasive plants present on the property? If yes, please indicate common name if known (e.g., kudzu, phragmites, cheatgrass, etc.), and approximate amount if possible (e.g., approximately half an acre, etc.).

# Description:

4. Y ☒ N Is there a large number or amount of invasive plants present on the property? If yes, please indicate common name if known (e.g., kudzu, phragmites, cheatgrass, etc.), and approximate amount if possible (e.g., approximately half an acre, etc.).

# Description:

## SURROUNDING PROPERTY USE

1. ☒ N As can be visually and/or physically observed from the periphery of the property, are there currently structures and improvements present on the surrounding property?  
# Description: PUMPS, IRRIGATION, AG
2. ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence that there were structures and improvements present on the surrounding property in the past?  
# Description: \_\_\_\_\_
3. ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence that current operations on the surrounding property involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?  
# Description: \_\_\_\_\_
4. ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence that past operations on the surrounding property involved the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?  
# Description: \_\_\_\_\_
5. ☒ N Is there evidence of any other nearby land uses or activities, especially upstream or upgradient that might have had a waste or dump site? For example, are there upstream or upgradient active or abandoned mine sites which may impact or threaten the subject real property?  
# Description: \_\_\_\_\_
6. ☒ N Is there evidence of any hazardous substance, pollutant/contaminant spill or release, or other potential environmental problems on any adjacent or nearby properties?  
# Description: \_\_\_\_\_
7. ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence of any current or past agricultural drainage (surface, and/or subsurface drains, field runoff, etc.) discharging from the adjacent properties onto the property/site?  
# Description: IRRIGATION CANALS
8. ☒ N As can be visually and/or physically observed from the periphery of the property, is there any evidence of contamination (i.e., hazardous substances or petroleum products) or other materials (soil, rock, etc.) migrating from adjacent and/or nearby properties onto the property/site? If  
# Description: \_\_\_\_\_
9. ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence of oil and gas exploration/development on the adjacent and surrounding property?  
# Description: \_\_\_\_\_

Y N If yes, is there any evidence of oil and/or gas drilling pads, holding ponds, or conveyance pipelines and structures present on the adjacent and surrounding property?  
# Description:

10. Y (N) As can be visually and/or physically observed from the periphery of the property, is there evidence of current and/or past spills or releases of hazardous substances or pollutants, contaminants, or petroleum and petroleum products related to the oil and gas exploration/development?  
# Description:

11. Y (N) As can be visually and/or physically observed from the periphery of the property, is there any evidence of strip mining, hardrock mining, piles, or other extractive mineral activities on the adjacent and surrounding property?  
# Description:

12. Y (N) As can be visually and/or physically observed from the periphery of the property, is there evidence of the use/storage or release of hazardous substances (for example, fuel storage tanks, cyanide or chemical use at mill sites) associated with the minerals extraction operations on adjacent and surrounding property?  
# Description:

13. Y (N) As can be visually and/or physically observed from the periphery of the property, describe and note the topographic conditions of the surrounding property as well as the general topography of the area.  
# Description: FLAT - RICE FIELDS

Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of modified topography or unnatural topographic features on the surrounding property that may indicate (i.e., fill dirt brought onto property, cover for dumps, mounds, fill areas, depressions, etc.)?  
# Description:

14. Y (N) As can be visually and/or physically observed from the periphery of the property, is there evidence of stressed vegetation on the surrounding property (i.e., bare ground, distressed/dead vegetation, unusually healthy vegetation, etc.) that is not associated with insufficient or too much water?  
# Description:

15. Y (N) As can be visually and/or physically observed from the periphery of the property, is there a large number or amount of invasive plants present on the surrounding property?  
# Description:

16. Y (N) Is there anything else observed that could indicate the presence of hazardous substances, petroleum products, or other potential environmental problems on the surrounding properties?  
# Description:

## SOLID WASTE, PHYSICAL HAZARDS, AND NON-SCOPE ISSUES

Solid Waste, Physical Hazards, and Non-Scope Issues identified during the inquiry will be described below, identified on the site map, and photographs taken and provided as an attachment. If none, so state.

**Solid Waste:** such as household garbage, tires, appliances, dead animals, abandoned automobiles, and similar items.

---

---

---

---

---

---

---

---

**Physical Hazards:** human-caused environmental impacts such as mine shafts, high walls, unsafe bridges, primitive roads, or similar features where the potential exists for injury to visitors on the lands after acquisition is completed.

NEAR SURFACE WATER FROM IRRIGATION CANALS

---

---

---

---

---

---

---

---

**Non-Scope Issues:** such as asbestos-containing materials, radon, lead-based paint, drinking water systems, health and safety issues and similar items.

## PROPERTY USES

1. ☒ N Are there currently structures and improvements present on the property?  
 # Description: RR BRANCHES (USED/UNUSED), PETROL PIPING, FIBROPTIC LINE. USAF RADAR STATION
2. ☒ N Is there evidence that there were structures and improvements present on the property in the past?  
 # Description:
3. ☒ N Is there evidence of agricultural use (livestock, crop raising, agricultural drainage; including surface, and/or subsurface drains)? Is there evidence that there were structures and improvements present on the property in the past?  
 # Description: ALMOND FIELDS; LIVESTOCK / HORSE COMPOUND
4. ☒ N Is there evidence of oil and gas exploration/development?  
 # Description:
 

☒ N If yes, are oil and/or gas drilling pads, holding ponds, or conveyance pipelines and structures present on the property?  
 # Description:

☒ N Is there evidence of current and/or past spills or releases of hazardous substances or pollutants, contaminants, or petroleum and petroleum products related to the oil and gas exploration/development?  
 # Description:
5. ☒ N Is there any evidence of strip mining, hard rock mining, piles, or other extractive mineral activities?  
 # Description:
 

☒ N If minerals extraction operations are present, is there evidence of the use/storage or release of hazardous substances (example, fuel storage tanks, cyanide or chemical use at mill sites)?  
 # Description:

☒ N If minerals extraction operations are present, are there other potential environmental concerns (draining adits or acid mine drainage, waste rock, or mill tailings in or adjacent to streams and surface waters, etc.)?  
 # Description:

☒ N If minerals extraction operations are present, are there physical safety hazards present (open adits, vertical shafts, heavy equipment, etc.)?  
 # Description:

☒ N If the areas of mineral extraction activities (mine sites, mill sites, etc) are not accessible for visual and/or physical inspection, describe the reason for the inaccessibility.

6. ☒ Y ☐ N Describe and note the topographic conditions of the property as well as the general topography of the area surrounding the property that is visually and/or physically observed from the periphery of the property. Identify and locate on a property/site map any key topographic features that may relate to offsite or onsite migration of contaminants.

FLAT W/ MEANDERING SLOUGH. N FIELD ~2' ABOVE ALMOND GROVE

- ☒ Y ☐ N Is there evidence of modified topography or unnatural topographic features (i.e., fill dirt brought onto the property, cover for dumps, mounds, fill areas, depressions, etc.)?

# Description: LEVEL FOR AG FIELD

7. ☒ Y ☐ N Is there any evidence of waste materials currently or previously being dumped above grade, buried, and/or burned on the property (i.e., dumps, industrial waste, petroleum products, labeled/unlabeled drums or other containers, pesticide containers, household and farm debris, automotive or industrial batteries, building demolition debris, etc.)?

# Description:

8. ☒ Y ☐ N Are there roads and/or paths present on the property?

# Description: DIRT ACCESS ROADS

- ☒ Y ☐ N If roads and/or paths are present, is there evidence of illegal or unauthorized dumping activities occurring?

# Description:

## HAZARDOUS MATERIALS AND SUBSTANCES

1. ☒ Y ☐ N Is there evidence that current operations on the property involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, official and/or unofficial shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?

# Description:

- ☒ Y ☐ N If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with current operations?

# Description:

2. ☒ Y ☐ N Is there evidence that previous operations on the property involved the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, official and/or unofficial shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?

# Description: PETROL PIPE LINE FOLLOWING S. RR BRANCH KINDER MORGAN PUMPING STATION

- ☒ Y ☐ N If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with past operations or tenants?

# Description:

3. Y ☒ N ☐ Is there evidence that the property is currently or was previously used for any form of illegal activities which may involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, illegal drug labs, waste disposal sites)?  
# \_\_\_\_\_ Description: \_\_\_\_\_
4. Y ☒ N ☐ Is there any evidence of contamination (i.e., hazardous substances or petroleum products) or other materials (soil, rock, etc.) migrating from adjacent and/or nearby properties onto the site?  
# \_\_\_\_\_ Description: \_\_\_\_\_
5. Y ☒ N ☐ Is there evidence of use, storage, mixing, and/or disposal of industrial drums (typically 55 gallons) or sacks of chemicals, automotive or industrial batteries, pesticides (including herbicides), paints, solvents, or other chemicals in individual containers larger than 5 gallons in volume or 50 gallons in the aggregate at the property?  
# \_\_\_\_\_ Description: \_\_\_\_\_
6. Y ☒ N ☐ Are there any unidentified substance containers on the property?  
# \_\_\_\_\_ Description: \_\_\_\_\_
7. Y ☒ N ☐ Is there evidence of use of chemicals, automotive or industrial batteries, pesticides, herbicides, fungicides, paints, solvents, or other, on-fence lines, right of ways, airstrips, heliports, crop duster operations, etc.?  
# \_\_\_\_\_ Description: \_\_\_\_\_
8. Y ☒ N ☐ Is there evidence of oiled roads, oil seeps and slicks, staining on the soil and cracked concrete, asphalt, adjacent to storm-water drains, or other surfaces?  
# \_\_\_\_\_ Description: \_\_\_\_\_
9. Y ☒ N ☐ Are there currently any aboveground or underground storage tanks on the property or indications of the presence of abandoned aboveground or underground storage tanks, such as any vent pipes, fill pipes, access ways indicating a fill pipe, concrete or asphalt pads or patches, islands, or dispensers on the property or adjacent to any structure on the property?  
# \_\_\_\_\_ Description: PROPANE TANK @ USAF STATION
- Y ☒ N ☐ If ASTs or USTs are present, is there any evidence of spill or releases?  
# \_\_\_\_\_ Description: \_\_\_\_\_
10. Y ☒ N ☐ Is there evidence or any indications that an aboveground or underground storage tank had been installed on the property in the past? For example, the presence of tank pads, vent pipes, fill pipes, access ways indicating a fill pipe, or dispensers on the property or adjacent to any structure on the property?  
# \_\_\_\_\_ Description: \_\_\_\_\_
- Y ☒ N ☐ If ASTs or USTs are present, is there any evidence of spill or releases?  
# \_\_\_\_\_ Description: \_\_\_\_\_
11. Y ☒ N ☐ Are there electric transmission lines, transformers, capacitors, or any hydraulic equipment (i.e., elevators, presses, lifts, doors, etc.) currently present on the property?  
# \_\_\_\_\_ Description: TRANSMISSION LINES

Y ☒ N If electrical transmission lines, transformers, capacitors, or hydraulic equipment are present, is there any evidence of leakage or the presence of PCBs?

# Description:

12. Y ☒ N Is there any evidence electric transmission lines, transformers, capacitors, or any hydraulic equipment (i.e., elevators, presses, lifts, doors, etc.) being present on the property in the past?

# Description:

13. Y ☒ N Are there identified mercury containing materials (i.e., fluorescent lamps, button batteries, thermostats, thermometers, manometers, and other medical devices, pressure gauges, switches, relays, sink traps, and medical waste) on the site?

# Description:

14. Y ☒ N Is there evidence of any pipelines, utility lines, railways, entry/exit ports, and associated structures, either buried or overhead, crossing the property, and is there evidence of any spills or releases associated with them?

# Description: FIBROPTIC + PETROL LINES ALONG S. BRANCA RD.

Y ☒ N If yes, is there any evidence of any spills or releases associated with them?

# Description:

15. Y ☒ N Are there structures (i.e., buildings, water towers, lead smelters, etc.) and/or soils surrounding structures on the site which might indicate the presence of lead in dust, old paint (peeling, chipping, chalking, or cracking lead-based paint) and/or which were built prior to 1978 (or of unknown construction dates)?

# Description:

Y ☒ N If a structure is suspected to contain lead, is there any indication of what the intended use for the structure is or is it to be demolished?

# Description:

16. Y ☒ N Are there structures on the site containing identified asbestos-containing materials (ACMs) or with suspect ACMs (i.e., fire proofing, acoustical plaster, siding, floor tiles, roofing shingles, mastic, insulation, vermiculate, etc.)?

# Description:

17. Y ☒ N Are there floor drains present in any of the onsite structures and/or areas where hazardous materials are used and/or stored or have been used and/or stored in the past?

# Description:

Y ☒ N In the areas with floor drains, is there evidence of any chemical stains present on the walls and/or floors of the onsite areas and structures where hazardous materials are/have been used and/or stored?

# Description:

18. Y ☒ N Are there any floors, drains, ceiling, or walls stained by substances other than water or that are emitting foul and/or unnatural odors (i.e. mold, mildew, other)?

# Description:

19. ☒ Y ☐ N Is there any evidence of any drains, pools, or sumps that contain liquids likely to be hazardous substances or petroleum products?

# Description:

20. ☒ Y ☐ N If structures are present on the property, is there indication of how the structures are heated/cooled? If yes, describe the refrigeration/cooling systems and indicate whether they contain Freon and other regulated substances?

# Description: A/C FOR EQUIP @ USAF

## WATER/WASTER WATER

1. ☒ Y ☐ N Is surface water present on the property (i.e. pits, ponds, lagoons, rivers, creeks, oceans, etc.)?

# Description: BEST SLOUGH

- ☒ Y ☐ N If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with current operations?

# Description:

- ☒ Y ☐ N If surface water is present (example pits, ponds, lagoons), is there evidence of any unnatural characteristics (i.e., color, sheens, odors, sterile, etc.)? If known, indicate whether it is associated with an activity related to the property and whether it is the situation is new or has been present for an extended period of time.

# Description:

- ☒ Y ☐ N If surface water is present, is there evidence of hazardous materials dumping in water bodies (e.g. used for agricultural, commercial and/or industrial purposes, marinas, docks, etc.)?

# Description:

2. ☒ Y ☐ N Is there evidence that the property currently or was previously served by an onsite drinking water supply well? If the well is no longer used, indicate whether it has been properly abandoned. If no, indicate whether the property is supplied by an offsite water source.

# Description:

- ☒ Y ☐ N If a well is present on the property, is there evidence of any contamination of the water supply or of the nearby soils?

# Description:

3. ☒ Y ☐ N Is there evidence that the property currently or was previously served by a non-potable water system (example, agricultural well)? If the well is no longer used, indicate whether it has been properly abandoned.

# Description: ALMANS FIELDS USE AGW GUS

- ☒ Y ☐ N If a non-potable well is present on the property, is there evidence of any contamination of the water supply or of the nearby soils?

# Description:

- ## WATER/WASTER WATER

- Page 6 of 9

## SURROUNDING PROPERTY USE

1. ☒ Y ☒ N As can be visually and/or physically observed from the periphery of the property, are there currently structures and improvements present on the surrounding property?  
# Description: RESIDENCES + AG FIELDS, USAF RADAR
2. ☒ Y ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence that there were structures and improvements present on the surrounding property in the past?  
# Description: \_\_\_\_\_
3. ☒ Y ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence that current operations on the surrounding property involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?  
# Description: \_\_\_\_\_
4. ☒ Y ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence that past operations on the surrounding property involved the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?  
# Description: \_\_\_\_\_
5. ☒ Y ☒ N Is there evidence of any other nearby land uses or activities, especially upstream or upgradient that might have had a waste or dump site? For example, are there upstream or upgradient active or abandoned mine sites which may impact or threaten the subject real property?  
# Description: DEBRIS PILE FOUND ON W SIDE OF RIVER. BURN AREAS FOR SLASH + BRUSH
6. ☒ Y ☒ N Is there evidence of any hazardous substance, pollutant/contaminant spill or release, or other potential environmental problems on any adjacent or nearby properties?  
# Description: \_\_\_\_\_
7. ☒ Y ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence of any current or past agricultural drainage (surface, and/or subsurface drains, field runoff, etc.) discharging from the adjacent properties onto the property/site?  
# Description: \_\_\_\_\_
8. ☒ Y ☒ N As can be visually and/or physically observed from the periphery of the property, is there any evidence of contamination (i.e., hazardous substances or petroleum products) or other materials (soil, rock, etc.) migrating from adjacent and/or nearby properties onto the property/site? If  
# Description: \_\_\_\_\_
9. ☒ Y ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence of oil and gas exploration/development on the adjacent and surrounding property?  
# Description: \_\_\_\_\_

Y N If yes, is there any evidence of oil and/or gas drilling pads, holding ponds, or conveyance pipelines and structures present on the adjacent and surrounding property?

# Description:

10. Y ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence of current and/or past spills or releases of hazardous substances or pollutants, contaminants, or petroleum and petroleum products related to the oil and gas exploration/development?

# Description:

11. Y ☒ N As can be visually and/or physically observed from the periphery of the property, is there any evidence of strip mining, hardrock mining, piles, or other extractive mineral activities on the adjacent and surrounding property?

# Description:

12. Y ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence of the use/storage or release of hazardous substances (for example, fuel storage tanks, cyanide or chemical use at mill sites) associated with the minerals extraction operations on adjacent and surrounding property?

# Description:

13. Y ☒ N As can be visually and/or physically observed from the periphery of the property, describe and note the topographic conditions of the surrounding property as well as the general topography of the area.

# Description: FLAT W/ RIVERINE FEATURES

☒ Y ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence of modified topography or unnatural topographic features on the surrounding property that may indicate (i.e., fill dirt brought onto property, cover for dumps, mounds, fill areas, depressions, etc.)?

# Description: FARM LAND

14. Y ☒ N As can be visually and/or physically observed from the periphery of the property, is there evidence of stressed vegetation on the surrounding property (i.e., bare ground, distressed/dead vegetation, unusually healthy vegetation, etc.) that is not associated with insufficient or too much water?

# Description:

15. Y ☒ N As can be visually and/or physically observed from the periphery of the property, is there a large number or amount of invasive plants present on the surrounding property?

# Description:

16. Y ☒ N Is there anything else observed that could indicate the presence of hazardous substances, petroleum products, or other potential environmental problems on the surrounding properties?

# Description:

## SOLID WASTE, PHYSICAL HAZARDS, AND NON-SCOPE ISSUES

Solid Waste, Physical Hazards, and Non-Scope Issues identified during the inquiry will be described below, identified on the site map, and photographs taken and provided as an attachment. If none, so state.

**Solid Waste:** such as household garbage, tires, appliances, dead animals, abandoned automobiles, and similar items.

TIRES, METAL

**Physical Hazards:** human-caused environmental impacts such as mine shafts, high walls, unsafe bridges, primitive roads, or similar features where the potential exists for injury to visitors on the lands after acquisition is completed.

**Non-Scope Issues:** such as asbestos-containing materials, radon, lead-based paint, drinking water systems, health and safety issues and similar items.

## PROPERTY USES

1. ☒ N Are there currently structures and improvements present on the property?  
# Description: USAF RADAR STATION, RR TRACKS, ROADS, HWY
2. ☒ N Is there evidence that there were structures and improvements present on the property in the past?  
# Description:
3. ☒ N Is there evidence of agricultural use (livestock, crop raising, agricultural drainage; including surface, and/or subsurface drains)? Is there evidence that there were structures and improvements present on the property in the past?  
# Description: FENCED AREA W/ STABLES
4. ☒ N Is there evidence of oil and gas exploration/development?  
# Description:  

☒ N If yes, are oil and/or gas drilling pads, holding ponds, or conveyance pipelines and structures present on the property?  
# Description:

☒ N Is there evidence of current and/or past spills or releases of hazardous substances or pollutants, contaminants, or petroleum and petroleum products related to the oil and gas exploration/development?  
# Description:
5. ☒ N Is there any evidence of strip mining, hard rock mining, piles, or other extractive mineral activities?  
# Description:  

☒ N If minerals extraction operations are present, is there evidence of the use/storage or release of hazardous substances (example, fuel storage tanks, cyanide or chemical use at mill sites)?  
# Description:

☒ N If minerals extraction operations are present, are there other potential environmental concerns (draining adits or acid mine drainage, waste rock, or mill tailings in or adjacent to streams and surface waters, etc.)?  
# Description:

☒ N If minerals extraction operations are present, are there physical safety hazards present (open adits, vertical shafts, heavy equipment, etc.)?  
# Description:

☒ N If the areas of mineral extraction activities (mine sites, mill sites, etc) are not accessible for visual and/or physical inspection, describe the reason for the inaccessibility.

6. ☒ Y ☐ N Describe and note the topographic conditions of the property as well as the general topography of the area surrounding the property that is visually and/or physically observed from the periphery of the property. Identify and locate on a property/site map any key topographic features that may relate to offsite or onsite migration of contaminants.

GENERALLY FLAT W/ DRAINAGES + MOUNDS FOR ROADS + RR TRACK

7. ☒ Y ☐ N Is there evidence of modified topography or unnatural topographic features (i.e., fill dirt brought onto the property, cover for dumps, mounds, fill areas, depressions, etc.)?

# Description: S/S ABOVE

8. ☒ Y ☐ N Are there roads and/or paths present on the property?

# Description: S/S

9. ☒ Y ☐ N Are there roads and/or paths present on the property?

# Description: ROADS + HWY

10. ☒ Y ☐ N If roads and/or paths are present, is there evidence of illegal or unauthorized dumping activities occurring?

# Description:

## HAZARDOUS MATERIALS AND SUBSTANCES

1. ☒ Y ☐ N Is there evidence that current operations on the property involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, official and/or unofficial shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?

# Description:

2. ☒ Y ☐ N If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with current operations?

# Description:

3. ☒ Y ☐ N Is there evidence that previous operations on the property involved the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, official and/or unofficial shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?

# Description:

4. ☒ Y ☐ N If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with past operations or tenants?

# Description:

3. Y ☒ N ☐ Is there evidence that the property is currently or was previously used for any form of illegal activities which may involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, illegal drug labs, waste disposal sites)?  
# \_\_\_\_\_ Description: \_\_\_\_\_
4. Y ☒ N ☐ Is there any evidence of contamination (i.e., hazardous substances or petroleum products) or other materials (soil, rock, etc.) migrating from adjacent and/or nearby properties onto the site?  
# \_\_\_\_\_ Description: \_\_\_\_\_
5. Y ☒ N ☐ Is there evidence of use, storage, mixing, and/or disposal of industrial drums (typically 55 gallons) or sacks of chemicals, automotive or industrial batteries, pesticides (including herbicides), paints, solvents, or other chemicals in individual containers larger than 5 gallons in volume or 50 gallons in the aggregate at the property?  
# \_\_\_\_\_ Description: \_\_\_\_\_
6. Y ☒ N ☐ Are there any unidentified substance containers on the property?  
# \_\_\_\_\_ Description: \_\_\_\_\_
7. Y ☒ N ☐ Is there evidence of use of chemicals, automotive or industrial batteries, pesticides, herbicides, fungicides, paints, solvents, or other, on-fence lines, right of ways, airstrips, heliports, crop duster operations, etc.?  
# \_\_\_\_\_ Description: \_\_\_\_\_
8. Y ☒ N ☐ Is there evidence of oiled roads, oil seeps and slicks, staining on the soil and cracked concrete, asphalt, adjacent to storm-water drains, or other surfaces?  
# \_\_\_\_\_ Description: \_\_\_\_\_
9. Y ☒ N ☐ Are there currently any aboveground or underground storage tanks on the property or indications of the presence of abandoned aboveground or underground storage tanks, such as any vent pipes, fill pipes, access ways indicating a fill pipe, concrete or asphalt pads or patches, islands, or dispensers on the property or adjacent to any structure on the property?  
# \_\_\_\_\_ Description: \_\_\_\_\_  
Y N If ASTs or USTs are present, is there any evidence of spill or releases?  
# \_\_\_\_\_ Description: \_\_\_\_\_
10. Y ☒ N ☐ Is there evidence or any indications that an aboveground or underground storage tank had been installed on the property in the past? For example, the presence of tank pads, vent pipes, fill pipes, access ways indicating a fill pipe, or dispensers on the property or adjacent to any structure on the property?  
# \_\_\_\_\_ Description: \_\_\_\_\_  
Y N If ASTs or USTs are present, is there any evidence of spill or releases?  
# \_\_\_\_\_ Description: \_\_\_\_\_
11. Y ☒ N ☐ Are there electric transmission lines, transformers, capacitors, or any hydraulic equipment (i.e., elevators, presses, lifts, doors, etc.) currently present on the property?  
# \_\_\_\_\_ Description: \_\_\_\_\_

Y N If electrical transmission lines, transformers, capacitors, or hydraulic equipment are present, is there any evidence of leakage or the presence of PCBs?

# Description:

12. Y N Is there any evidence electric transmission lines, transformers, capacitors, or any hydraulic equipment (i.e., elevators, presses, lifts, doors, etc.) being present on the property in the past?

# Description:

13. Y N Are there identified mercury containing materials (i.e., fluorescent lamps, button batteries, thermostats, thermometers, manometers, and other medical devices, pressure gauges, switches, relays, sink traps, and medical waste) on the site?

# Description:

14. Y N Is there evidence of any pipelines, utility lines, railways, entry/exit ports, and associated structures, either buried or overhead, crossing the property, and is there evidence of any spills or releases associated with them?

# Description: PETROLEUM PIPE LINE, FIBER OPTIC,

Y N If yes, is there any evidence of any spills or releases associated with them?

# Description:

15. Y N Are there structures (i.e., buildings, water towers, lead smelters, etc.) and/or soils surrounding structures on the site which might indicate the presence of lead in dust, old paint (peeling, chipping, chalking, or cracking lead-based paint) and/or which were built prior to 1978 (or of unknown construction dates)?

# Description:

Y N If a structure is suspected to contain lead, is there any indication of what the intended use for the structure is or is it to be demolished?

# Description:

16. Y N Are there structures on the site containing identified asbestos-containing materials (ACMs) or with suspect ACMs (i.e., fire proofing, acoustical plaster, siding, floor tiles, roofing shingles, mastic, insulation, vermiculate, etc.)?

# Description:

17. Y N Are there floor drains present in any of the onsite structures and/or areas where hazardous materials are used and/or stored or have been used and/or stored in the past?

# Description:

Y N In the areas with floor drains, is there evidence of any chemical stains present on the walls and/or floors of the onsite areas and structures where hazardous materials are/have been used and/or stored?

# Description:

18. Y N Are there any floors, drains, ceiling, or walls stained by substances other than water or that are emitting foul and/or unnatural odors (i.e. mold, mildew, other)?

# Description:

19. ☒ Y ☒ N Is there any evidence of any drains, pools, or sumps that contain liquids likely to be hazardous substances or petroleum products?

# Description:

20. ☒ Y ☒ N If structures are present on the property, is there indication of how the structures are heated/cooled? If yes, describe the refrigeration/cooling systems and indicate whether they contain Freon and other regulated substances?

# Description:

## WATER/WASTEWATER

1. ☒ Y ☒ N Is surface water present on the property (i.e. pits, ponds, lagoons, rivers, creeks, oceans, etc.)?

# Description: WETLAND AREA ON EAST SIDE OF TRACKS

W/ CULVERT BENEATH

- ☒ Y ☒ N If yes, is there evidence that there has been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with current operations?

# Description:

- ☒ Y ☒ N If surface water is present (example pits, ponds, lagoons), is there evidence of any unnatural characteristics (i.e., color, sheens, odors, sterile, etc.)? If known, indicate whether it is associated with an activity related to the property and whether it is the situation is new or has been present for an extended period of time.

# Description:

- ☒ Y ☒ N If surface water is present, is there evidence of hazardous materials dumping in water bodies (e.g. used for agricultural, commercial and/or industrial purposes, marinas, docks, etc.)?

# Description:

2. ☒ Y ☒ N Is there evidence that the property currently or was previously served by an onsite drinking water supply well? If the well is no longer used, indicate whether it has been properly abandoned. If no, indicate whether the property is supplied by an offsite water source.

# Description:

- ☒ Y ☒ N If a well is present on the property, is there evidence of any contamination of the water supply or of the nearby soils?

# Description:

3. ☒ Y ☒ N Is there evidence that the property currently or was previously served by a non-potable water system (example, agricultural well)? If the well is no longer used, indicate whether it has been properly abandoned.

# Description:

- ☒ Y ☒ N If a non-potable well is present on the property, is there evidence of any contamination of the water supply or of the nearby soils?

# Description:

4. Y ☒ N Is there evidence, other than storm water, of sanitary wastewater discharge from restrooms, kitchens, or other household-type uses? Is there evidence of industrial and/or other wastewater discharge on or adjacent to the property?

# Description:

5. Y ☒ N Is there evidence that the property currently has or had in the past an onsite waste water treatment and disposal system (septic systems, sewage lagoons, etc.)?

# Description:

Y N If the onsite waste water treatment and disposal system is no longer in use, is there evidence that it has been closed?

# Description:

6. Y ☒ N Is there evidence that the property discharged waste water to an offsite facility?

# Description:

Y N Is there evidence of other wastewater treatment/disposal facilities (example oil water separators, ponds, pits, lagoons) located on the property that have or may have been used for waste disposal?

# Description:

7. Y ☒ N Is there evidence of any other existent discharges, drains, grates, etc that have not been addressed previously?

# Description:

## WATER/WASTEWATER

1. Y ☒ N Is there any evidence that any monitoring wells have been installed on the property?

# Description:

Y N If the monitoring wells have been installed and are no longer in use, is there evidence that they been properly abandoned in accordance with applicable regulatory requirements?

# Description:

2. Y ☒ N Is there evidence of stressed vegetation on the property (i.e., bare ground, distressed/dead vegetation, unusually healthy vegetation, etc.) that is not associated with insufficient or too much water?

# Description:

3. Y ☒ N Is there a large number or amount of invasive plants present on the property? If yes, please indicate common name if known (e.g., kudzu, phragmites, cheatgrass, etc.), and approximate amount if possible (e.g., approximately half an acre, etc.).

# Description:

4. Y ☒ N Is there a large number or amount of invasive plants present on the property? If yes, please indicate common name if known (e.g., kudzu, phragmites, cheatgrass, etc.), and approximate amount if possible (e.g., approximately half an acre, etc.).

# Description:

## SURROUNDING PROPERTY USE

1. Y ☒ N ☐ As can be visually and/or physically observed from the periphery of the property, are there currently structures and improvements present on the surrounding property?  
# \_\_\_\_\_ Description: \_\_\_\_\_
2. Y ☒ N ☐ As can be visually and/or physically observed from the periphery of the property, is there evidence that there were structures and improvements present on the surrounding property in the past?  
# \_\_\_\_\_ Description: \_\_\_\_\_
3. Y ☒ N ☐ As can be visually and/or physically observed from the periphery of the property, is there evidence that current operations on the surrounding property involve the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?  
# \_\_\_\_\_ Description: \_\_\_\_\_
4. Y ☒ N ☐ As can be visually and/or physically observed from the periphery of the property, is there evidence that past operations on the surrounding property involved the processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products (for example, shooting ranges, gasoline station, equipment/vehicle repair, printing facility, dry cleaners, photo developing laboratory, analytical laboratory, junkyard, boneyard, landfill, or as a waste treatment, storage, disposal, processing, or recycling facility)?  
# \_\_\_\_\_ Description: \_\_\_\_\_
5. Y ☒ N ☐ Is there evidence of any other nearby land uses or activities, especially upstream or upgradient that might have had a waste or dump site? For example, are there upstream or upgradient active or abandoned mine sites which may impact or threaten the subject real property?  
# \_\_\_\_\_ Description: \_\_\_\_\_
6. Y ☒ N ☐ Is there evidence of any hazardous substance, pollutant/contaminant spill or release, or other potential environmental problems on any adjacent or nearby properties?  
# \_\_\_\_\_ Description: \_\_\_\_\_
7. Y ☒ N ☐ As can be visually and/or physically observed from the periphery of the property, is there evidence of any current or past agricultural drainage (surface, and/or subsurface drains, field runoff, etc.) discharging from the adjacent properties onto the property/site?  
# \_\_\_\_\_ Description: \_\_\_\_\_
8. Y ☒ N ☐ As can be visually and/or physically observed from the periphery of the property, is there any evidence of contamination (i.e., hazardous substances or petroleum products) or other materials (soil, rock, etc.) migrating from adjacent and/or nearby properties onto the property/site? If  
# \_\_\_\_\_ Description: \_\_\_\_\_
9. Y ☒ N ☐ As can be visually and/or physically observed from the periphery of the property, is there evidence of oil and gas exploration/development on the adjacent and surrounding property?  
# \_\_\_\_\_ Description: \_\_\_\_\_

Y N If yes, is there any evidence of oil and/or gas drilling pads, holding ponds, or conveyance pipelines and structures present on the adjacent and surrounding property?

# Description:

10. Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of current and/or past spills or releases of hazardous substances or pollutants, contaminants, or petroleum and petroleum products related to the oil and gas exploration/development?

# Description:

11. Y N As can be visually and/or physically observed from the periphery of the property, is there any evidence of strip mining, hardrock mining, piles, or other extractive mineral activities on the adjacent and surrounding property?

# Description:

12. Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of the use/storage or release of hazardous substances (for example, fuel storage tanks, cyanide or chemical use at mill sites) associated with the minerals extraction operations on adjacent and surrounding property?

# Description:

13. Y N As can be visually and/or physically observed from the periphery of the property, describe and note the topographic conditions of the surrounding property as well as the general topography of the area.

# Description: FLAT W/ ROLLING HILLS + DRAINAGES

Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of modified topography or unnatural topographic features on the surrounding property that may indicate (i.e., fill dirt brought onto property, cover for dumps, mounds, fill areas, depressions, etc.)?

# Description:

14. Y N As can be visually and/or physically observed from the periphery of the property, is there evidence of stressed vegetation on the surrounding property (i.e., bare ground, distressed/dead vegetation, unusually healthy vegetation, etc.) that is not associated with insufficient or too much water?

# Description:

15. Y N As can be visually and/or physically observed from the periphery of the property, is there a large number or amount of invasive plants present on the surrounding property?

# Description:

16. Y N Is there anything else observed that could indicate the presence of hazardous substances, petroleum products, or other potential environmental problems on the surrounding properties?

# Description:

## SOLID WASTE, PHYSICAL HAZARDS, AND NON-SCOPE ISSUES

Solid Waste, Physical Hazards, and Non-Scope Issues identified during the inquiry will be described below, identified on the site map, and photographs taken and provided as an attachment. If none, so state.

**Solid Waste:** such as household garbage, tires, appliances, dead animals, abandoned automobiles, and similar items.

---

---

---

---

---

---

---

---

**Physical Hazards:** human-caused environmental impacts such as mine shafts, high walls, unsafe bridges, primitive roads, or similar features where the potential exists for injury to visitors on the lands after acquisition is completed.

RR TRACKS

---

---

---

---

---

---

---

---

**Non-Scope Issues:** such as asbestos-containing materials, radon, lead-based paint, drinking water systems, health and safety issues and similar items.

---

---

---

---

---

---

---

---

☐ Y ☐ N Are all identified issues logged on a GPS or marked on a map?
